Chris Cornforth, William A. Brown, 2013-07-04 The current fashion for rolling back the state has seen the nonprofit or third sector playing an increasing role in what were previously the heartlands of the public sphere The growing significance of the sector and its increasing reliance on public funds mean it has also attracted increased scrutiny From outside the sector concerns have been raised about the accountability and performance of nonprofit organizations From within the sector there has been considerable debate about whether the increased reliance on government contracts is in danger of undermining the sector's independence As a result the spotlight has fallen on governance arrangements and whether they are adequate to ensure that nonprofit organizations are effective and accountable for their actions and able to retain their independence This collection offers a comprehensive assessment of research on the governance of nonprofit organizations Nonprofit governance research has been dominated by the study of boards of unitary organizations and has paid insufficient attention to the multi level nature of governance governance relationships and dynamics and the contribution of actors other than board members to governance processes Drawing on the research of leading scholars in the US UK Canada and Australia this book presents new perspectives on non profit governance which help to overcome these weaknesses Written in an accessible manner the book will be of value to scholars researchers students reflective practitioners and governance consultants and advisers

They Told Me Not to Take that Job Reynold Levy, 2015-05-12 When Reynold Levy became the new president of Lincoln Center in 2002 New York Magazine described the situation he walked in to as a community in deep distress riven by conflict Ideas for the redevelopment of Lincoln Center s artistic facilities and public spaces required spending more than 1.2 billion but there was no clear pathway for how to raise that kind of unprecedented sum The individual resident organizations that were the key constituents of Lincoln Center the Metropolitan Opera the New York City Opera the New York Philharmonic the Juilliard School and eight others could not agree on a common capital plan or fundraising course of action Instead intramural rivalries and disputes filled the vacuum Besides some of those organizations had daunting problems of their own Levy tells the inside story of the demise of the New York City Opera the Metropolitan Opera s need to use as collateral its iconic Chagall tapestries in the face of mounting operating losses and the New York Philharmonic s dalliance with Carnegie Hall Yet despite these and other challenges Levy and the extraordinary civic leaders at his side were able to shape a consensus for the physical modernization of the sixteen acre campus and raise the money necessary to maintain Lincoln Center as the country s most vibrant performing arts destination By the time he left Lincoln Center had prepared itself fully for the next generation of artists and audiences They Told Me Not to Take That Job is more than a memoir of life at the heart of one of the world s most prominent cultural institutions It is also a case study of leadership and management in action How Levy and his colleagues triumphantly steered Lincoln Center through perhaps the most tumultuous decade of its history to a startling transformation is fully captured in his riveting account

[A Path for Chinese Civil Society](#) Jianxing Yu, Jun Zhou, Hua Jiang, 2012-02-12 This book combines empirical research and theoretical discussions to demonstrate that the civil society paradigm as a western concept could be applicable to the study of state

society relations in contemporary China However the growth of Chinese civil society does not necessarily present an adversarial or confrontational relationship between state and society but rather it is a cooperative relationship based on common interests and mutual benefits between industrial associations and local governments The findings of this research confirm that in contrast to the conventional civil society model in Western and Eastern Europe where civic organizations are independent of the state challenging the state hegemony Chinese civic organizations however still lack autonomy and even remain closely linked to the state but they are growing and expanding their public space and important role in public affairs through active participation This non western path for civil society development is a precise reflection of reality that is profoundly shaped and constrained by Chinese institutional sociological and cultural context Through close investigation into the industrial organizational and social governance of industrial associations in Wenzhou and in depth analysis of their challenges and developments within the institutional context this book provides fresh empirical evidence and insightful analysis of how industrial associations have actively participated in local industrial governance and conduct of public affairs gained greater space for their development and become indispensable partners of local government in social governance
