**One in Christ Jesus** David Lertis Matson, K.C. Richardson, 2014-11-11 This Festschrift dedicated to S. Scott Bartchy comes on the occasion of his retirement from the Department of History at the University of California at Los Angeles. This volume contains seventeen essays contributed by Professor Bartchy's esteemed colleagues, associates, friends, and former graduate students. Beginning with his groundbreaking work on Greco-Roman slavery, Bartchy's teaching and research have been marked both by his use of social scientific methods for studying the New Testament and by an interest in the social history of early Christianity, including the role of women in the early Christian assemblies, the Christian critique of traditional views of male honor, and the practice of table fellowship and its implications for Christian social relations. To honor Bartchy's legacy, the editors thought it appropriate to organize this collection according to the relational categories suggested by Galatians 3:28. Each essay pertains therefore to the social dynamics between Jews and Gentiles, slaves and freeborn, or males and females in the early church and beyond. The volume's subtitle reflects Scott's many accomplishments as a jazz musician and sounds a note of unity in diversity that characterizes the diverse perspectives and themes found in the essays of this volume.

*A Revised Consent Model for the Transplantation of Face and Upper Limbs: Covenant Consent* James L. Benedict, 2017-04-25 This book supports the emerging field of vascularized composite allotransplantation VCA for face and upper limb transplants by providing a revised ethically appropriate consent model which takes into account what is actually required of facial and upper extremity transplant recipients In place of consent as permission giving waiver or autonomous authorization the standard approaches this book imagines consent as an ongoing mutual commitment i.e. as covenant consent The covenant consent model highlights the need for a durable personal relationship between the patient subject and the care provider researcher Such a relationship is crucial given the recovery period of 5 years or more for VCA recipients The case for covenant consent is made by first examining the field of vascularized composite allotransplantation the history and present understandings of consent in health care and the history and use of the covenant concept from its origins through its applications to health care ethics today This book explains how standard approaches to consent are inadequate in light of the particular features of facial and upper limb transplantation In contrast use of the covenant concept

creates a consent model that is more appropriate ethically for these very complex surgeries and long term recoveries
