Motivation And Emotion Evolutionary Physiological Developmental And Social Perspectives:

Motivation and Emotion Denys DeCatanaro,1998 This unique book provides a comprehensive study of emotion within a modern evolutionary perspective Motivation and emotion are presented within an integrated approach that assumes biological and psychological causes including evolution neuroscience endocrinology human development and culture Motivation and Emotion Presents a wealth of modern evidence integrating neuroscience and endocrinology into the study of motivation and emotion The book provides a variety of photographs of facial expressions showing emotions from people of diverse cultures as well as nonhuman primates It also discusses modern interactive explanations for specific behaviors rather than dull historical perspectives For example human affect is explained as a response to social events and stress resulting in psychophysiological consequences An essential reference for any professional in sociology or psychology **Motivation** Roderick Wong,2000-07-03 This book presents an analysis of motivated behaviour from a biological perspective

Subordination and Defeat Leon Sloman,Paul Gilbert,2000-03-01 Most people now accept that human beings are the product of millions of years of mammalian evolution and more recently primate evolution This landmark book explores the implications of our evolutionary history for theories and therapies of depression In particular the focus is on how social conflict has shaped various behavioral and psychophysiological systems Special attention is given to the evolved mechanisms for dealing with social defeat and subordination in both animals and humans By linking human depression to the activation of ancient psychobiological programs for dealing with social conflict one is able to understand the function of depression within groups family systems and between individuals and begin to distinguish depressions that may have adaptive functions from those that are the result of maladaptive feedback systems Although many acknowledge the need for an integrated biopsychosocial theory of psychopathology there continue to be great divisions among social psychological and biological approaches Sloman and Gilbert have brought together leading scientists and clinicians representing different disciplines and schools to present a provocative new evolutionary model of depression This model illuminates old problems in new ways links a common disabling condition to evolved mental mechanisms and points to potential new approaches to prevention and intervention The book will be of compelling interest to all those who study or treat mood disorders **Lean Project**

The Body of the Organisation and its Health Richard Morgan-Jones, 2018-05-08 Using the frameworks of psychoanalysis group relations systemic organisational observation consulting and research this book explores the relationship between the health of the work force and the health of organisations It seeks to do this through an exploration of experience that has three dimensions linked in a single matrix The bodily the emotional and the social This exploration is inspired by Bion's original idea of the protomental matrix from which the group dynamics of basic assumption mentality are derived leading to his initial ideas about group diseases and their cures

Teaming Amy C. Edmondson, 2012-04-03 New breakthrough thinking in organizational learning leadership and change Continuous improvement understanding complex systems and promoting innovation are all part of the landscape of learning challenges today's companies face Amy Edmondson shows that organizations thrive or fail to thrive based on how well the small groups within those organizations work In most organizations the work that produces value for customers is carried out by teams and increasingly by flexible team like entities The pace of change and the fluidity of most work structures means that it's not really about creating effective teams anymore but instead about leading effective teaming Teaming shows that organizations learn when the flexible fluid collaborations they encompass are able to learn The problem is teams and other dynamic groups don't learn naturally Edmondson outlines the factors that prevent them from doing so such as interpersonal fear irrational beliefs about failure groupthink problematic power dynamics and information hoarding With Teaming leaders can shape these factors by encouraging reflection creating psychological safety and overcoming defensive interpersonal dynamics that inhibit the sharing of ideas Further they can use practical management strategies to help organizations realize the benefits inherent in both success and failure Presents a clear explanation of practical management concepts for increasing learning capability for business results Introduces a framework that clarifies how learning processes must be altered for different kinds of work Explains how Collaborative Learning works and gives tips for how to do it well Includes case study research on Intermountain healthcare Prudential GM Toyota IDEO the IRS and both Cincinnati and Minneapolis Children's Hospitals

among others Based on years of research this book shows how leaders can make organizational learning happen by building teams that learn
