Paul Rudolph The Florida Houses:

Paul Rudolph Christopher Domin, Joseph King, 2007-10-23 Paul Rudolph one of the twentieth century's most iconoclastic architects is best known and most maligned for his large brutalist buildings like Yale's Art and Architecture Building. So it will surprise many to learn that early in his career he developed a series of houses that represent the unrivaled possibilities of a modest American modernism. With their distinctive natural landscapes, local architectural precedents and exploitation of innovative construction materials, the Florida houses—some eighty projects built between 1946 and 1961—brought modern architectural form into a gracious subtropical world of natural abundance developed to a high pitch of stylistic refinement. *Paul Rudolph: The Florida Houses* reveals all of Rudolph's early residential work. With Rudolph's personal essays and renderings, duotone photographs by Ezra Stoller and Joseph Molitor, and insightful text by Joseph King and Christopher Domin, this compelling new book conveys the lightness, timelessness, strength, materiality and transcendence of Rudolph's work.

Paul Rudolph Paul Rudolph, Christopher Domin, Joseph King, Alfonso Pérez-Méndez, 2001* Paul Rudolph Roberto De Alba, 2003-05-16 The light and breeze-filled modern houses in Florida of the 1950s featured in *Paul Rudolph: The Florida Houses* and the hard-lined silhouette of Yale's Art and Architecture Building, 1962, are the two images that come to mind when one thinks of Paul Rudolph. Yet few people know the work of the last decades of his life: from the 1970s through the 90s. Published here for the first time, Rudolph's final works are explored through his masterful pencil drawings, models and photographs, as well as the last interview of his life with architect Peter Blake. In a book that considers these projects in the context of his early success, Roberto de Alba explores the architect's buildings designed from 1969 to 1996 and includes an astonishing variety of projects, many built such as houses, towers, bungalows, chapels, corporate buildings and urban plans of a monumental scale. All show the complicated interplay of space, light and mass that are the trademarks of Rudolph's genius. Through de Alba's close contact with the architect before his death, Rudolph's own vision is conveyed in descriptive texts and accompanying images. *Paul Rudolph: The Late Work* is designed as a companion volume to *The Florida Houses* and is the second in a planned three-volume set of the complete works of this legendary architect. *Paul Rudolph*, 1977 **The**

Architecture of Paul Rudolph Timothy M. Rohan, 2014-07-10 Equally admired and maligned for his remarkable Brutalist buildings, Paul Rudolph (1918–1997) shaped both late modernist architecture and a generation of architects while chairing Yale's department of architecture from 1958 to 1965. Based on extensive archival research and unpublished materials, *The Architecture of Paul Rudolph* is the first in-depth study of the architect neglected since his postwar zenith. Author Timothy M. Rohan unearths the ideas that informed Rudolph's architecture: from his Florida beach houses of the 1940s to his concrete buildings of the 1960s to his lesser-known East Asian skyscrapers of the 1990s. Situating Rudolph within the architectural discourse of his day, Rohan shows how Rudolph countered the perceived monotony of mid-century modernism with a dramatically expressive architecture for postwar America exemplified by his Yale Art and Architecture Building of 1963.
