

### NCIC Fingerprint Classification

The NCIIC method of fingerprint classification is utilized in many ways by the criminal justice system to better establish the identity of an individual.

When a wanted person's fingerprint classification is available, the NCIC FPC should always be included in the wanted person's record for entry into the TIME System Wanted/Wanted Persons file.

While not a positive identifier, the AFNC fingerprint classification can be of assistance in eliminating a person as a suspected wanted person, or a suspect in a criminal investigation. It is also included on the Crime Information Bureau Identification Transmittal as an additional identifier. The use of the AFNC FPC in communications is less subject to error in transcription than the Henry Classification and is convenient for the Henry Classification for identifying documents files.

[illegible]

The NDCG FPC formula is printed in a straight line of 20 alphabetic and numeric characters, beginning with the right thumb as number 1, and continuing through number 10 with the left thumb being number 0. Two characters are to be used for each finger as shown in the following table:

Postmark Type	Postmark Notations	NRCC (PNC) Code
Single	Open Arch	0A
	Forward Arch	1A
Lodge	Radial stamp (A-B)	Edmonton radial lodge stamp and add PNC (200-22) number elsewhere.
	Other Lodge (A-B)	Radial lodge stamp. If lodge code is less than 10, precede the code with a zero (00-22) number elsewhere.
<b>Offsets</b>
