**Ghetto at the Center of the World** Gordon Mathews,2011-06-01 There is nowhere else in the world quite like Chungking Mansions a dilapidated seventeen story commercial and residential structure in the heart of Hong Kong s tourist district A remarkably motley group of people call the building home Pakistani phone stall operators Chinese guesthouse workers Nepalese heroin addicts Indonesian sex workers and traders and asylum seekers from all over Asia and Africa live and work there even backpacking tourists rent rooms In short it is possibly the most globalized spot on the planet But as Ghetto at the Center of the World shows us a trip to Chungking Mansions reveals a far less glamorous side of globalization A world away from the gleaming headquarters of multinational corporations Chungking Mansions is emblematic of the way globalization actually works for most of the world s people Gordon Mathews s intimate portrayal of the building s polyethnic residents lays bare their intricate connections to the international circulation of goods money and ideas We come to understand the day to day realities of globalization through the stories of entrepreneurs from Africa carting cell phones in their luggage to sell back home and temporary workers from South Asia struggling to earn money to bring to their families And we see that this so called ghetto which inspires fear in many of Hong Kong s other residents despite its low crime rate is not a place of darkness and desperation but a beacon of hope Gordon Mathews s compendium of riveting stories enthralls and instructs in equal measure making Ghetto at the Center of the World not just a fascinating tour of a singular place but also a peek into the future of life on our shrinking planet **PC Mag** ,2006-12-05

**Disaster Communications in a Changing Media World** George Haddow,Kim S Haddow,2008-10-29 Communications is key to the success of disaster mitigation preparedness response and recovery Accurate information disseminated to the general public to elected officials and community leaders and to the media reduces risk saves lives and property and speeds recovery The ability to communicate is no longer an afterthought or a luxury timely communication is now as important as logistics or the pre deployment of materials Planning and controlling the flow of information before during and after a disaster will define your organization s credibility trustworthiness authority and effectiveness The emergence of new media like the internet e mail blogs text messaging cell phone photos and the increasing role played by first informers witnesses who now have the ability to transmit information immediately from the event are redefining the roles of government and media The government s historical role as gatekeeper is now an anachronism Traditional media s

role as the sole conduit of reliable and officially sanctioned information has been eclipsed by the advent of new media. The tools and rules of communications are evolving and disaster communications must evolve to capitalize on these changes and exploit the opportunities they provide. Bloggers have the potential either to add to the chaos during a crisis or to help convey accurate data and report on local conditions. Disaster communications must incorporate a way to manage their impact and if possible use them for the common good. Finally even though the means to the end are evolving the goals the values and the underlying principles of effective disaster communication the need for transparency increased accessibility trustworthiness and reliability and to create partnerships with the media have not changed and need to be embraced along with the practical ability to convey information effectively. Applies the principles of emergency management to communications during a disaster. Covers terrorist incidents accidents and natural disasters like hurricanes and earthquakes. Shows how to use blogs text messages and cell phone cameras as well as government channels and traditional media to communicate during a crisis.
