Motivational Dialogue Preparing Addiction Professionals For Motivational Interviewing Practice:

Motivational Dialogue Gillian Tober, Duncan Raistrick, 2014-01-02 Motivational Dialogue explores the application of motivational interviewing in various contexts with a view to enhancing understanding and improving practice. The book describes the research and practice of motivational interviewing as a stand alone intervention as an adjunct to further treatment and as a style of delivery of social and behavioural interventions. The contributors draw on their expertise and experience as researchers, teachers and practitioners to encourage the reader to appreciate the broad applicability of motivational dialogue. The book is divided into five sections which cover reflections and a model, the evidence base, learning and practice, four studies of motivational therapy in practice, motivational dialogue and stepped care. Motivational Dialogue will be of great interest to psychiatrists, clinical psychologists and anyone in the social and health care professions who is involved in assisting people to challenge addictive behaviours. *Principles and Practice of Group Work in Addictions* Robert Hill, Jennifer Harris, 2011-04-20 How can the group setting be used to treat those with drug and alcohol problems? Many professionals working across a variety of addictions settings find themselves working in groups and tackling complex issues; however, there is often very little initial training or on the job support to help them in this challenging task. *Principles and Practice of Group Work in Addictions* has been written with the aim of addressing the key areas in working with drug and alcohol misuse while providing practical solutions to the more common problems that emerge in group work. Drawing on the expertise of clinicians who work in the field of addictions, this book offers readers practical advice for everyday practice. Divided into three sections, it covers core group work in addictions, practical issues and solutions to common problems, specific issues within the field of addictions. *Principles and Practice of Group Work in Addictions* is illustrated throughout with practical case examples providing the reader with an insight into group work in this area. The book will supply guidance for mental health professionals including clinicians, psychologists, nurses and medical staff who encounter group work in addictions for the first time as well as providing further knowledge and support to those who already work in the field.

Motivational Interviewing William R. Miller, Stephen Rollnick, 2012-10-18 This book has been replaced by *Motivational Interviewing Fourth Edition* ISBN 978 1 4625 5279 5. *Motivational Interviewing in Social Work Practice* Melinda Hohman, 2011-10-27 Motivational interviewing (MI) offers powerful tools for helping social work clients draw on their strengths to make desired changes in their lives. This reader friendly book introduces practitioners and students to MI and demonstrates how to integrate this evidence based method into direct practice. Melinda Hohman and her associates describe innovative applications for diverse clients and practice areas including substance abuse treatment, mental health, child welfare, community organizing and others. Extensive sample dialogues illustrate MI skills in action with individuals and groups. The book also presents best practices for MI training, teaching and agency wide integration. This book is in the *Applications of Motivational Interviewing* series edited by Stephen Rollnick, William R. Miller and Theresa B. Moyers.

Motivational Interviewing in Schools Keith C. Herman, Wendy M. Reinke, Andy Frey, Stephanie Shepard, 2014 The authors of this book have made a very important contribution in producing a book that literally provides a roadmap for how to realize MI's potential in school and family contexts. They are the acknowledged leaders of MI in schools and deserve much credit for adapting this approach so well for effective use by educators. The content coverage of the book's chapters and its strong focus on the development of tools, strategies, and detailed relevant examples of MI implementation in schools and also with families are in my view truly exemplary. I recommend it unconditionally as an invaluable resource for today's related services professional. Hill Walker PhD, University of Oregon. This is an important, well-written, and groundbreaking book. Motivational interviewing (MI) has been widely applied in health care, corrections, mental health, and addiction services and social work, but this is the first book to explore broadly how it can be used by school professionals. This is an up-to-date, well-documented presentation of the spirit and method of MI, integrating it with behavioral theory and research. Practical exercises and examples support learning of how to apply MI in everyday conversations about change with parents, teachers, students, families, and school-based teams. William R. Miller PhD, The University of New Mexico. Motivational Interviewing has really influenced my thinking about instructional coaching, and I've often wished there was a book that applied the ideas to education. Finally, that book is here. This book deepens our understanding of the personal experience of change and explains how that understanding helps us work with students, parents, teachers, and others within schools. If you're an educator, you should be interested in how people change, and if you're interested in change, you should read this book. Jim Knight PhD, Author of *Instructional Coaching: A Partnership Approach to Improving Instruction*. If you are a school counselor, school psychologist, or other school-based professional and you want to learn how to use motivational interviewing in schools, this is a must-read book. It is a treasure trove of knowledge and skills concerning the theory and step-by-step applications of motivational interviewing in elementary, middle, and high schools. A real strength are the many practical examples and sample forms that illustrate and support how motivational interviewing can effect positive changes in behavior. It is a book that will change the way you practice in schools. Norman C. Gysbers PhD, Curators' Distinguished Professor, University of Missouri. 2016 Student Success Center Editor Emeritus, *Journal of Career Development*. One of the greatest challenges for mental health and other professionals in school settings is to get students, families, and staff willing to partake of and engaged in their services. This is the first book on applying motivational interviewing (MI), a powerful evidence-based technique for facilitating behavior change throughout the school environment, to help psychologists, counselors, and other school-based professionals to improve the effectiveness of their practice. Based on encouraging research on the value of MI in K-12 settings, this practical book explains the basic elements of MI theory and demonstrates step-by-step how the four-stage process of engaging, focusing, evoking, and planning can be used with the families of students who need psychological or counseling services, teachers who need consultation and support to improve classroom management, and the students themselves. The

book discusses barriers to readiness to change and describes how to foster engagement and compliance with school services to increase the likelihood that positive change will occur. It also describes how MI can be used to increase the effectiveness of inter professional teams in school settings along with ways in which MI can be integrated into and build support for already established programs. Richly illustrated with examples of using MI as a strategy for promoting everyday conversations about change, the nucleus of MI practice, the book also includes case studies and sample handouts for mental health professionals, students, family members, and teachers. Key Features: Demonstrates how to apply motivational interviewing to the K-12 environment to help school professionals improve effectiveness. Explains the four stage process of engaging, focusing, evoking, and planning. Shows how MI can be used with children, their families, and teachers to facilitate change. Describes how MI can be integrated into other established programs. Includes plentiful case studies and examples of MI as a strategy for promoting everyday conversations about change.

Contemporary Perspectives on Research in Motivation in Early Childhood Education Olivia Saracho, 2019-03-01. Researchers from different disciplines e.g. physiological, psychological, philosophical have investigated motivation using multiple approaches. For example, in physiology, the scientific study of the normal function in living systems such as biology, researchers may use electrical and chemical stimulation of the brain, the recording of electrical brain wave activity with the electroencephalograph, and lesion techniques where a portion of the brain usually of a laboratory animal is destroyed and subsequent changes in motivation are noted. Petri Cofer 2017. Physiological studies mainly conducted with animals other than humans have revealed the significance of particular brain structures in the control of fundamental motives such as hunger, thirst, sex, aggression, and fear. In psychology, researchers may study the individual's behaviors to understand their actions. In sociology, researchers may examine how individual interactions influence their behavior. For instance, in the classroom, students and teachers behave in expected ways which may differ when they are outside the classroom. Saracho 2003 examined the student's academic achievement when they matched or mismatched their teacher's way of thinking. She identified both the teachers' and students' individual differences and defined consistencies in their cognitive processes. In philosophy, researchers can study the individual's theoretical position such as supporting Maslow's 1943 concept that motivation can create behaviors that augment motivation in the future. Abraham H. Maslow's theory of self-actualization supports this theoretical position. Petri Cofer 2017. These areas and others are represented in this volume. This volume is devoted to understanding mutual and contemporary themes in the individual's motivation and its relationship to cognition. The current literature covers several methods to the multifaceted relationships between motivational and cognitive processes. Comprehensive reviews of the literature focus on prominent cognitive perspectives on motivation with young children which includes ages from birth to eight years of age. The chapters in this special volume review and critically analyze the literature on several aspects of the relationships between motivational and cognitive processes and demonstrates the breadth and theoretical effectiveness of this domain. This brief introduction acknowledges the valuable contributions of

these chapters to the study of human motivation This volume can be a valuable tool to researchers who are conducting studies in the motivation field It focuses on important contemporary issues on motivation in early childhood education ages 0 to 8 to provide the information necessary to make judgments about these issues It also motivates and guides researchers to explore gaps in the motivation literature Motivational Interviewing with Offenders Jill D. Stinson, Michael D.

Clark, 2017-06-28 From experts on working with court mandated populations this book shows how motivational interviewing MI can help offenders move beyond resistance or superficial compliance and achieve meaningful behavior change Using this evidence based approach promotes successful rehabilitation and reentry by drawing on clients values goals and strengths not simply telling them what to do The authors clearly describe the core techniques of MI and bring them to life with examples and sample dialogues from a range of criminal justice and forensic settings Of crucial importance the book addresses MI implementation in real world offender service systems including practical strategies for overcoming obstacles This book is in the Applications of Motivational Interviewing series edited by Stephen Rollnick William R Miller and Theresa B Moyers
