Model: BT-D200

BEFORE YOU BEGIN

Before using this product, read the important safety and legal information pamphlet and follow its instructions.

Take a moment before you get started to familiarize yourself with your new D200 Adapter.

Note: The D200 is a Class 1 compliant Bluetooth device. Bluetooth devices are Bluetooth Class 1 devices made for use primarily for custom operation in homes, businesses and commercial settings with safety signals. Do not use the Bluetooth features in these settings as you indicate.

1 PUT YOUR HEADPHONES/HEADSET IN PAIRING MODE

To use your adapter to connect your computer to your Bluetooth stereo headphones or Bluetooth headset (stereo headset), you must pair first your adapter with your Bluetooth device.

To do this, your headphones or headset must first be placed into pairing (discoverable) mode. On most Motorola Bluetooth stereo headphones and headset headsets, you simply press and hold the Call button until the indicator light turns on and remains steadily lit.

For details on placing your Bluetooth device into pairing mode, see your device's user's guide.

2 PLUG IN ADAPTER AND PAIR WITH HEADPHONES/HEADSET

Your adapter is a plug-and-play device. For first time use, simply plug the adapter into a USB port on your computer. After a few moments, your adapter begins to search for your Bluetooth headphones or headset.

While searching, the indicator light flashes quickly until the adapter successfully finds and pairs with your Bluetooth device.

When your adapter and headphones or headset are successfully paired, the adapter's indicator light changes from flashing blue to steadily lit.

3 TEST AND USE STREAMING MUSIC

To confirm proper streaming music operation with your adapter and stereo headphones:

- 1 Place your headphones over your ears.
- 2 On your computer, play music from your music playing application. Ensure the application remains the active front window on your computer.

If your adapter and headphones are successfully paired and connected for streaming music, you will hear music on your headphones.

After successfully pairing and connecting your adapter and stereo headphones, you don't need to repeat these steps. For daily use, ensure that your adapter is plugged into your computer and that your headphones are turned ON.

4 TEST AND USE VOICE OVER IP CALLING

To confirm proper voice-over-IP (VoIP) calling operation with your adapter and stereo headphones or headset headset:

- 1 Place your headphones over your ears.
- 2 On your computer, make a call from your VoIP calling application.

If your adapter and headphones are successfully paired and connected for VoIP calling, you will hear ringing on your headphones or headset.

After successfully pairing and connecting your adapter and headphones or headset, you don't need to repeat these steps. For daily use, ensure that your adapter is plugged into a computer and that your headphones or headset is turned ON.

PAIRING WITH ADDITIONAL DEVICES

Your adapter stores pairing information for up to five Bluetooth devices. After pairing your adapter with your initial device (steps 1-4), you can subsequently pair D200 your adapter with an additional Bluetooth stereo headphones or headset headset as follows:

- 1 Place your headphones or headset device in pairing mode.
- 2 Press and hold the adapter's button for three seconds until the indicator light begins flashing quickly. The adapter drops the current connection if active, and begins searching for your Bluetooth device.

Your adapter searches for discoverable Bluetooth devices for up to 2 minutes. If no device is found, your adapter enters an idle state (indicator light not lit).

USING YOUR D200

See
**Features and
Functions Guide**
on the reverse side
for information on
using your D200.

TROUBLESHOOTING

My adapter does not find my headphones.

Make sure your headset device is in pairing (discoverable) mode when your adapter is searching for your device.

My adapter did not find my previously paired headphones. Make sure your headphones are turned on before plugging in the adapter to ensure the adapter will find it.

My music playing application is playing music but I don't hear it through my headphones. If the music playing application was being used before the adapter was plugged into the computer, the application may need to be restarted.
