 loss of life injury or plant and environmental damage Such systems therefore have to be developed and implemented so that  
 they meet strict require and security because their applications cover ments on safety reliability nearly all areas of daily life  
 and range from controlling and monitoring industrial processes through robotics and power generation to transport systems  
 Highly reliable electronic systems for safety related applications represent an area in which industry has been involved for  
 many years and which is now gaining increasing importance in academia Their relevance also results from an increased  
 perception of safety by society Therefore not only are technicians involved in this area but psycho logical and sociological  
 aspects also play a major role Dealing with safety related systems we have to consider the whole lifecycle of these systems  
 starting from specification up to implementation assessment and operation All those issues mentioned above are covered in  
 this book which represents the proceedings of the 14th International Conference on Computer Safety Reliability and Security
