Importing Faith Glyn J. Ackerley,2016-07-28 Many twenty first century evangelical charismatics in Britain are looking for a faith that works They want to experience the miraculous in terms of healings and Godsent financial provision Many have left the mainstream churches to join independentcharismatic churches led by those who are perceived to have special insights and to teach principles that will help believers experience the miraculous But all is not rosy in this promised paradise and when people are not healed or they remain poor they are often told that it is because they did not have enough faith This study discovers the origin of the principles that are taught by some charismatic leaders Glyn Ackerley identifies them as the same ideas that are taught by the positive confession health wealth and prosperity movement originating in the United States The origins of the ideas are traced back to New Thought metaphysics and its background philosophies of subjective idealism and pragmatism These principles were imported into the UK through contact between British leaders and those influenced by American word of faith teachers Glyn Ackerley explains the persuasiveness of such teachers by examining case studies suggesting their miracles may well have socialand psychological explanations rather than divine origins

the societal dynamics of the ever evolving capitalist mode of production Putting the theory to practice this volume brings together interdisciplinary scholars and activists who employ critical theory to scrutinise right and left wing manifestations of antisemitism They develop in their critique of antisemitism a critique of capitalism as the authors ask why does modern capitalist society seem bound to produce antisemitism And how do we challenge it At a time when the rise of populism internationally has brought with it new strains of antisemitism this is an essential resource that demonstrates the continuing relevance of the critical theory of the Frankfurt School for the struggle against antisemitism today

Weinberg, 2021-10-15 In Red Dynamite Carl R Weinberg argues that creationism s tenacious hold on American public life depended on culture war politics inextricably embedded in religion Many Christian conservatives were convinced that evolutionary thought promoted immoral and even bestial social sexual and political behavior The fruits of subscribing to Darwinism were in their minds a dangerous rearrangement of God given standards and the unsettling of traditional hierarchies of power Despite claiming to focus exclusively on science and religion creationists were practicing politics Their anticommunist campaign often infused

with conspiracy theory gained power from the fact that the Marxist founders the early Bolshevik leaders and their American allies were staunch evolutionists Using the Scopes Monkey Trial as a starting point Red Dynamite traces the politically explosive union of Darwinism and communism over the next century Across those years social evolution was the primary target of creationists and their ideas have consequences strategy instilled fear that shaped the contours of America s culture wars By taking the anticommunist arguments of creationists seriously Weinberg reveals a neglected dimension of antievolutionism and illuminates a source of the creationist movement s continuing strength Thanks to generous funding from Indiana University and its participation in TOME Toward an Open Monograph Ecosystem the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu [cornellopen](http://cornellopen.org) and other repositories
