**Motivational Interviewing in the Treatment of Psychological Problems** , Preoperative Optimization of the Chronic Pain Patient Heath B. McAnally, Lynda Welton Freeman, Beth Darnall, 2019-08-26

The literature increasingly supports the position that elective surgery on poorly prepared chronic pain patients is not smart and ultimately in no one's best interest Just as patients with ischemic heart disease obstructive lung disease or diabetes can and need to be optimized prior to surgery so too should chronic pain patients The complex dynamics of chronic pain require a priori intervention targeting enhanced recovery before surgery Preoperative Optimization of the Chronic Pain Patient is a groundbreaking collaborative effort written by medical and psychological experts in the field of pain management with a specific interest in the perioperative arena The modern emphasis on biopsychosocial spiritual care is as important here as anywhere in medicine as comprehensive mind body preparation is essential to optimize outcomes That preparation entails replacing toxic thoughts e g anxiety and pain catastrophizing and behaviors e g tobacco and opioid dependence poor sleep nutrition and exercise patterns with beneficial ones Such replacement of maladaptive cognitive behavioral patterns requires the enhancement of patients motivation and the cultivation of healthy habits This book provides the framework for an evidence based synthesis of counseling and intervention for preoperative optimization of chronic pain patients Clinicians will learn to improve health and economic outcomes affecting their patient health care team and institution to identify and target relevant issues utilizing a holistic yet focused approach to optimization and to collaborate with the patient and requisite multidisciplinary care team in a streamlined efficient and effective manner

Child Maltreatment, An Issue of Pediatric Clinics Howard Dubowitz, 2014-11-22 Pediatric primary care provides a unique opportunity to tackle child abuse and neglect In the United States in particular primary care is a well established system and most children have multiple visits especially in the first few years There is typically a very good relationship between parents and health professionals who are respected experts on children The interested pediatrician thus has a remarkable entrance into the workings of a family its shortcomings and its strengths With some knowledge and skill pediatricians can play a pivotal role even in a few strategic minutes We know however that some professionals feel very uncomfortable becoming involved in this unpleasant area and may be deterred from taking any action Understandable as this may be it can jeopardize a child's health and safety Hopefully this issue of Pediatric Clinics of North America will help make this work a bit easier albeit not easy With training and support pediatricians can equip themselves to be competent and more comfortable addressing child maltreatment Aside from the possible forensic implications the heart of this work is primarily about helping families take adequate or good care of their children Indeed helping address child abuse and neglect also helps promote children's health development and safety and it is central to the rich mandate of Pediatrics
