Supercritical Fluid Technology (1991) Thomas J. Bruno,James F. Ely,2017-11-22 In this volume we have collected a series of reviews that cover both experimental and theoretical work geared toward the more exact requirements of current

SFE applications While we have artificially divided the volume into experimental and theoretical sections natural overlaps will be apparent Many of the papers on experimental and theoretical sections natural overlaps will be apparent Many of the papers on experimental technique contain discussions on equation of state correlations Indeed a good deal of the experimental work is intimately tied to a mathematical description of fluid mixtures The theoretical section presents reviews that cover the modern theory of critical phenomena methods to correlate near critical experimental results and approaches to understanding the behavior of near critical fluids from microscopic theory It is hoped that the scope of these reviews will provide the reader with the basis to further develop our understanding of the behavior of supercritical fluids

Basic Principles of Dispersions Tharwat F. Tadros, 2017-12-04 Volume 2 of the Handbook of Colloid and Interface Science is a survey into the theory of dispersions in a variety of fields as well as characterization by rheology It is an ideal reference work for research scientists universities and industry practitioners looking for a complete understanding of how colloids and interfaces behave in the areas of materials science chemical engineering and colloidal science

Oils and Fats as Raw Materials for Industry Divya Bajpai Tripathy, Anjali Gupta, Pooja Agarwal, Anuradha Mishra, Arvind Kumar Jain, 2024-01-04

OILS AND FATS AS RAW MATERIALS FOR INDUSTRY This new volume emphasizes the sources structure chemistry treatment modification and potential applications for oils and fats as raw materials in industry Oils and fats can be used as raw materials in many industries including food and agriculture as surfactants in laundry detergents and cosmetics as well as in pharmaceuticals Moreover unsaturated vegetable oils are also suitable to form epoxides and hence are important in the manufacturing of paints and adhesives Limited sources of petrochemicals and their harmful effects on health and the environment also promote the use of naturally occurring oils and fats as biodiesel after some chemical modification Moreover a vast variety of nonedible oils that can be obtained from easily cultivable plant species are receiving great interest from researchers because they not only yield cost effective products but are also proven as a substrate to promote sustainable research In this book the editors will cover all possible industrial applications of the products that are formed using edible and non edible vegetable oils Vegetable oils are not a new research area although they are considered an evergreen or long lasting topic as most of the research in synthetic chemistry has been carried out on vegetable oils
