**Ubiquitous Mobile Information and Collaboration Systems** Luciano Baresi,Schahram Dustdar,Harald Gall,Maristella Matera,2005-03-01 Over recent years most business processes have changed in various dimensions e g exibility interconnectivity coordination style autonomy due to market conditions organizational models and usage scenarios of information systems Frequently inf mationisrelocatedwithinageographicallydistributedsystemaccordingtorulesthatare only seldom de ned as a well codi ed business process This creates the need for a so ware infrastructure that enables ubiquitous mobile and collaboration systems UMICS The anywhere anytime any means paradigm is becoming the major challenge in conceiving designing and releasing next generation information systems New te nologies like wi networks and 3rd generation

mobile phones are offering the infrastructure to conceive of information systems as ubiquitous information systems that is systems that are accessible from anywhere at any time and with any device Ubiquity is not yet another buzzword pushed by emerging technologies but is mainly a means to support new business models and encourage new ways of working This new wave of UMICS will exploit the knowledge developed and deployed for conventional information systems but will also need new concepts models methodologies and supporting technologies to fully exploit the potentials of the enabling infrastructure and to be ready for the challenge Moreover people need to move across organizational boundaries and collaborate with others within an organization as well as between organizations The ability to query the company's distributed knowledge base and to cooperate with co-workers is still a requirement but mobility brings new access scenarios and higher complexity

**The Practitioner's Guide to Antitrust in China** Becky Nao Koblitz, 2015-08-27 Management and legal counsel of foreign companies operating in China as well as those outside China with Chinese business desperately need to keep up with the fast paced antitrust developments in the most dynamic market in the world The author of this book Becky Koblitz is a seasoned antitrust lawyer for a major U S law firm in Beijing She has decades of legal experience as a prosecutor at the Antitrust Division of the U S Department of Justice as well as in house counsel for a German subsidiary of a major American real estate development company and as a lawyer at law firms globally Her rich experience in the U S Europe and China now often regarded as the three centers of global antitrust makes her the perfect candidate to write a book on China's antitrust development Her book is a quick read that tells what there is to know about China's antitrust enforcement and includes practical advice and examples for the various aspects of antitrust dealing with competitors dealing within the supply chain mergers etc She writes in a straight forward language such that non antitrust lawyers can get beyond stock phrases like illicit price coordination abuse of dominance or unilateral effect Her book is a valuable and practical cookbook for antitrust compliance training and beyond Another feature of the book is that it provides both legal and economic perspectives on antitrust analysis in China which is important given that economic analysis is increasingly adopted by China's antitrust agencies and the Chinese courts Thus understanding the logic and methodology behind economic analysis as applied to Chinese cases is key to conducting proper antitrust legal analysis that is tailored to the Chinese context To write a book on the burgeoning antitrust enforcement and practice for the constantly evolving Chinese market is a real challenge The trick and it is not as easy as you would think is to write simple declarative sentences understandable to the antitrust layman and at the same time not lose the rigor of antitrust analysis I think this relatively short book is a remarkable achievement in meeting such a challenge but I invite you to judge for yourself
