BRIXMIS and the Secret Cold War Andrew Long, 2024-09-30 A detailed account of British intelligence operations in Cold War East Germany revealing Soviet and East German military secrets from 1946 to 1990 The German Democratic Republic or East Germany was the frontline in the Cold War packed with hundreds of thousands of Soviet and East German troops armed with the latest Warsaw Pact equipment lined up along the 1 400 km Inner German Border However because of the repressive East German police state little human intelligence about these forces reached the West Who were they Where were they located What were they doing How were they equipped What

were their intentions NATO was lined up in West Germany to face these forces and relied on getting up to date intelligence to warn of any threat Indicators of Hostility that could be a precursor to an invasion BRIXMIS the British Commanders in Chief Mission to the Soviet Forces in Germany was on hand to provide that intelligence Thanks to an obscure 1946 agreement between the British and Soviets that established liaison missions in their respective zones of occupation the British were able to send highly qualified military observers into East Germany to roam relatively freely and keep an eye on what was going on What started as liaison a point of contact between the British and Soviet occupation forces developed into a very sophisticated intelligence collection operation sending tours out every day of the year between 1946 and when the Mission closed in 1990 These tours were undertaken in high performance highly modified marked vehicles with personnel in uniform and unarmed apart from professional photographic equipment and occasionally some top secret gadgets from the boffins back in the UK They joined their French and American colleagues in snooping around the opposition photographing military bases equipment and maneuvers and trying to evade capture by the secret police and counterintelligence units They faced danger and violence daily but thanks to their bravery and professionalism the West had accurate and up to date information on what was happening in East Germany which helped keep the peace all that time This is the story of this little known unit and their exploits behind enemy lines [Torque](#) ,2008-05 Singapore s best homegrown car magazine with an editorial dream team driving it We fuel the need for speed [Road and Track](#) ,2004 **The Motor Car** Giancarlo Genta,Lorenzo Morello,Francesco Cavallino,Luigi Filtri,2014-01-06 This book is an introduction to automotive engineering to give freshmen ideas about this technology The text is subdivided in parts that cover all facets of the automobile including legal and economic aspects related to industry and products product configuration and fabrication processes historic evolution and future developments The first part describes how motor vehicles were invented and evolved into the present product in more than 100 years of development The purpose is not only to supply an historical perspective but also to introduce and discuss the many solutions that were applied and could be applied again to solve the same basic problems of vehicle engineering This part also briefly describes the evolution of automotive technologies and market including production and development processes The second part deals with the description and function analysis of all car subsystems such as vehicle body chassis including wheels suspensions brakes and steering mechanisms diesel and gasoline engines electric motors batteries fuel cells hybrid propulsion systems driveline including manual and automatic gearboxes This part addresses also many non technical issues that influence vehicle design and production such as social and economic impact of vehicles market regulations particularly on pollution and safety In spite of the difficulty in forecasting the paths that will be taken by automotive technology the third part tries to open a window on the future It is not meant to make predictions that are likely to be wrong but to discuss the trends of automotive research and innovation and to see the possible paths that may be taken to solve the many problems that are at present open or we can expect for the future The book is completed by two appendices about the
