- **Degree of curvature:** Use button ③ to lessen the curvature and button ④ to increase it.

Rear seat head restraints

Warning!

For your protection, drive only with properly positioned head restraints.

Adjust the head restraint in such a way that it is as close to the head as possible and the center of the head restraint supports the back of the head at eye level. This will reduce the potential for injury to the head and neck in the event of an accident or similar situation.

With a rear seat occupied, make sure to move the respective head restraint up from the lowest non-use position and have the occupant adjust the head restraint properly.

Do not drive the vehicle without the seat head restraints installed when the rear seats are occupied. Head restraints are

intended to help reduce injuries during an accident.

Warning!

Make sure the rear seat head restraints engage when placing them upright manually. Otherwise their protective function cannot be ensured.

The back of the head will not be supported in the event of a collision. That could cause serious or even fatal injuries. Rear seat occupants can be seriously injured or killed.

Head restraint height

- ① Head restraint
- ② Release button

- **Raising:** Pull head restraint ① upward to the desired position.
- **Lowering:** Press release button ② and push down on head restraint ①.

Head restraint fore and aft adjustment

- While seated, reach behind you with both hands and find lower edge of the head restraint.
- Adjust the head restraint to the desired position by pushing or pulling on the lower edge of the head restraint cushion.
