**Researching History Education** Linda S. Levstik, Keith C. Barton, 2018-02-06 The authors research is well known and among the most important American works being done on how children learn history It is thus a great idea to gather this pivotal research in one place The volume offers a new perspective through the authors reflections on the research process It is profound without pomposity ideal for the intended audience the tone is just right There really isn't another book that does what this one does Stephen J Thornton University of South Florida Researching History Education combines a selection of Linda Levstik's and Keith Barton's previous work on teaching and learning history with their reflections on the process of research These studies address students ideas about time evidence significance and agency as well as classroom contexts of history education and broader social influences on students and teacher's thinking These pieces widely cited in history and social studies education and typically required reading for students in the area were chosen to illustrate major themes in the authors own work and trends in recent research on history education In a series of new chapters written especially for this volume the authors introduce and reflect on their empirical studies and address three issues suggested in the title of the volume theory method and context Although research on children's and adolescents historical understanding has been the most active area of scholarship in social studies in recent years as yet there is little in depth attention to research methodologies or to the perspectives on children history and historical thinking that these

methodologies represent This book fills that need The authors hope is that it will help scholars draw from the existing body of literature in order to participate in more meaningful conversations about the teaching and learning of history Researching History Education provides a needed resource for novice and experienced researchers and will be especially useful in research methodology courses both in social studies and more generally because of its emphasis on techniques for interviewing children the impact of theory on research and the importance of cross cultural comparisons Rapa Nui Journal ,1993 Ocean Country Liz Cunningham,2015-09-08 Ocean Country is an adventure story a call to action and a poetic meditation on the state of the seas But most importantly it is the story of finding true hope in the midst of one of the greatest crises to face humankind the rapidly degrading state of our environment After a near drowning accident in which she was temporarily paralyzed Liz Cunningham crisscrosses the globe in an effort to understand the threats to our dazzling but endangered oceans This intimate account charts her thrilling journey through unexpected encounters with conservationists fishermen sea nomads and scientists in the Mediterranean Sulawesi the Turks and Caicos Islands and Papua New Guinea **Historical Dictionary of the Discovery and Exploration of the Pacific Islands** Max Quanchi,John Robson,2005-10-18 The South Seas as this region used to be called conjured up images of adventure belles and savages romance and fabulous fortunes but the long voyages of discovery and exploration of the vast Pacific Ocean were really an exercise in amazing logistics navigation hard grit shipwreck and pure luck The motivations were scientific and geographic but at the same time nationalistic and materialistic A series on global exploration and discovery would not be complete without this book by Quanchi and Robson It is ambitious and informative and includes the familiar names of Laperouse Bougainville Cook and Dampier as well as the intriguing stories of the Bounty Mutiny scurvy and the mysterious Northwest Passage Terra Australis Ignotia and Davis Land There are entries on first contacts ships navigational instruments mapping and botany The scene is carefully set in the introduction the chronology spans several centuries and the extensive bibliography offers a guide to further reading There are more than just dry facts in this book It has a whiff of salt air the clash of empires cross cultural beach encounters and personal adventure **Historical Empathy and Perspective Taking in the Social Studies** Ozro Luke Davis,Elizabeth Anne Yeager,Stuart J. Foster,2001 Contributors to this volume offer insights from the discipline of history about the nature of empathy and the necessity of examining perspectives on the past On the basis of recent classroom research they suggest tested guides to more robust teaching The contributors insist that with experienced history and social studies teachers students can learn many historical details and with the use of empathy develop deepened and textured interpretations of the history that they study South Pacific Handbook David Stanley,1996 Whether it s the legends about breadfruit trees or ghosts inhabiting inland Tahiti the endangered delicacies to avoid or the gift giving protocol when invited to a local s home how to tour a vanilla plantation on Raiatea or when to find the Noum a flame trees catch fire in hues of red and orange South Pacific Handbook covers everything about this region of boundless
