Patent Engineering Donald S. Rimai, 2016-01-21 Patents are a vital asset in the modern business world They allow patent holders to introduce new products in to a market while deterring other market players from simply copying innovative features without making comparable investments in research and development In years past a few patents may have provided adequate protection That is no longer the case In today s world it is critical that innovative companies protect the features of their products that give them a competitive advantage with a family or portfolio of patents that are strategically generated to protect the market position of the patent holder A patent portfolio that deters competitors from introducing competitive products in a timely manner can be worth billions of dollars Anything less than this is an expensive and possibly fatal distraction This book provides a strategic framework for cost efficient engineering of patent portfolios that protect your investments in research and development and that extend the market advantages that these investments provide
