Mountain Environments And Geographic Information Systems:

Mountain Environments And Geographic Information Systems M Price, D. I. Heywood, 1994-06-15 Drawing together experiences from five continents this title evaluates and discusses the use of GIS for research and management in mountain environments Contributions come from both research scientists and private consultants The book includes papers covering GIS in the mountains of the Commonwealth of Independent States land hazard analysis research and management in national parks and adjacent areas USA Canada Australia impacts of climate change on mountain vegetation linkage of knowledge based systems to GIS terrain modelling DTMs These papers are grouped together into sections regional resource inventory and planning natural hazard assessment conservation and protected area management simulation and prediction vegetation and climate change

Geographic Information Science and Mountain Geomorphology Michael Bishop, John F. Shroder, 2004-06-30 From the reviews Bishop and Schroder both Univ of Nebraska at Omaha have brought together an impressive group of practitioners in the relatively new application of geographic information science to mountain geomorphology In doing so they have produced valuable first overall coverage of a high tech approach to mountain three dimensional research More than 40 contributing authors discuss a wide range of related aspects The book is well bound and well produced each chapter provides an extensive source of references The numerous line drawings are clearly reproduced although the mediocre quality of photographic reproduction limits the value of air photographs and satellite images As is characteristic of many edited collections there is some variation in chapter quality Some of the writing is so dense that it requires minute concentration one chapter for instance has 14 pages of references from a total of 43 pages Nevertheless this is a vital compendium for a rapidly expanding field of research Summing Up Recommended Upper division undergraduates through professionals J D Ives Choice March 2005

GIS David R. Green, 2018-10-08 In a relatively short time Geographic Information Systems GIS have spread from being primarily a research tool to higher and subsequently secondary education and from the researcher to the user GIS A Sourcebook for Schools is an easily accessible guide to GIS at an elementary level and provides sufficient background in GIS to ensure a comprehensive working knowledge of the subject It is written specifically for schoolteachers looking to incorporate GIS into the secondary school curriculum and will be the essential textbook for all those wishing to gain an introduction to a working knowledge of GIS The book contains everything that a teacher wanting to implement GIS into the curriculum would need including glossary of terms explanation of the fundamentals definitions and further reading No other book will be quite as useful as this one

Mountain Environments in Changing Climates Martin Beniston, 2002-11-01 Home to large numbers of people sources of water centres of tourism

and sensitive ecological zones mountain environments share distinctive climatic characteristics Once regarded as economically non viable regions mountains now attract major investment as sites of tourism hydro power and communication routes This book brings together some of the current work on the physical and human ecology of mountain environments the impacts of climate change the processes involved and their observation and prediction

Integrated Environmental Management Yasumasa Itakura,1999-04-29 The change from a rural to an industrial economy affects many countries Rapid growth and development causes significant changes in environmental management for countries beginning to confront serious degradation problems In the Pacific Rim rich in environmental and human resources widespread pollution problems affect water and air quality contaminating groundwater and soils and dramatically increasing human exposure to hazardous waste Critical resources such as rainforests disappear at an alarming rate The book features in depth reviews of the Pacific Rim s increasing environmental problems It examines every major issue including hazardous waste solid waste water and wastewater air pollution biodiversity industrial waste and much more The final chapters outline education and information sharing strategies designed to change environmental policy putting the focus on slowing growth and working towards sustainable development Integrated Environmental Management provides an information packed review of the regions environmental problems concentrating on problem solving sustainable development and education Anyone faced with environmental problems related to population growth and rapid industrialization will find this book particularly enlightening

Applied Geography Michael Pacione,2002-03-11 Applied Geography offers an invaluable introduction to useful research in physical environmental and human geography and provides a new focus and reference point for investigating and understanding problem orientated research Forty nine leading experts in the field introduce and explore research which crosses the traditional boundary between physical and human geography A wide range of key issues and contemporary debates are within the books main sections which cover natural and environmental hazards environmental change and management challenges of the human environment techniques of spatial analysis Applied geography is the application of geographic knowledge and skills to identify the nature and causes of social economic and environmental problems and inform policies which lead to their resolution

Environmental Change and Geomorphic Hazards in Forests Roy C. Sidle,2002-09-30 This book reviews current knowledge of most types of geohazards in forested areas The 11 chapters cover hydrologic impacts including flooding and soil erosion desertification in Mediterranean Europe and Africa landslides and hazards in mangrove forests and along shorelines Examples covered are from all five continents

Geographical Information Systems Theory, Applications and Management Cédric Grueau,Robert Laurini,Lemonia Ragia,2023-09-30 This book constitutes selected revised and extended papers of the 7th International Conference on Geographical Information Systems Theory Applications and Management GISTAM 2021 held in April 2021 and 8th International Conference on Geographical Information Systems Theory Applications and Management GISTAM 2022 held in April 2022 Due to the COVID

19 pandemic both conferences were held online The 4 revised full papers presented at GISTAM 2021 were carefully reviewed and selected from the 44 submissions and 3 papers presented at GISTAM 2022 were selected from the 27 submissions The papers are centered on urban and regional planning water information systems geospatial information and technologies spatio temporal database management decision support systems energy information systems GPS and location detection

Earth Observation Science and Applications for Risk Reduction and Enhanced Resilience in Hindu Kush Himalaya Region Birendra Bajracharya, Rajesh Bahadur Thapa, Mir A. Matin, 2021-08-14 This open access book is a consolidation of lessons learnt and experiences gathered from our efforts to utilise Earth observation EO science and applications to address environmental challenges in the Hindu Kush Himalayan region It includes a complete package of knowledge on service life cycles including multi disciplinary topics and practically tested applications for the HKH It comprises 19 chapters drawing from a decade s worth of experience gleaned over the course of our implementation of SERVIR HKH a joint initiative of NASA USAID and ICIMOD to build capacity on using EO and geospatial technology for effective decision making in the region The book highlights SERVIR s approaches to the design and delivery of information services in agriculture and food security land cover and land use change and ecosystems water resources and hydro climatic disasters and weather and climate services It also touches upon multidisciplinary topics such as service planning gender integration user engagement capacity building communication and monitoring evaluation and learning We hope that this book will be a good reference document for professionals and practitioners working in remote sensing geographic information systems regional and spatial sciences climate change ecosystems and environmental analysis Furthermore we are hopeful that policymakers academics and other informed audiences working in sustainable development and evaluation beyond the wider SERVIR network and well as within it will greatly benefit from what we share here on our applications case studies and documentation across cross cutting topics

Environmental Modelling with GIS and Remote Sensing Andrew Skidmore, 2017-08-11 Most government agencies and private companies are investing significant resources in the production and use of geographical data The capabilities of Geographical Information Systems GIS for data analysis are also improving to the extent that the potential performance of GIS software and the data available for analysis outstrip the abilities of

Time-Integrative Geographic Information Systems Thomas Ott, Frank Swiaczny, 2012-12-06 The book deals with the integration of temporal information in Geographic Information Systems The main purpose of an historical or time integrative GIS is to reproduce spatio temporal processes or sequents of events in the real world in the form of a model The model thus making them accessible for spatial query analysis and visualization This volume reflects both theoretical thoughts on the interrelations of space and time as well as practical examples taken from various fields of application e g business data warehousing demographics history and spatial analysis

Observing Our Environment from Space - New Solutions for a New Millennium Gerard Begni, 2021-05-30 This work reflects preoccupations with the threats posed to our environment due to climatic factors major and natural hazards of
