Jun, 2012-02-01 In this conceptual guided tour of contemporary public administration Jong S Jun challenges the limitations of the discipline which he argues make it inadequate for understanding today s complex human phenomena Drawing on examples and case studies from both Eastern and Western countries he emphasizes critical and interpretive perspectives as a counterforce to the instrumental technical rationality that reduces the field to structural and functionalist views of management He also emphasizes the idea of democratic social construction to transcend the field s reliance on conventional pluralist politics Jun stresses that public administrators and institutions must create opportunities for sharing and learning among organizational members and must facilitate interactive processes between public administrators and citizens so that the latter can voice their problems and opinions The future role of public administrators will be to transcend the limitations of the management and governing of modern public administration and to explore ways of constructing socially meaningful alternatives through communicative action and the participation of citizens Information Resources Management: Concepts, Methodologies, Tools and Applications Management Association, Information Resources, 2010-04-30 This work is a comprehensive four volume reference addressing major issues trends and areas for advancement in information management research containing chapters investigating human factors in IT management as well as IT governance outsourcing and diffusion Provided by publisher **Fashion and Utopia in Management Thinking** René ten Bos, 2000-09-15 Why is it that people in organizations seem to be so vulnerable to management fashion and guruism And why is it that both phenomena are loathed in traditional academic thinking about management and organization In this book Ren ten Bos argues for a more philosophical rather than scientific understanding of management fashion In doing so he questions the positivist and utopian orthodoxies that have pervaded management thinking Ten Bos contends that management fashion is a cultural phenomenon that deserves serious reflection not only because it is so immensely widespread but also because its seems to satisfy

particular philosophical needs among its consumers Building upon some rather unusual sources in postmodern theory the author argues that management fashion might encourage the practitioner to engage in philosophical self experimentation and to adopt alternative forms of understanding However it is also argued that management fashion often fails to keep up to this promise because it remains paradoxically incapable of laying off its rationalist cloak Ren ten Bos is a philosopher and management consultant He works for Schouten Nelissen and took his PhD at the Catholic University of Brabant
