None Is Enough Why Americans Are Choosing Not To Have Children:

Sons of America Lancelot Larsen,2016-11-04 *Sons of America* Vol 2 tells a story about a man who unknowingly befriends a serial killer and chooses to quit his dead end life and accompany his new partner in a nomadic lifestyle based on basic survival by homicide Their random acts of misanthropy lead them from Los Angeles to New York City where they meet an otherworldly malevolent businessman who offers them the opportunity to expand their horizons in an act of terrorism

Richard Price and the Ethical Foundations of the American Revolution Richard Price,1979 Richard Price was a loyal although dissenting subject of Great Britain who thought the British treatment of their colonies as wrong not only prudentially financially economically militarily and politically but above all morally wrong He expressed these views in his first pamphlet early in 1776 It concluded with a plea for the cessation of hostilities by Great Britain and reconciliation Its analyses arguments and conclusions however along with its admiration for the colonists their moral position and qualities could hardly fail to contribute to their reluctant recognition that there was no real alternative to independence Price found some of his views not only misunderstood but vilified by negative critics in the ensuing controversy So he wrote a second pamphlet which was published in early 1777 He expanded his analysis of liberty extended its application to the war with America and greatly expanded his discussion of the economic impact upon Great Britain After the war in 1784 he published a third pamphlet on the importance of the American Revolution and the means of making it a benefit to the world appending an extensive letter from the Frenchman Turgot Implicitly the letter regards Price as a perceptive theorist of the revolution explicitly it identifies the problems facing the prospective new nation and expresses a wish that it will fulfill its role s the hope of the world Selections in the appendices present a part of the pamphlet controversy and the selection of correspondence shows how seriously Price was regarded by Revolutionary leaders **The American Journal of Nursing**

Population 10 Billion Danny Dorling, 2013-06-20 Before May 2011 the top demographics experts of the United Nations had suggested that world population would peak at 9.1 billion in 2100 and then fall to 8.5 billion people by 2150 In contrast the 2011 revision suggested that 9.1 billion would be achieved much earlier maybe by 2050 or before and by 2100 there would be 10.1 billion of us What's more they implied that global human population might still be slightly rising in our total numbers a century from now So what shall we do Are there too many people on the planet Is this the end of life as we know it Distinguished geographer Professor Danny Dorling thinks we should not worry so much and that whatever impending doom may be around the corner we will deal with it when it comes In a series of fascinating chapters he charts the rise of the human race from its origins to its end point of population 10 billion Thus he shows that while it took until about 1988 to reach 5 billion we reached 6 billion by 2000 7 billion eleven years later and will reach 8 billion by 2025 By recording how we got here Dorling is able to show us the key issues that we face in the coming decades how we will deal with scarcity of resources how our cities will grow and become more female why the change that we should really prepare for is the population decline that will occur after 10 billion **Population 10 Billion** is a major work by one of the world's leading geographers and will change the way you think about the future Packed full of counter intuitive ideas and observations this book is a tool kit to prepare for the future and to help us ask the right questions

New Families, No Families? Frances K. Goldscheider, Linda J. Waite, 1991 Is the American family a thing of the past Almost anyone can tell a story that illustrates how dramatically things have changed in the past decades Nonmarriage childlessness and divorce are commonplace Most children leave their parents home and live for increasing periods before marriage as independent adults But there are also signs of strengths Some parents play more equal roles both financially and in coping with household tasks In this revealing new study Frances Goldscheider and Linda Waite discuss cogently the question of whether we are headed for no families or new families Adults across the nation who reached thirtysomething in the early 1980s are the primary focus of the book although broader patterns of social change are seen in the influence of their parents experiences on them and in their own children's experiences of family life The authors begin with their subjects as very young adults examining their plans for work and family and their attitudes toward women's work and family roles As these young men and women move farther into

adulthood we learn what influences their chances of marriage their patterns of family building and dissolving and the division of labor in the families they form In each case the authors focus on the effects of exposure to different family structures in childhood and young adulthood The authors find surprisingly that the real threats to the family are in the home itself the new option of a home of one s own in a variety of circumstances outside of marriage most men s noninvolvement in the home and its tasks and the fact that knowledge of and respect for basic skills involved in making a home are not being taught to today s sons and daughters
