

# Service Schematics

## Introduction

# NOKIA N97

## RM-505/RM-507

### Important

This document is intended for use by authorized Nokia service centers only.

"Service Schematics" was created with focus on customer care.

The purpose of this document is to provide further technical repair information for Nokia mobile phones on Level 3/4 service activities.

It contains additional information such as e.g. "Component Finder".

The "Signal Overview" page gives a good and fast overview about the most important signals and voltages on board.

Saving process time and improving the repair quality is the aim of this document. It is to be used additionally to the service manual and other training or service information such as Service Bulletin.

### All measurements were made using the following equipment:

Nokia repair kit	• Phoenix 207411000 MB01
Oscilloscope	• FlukeScope 3000
Spectrum Analyzer	• Advantest F3262
Multimeter	• Fluke 175

While every endeavor has been made to ensure the accuracy of this document, some errors may exist. If the reader finds any errors, Nokia shall be notified in writing.

Please send E-Mail to: [TrainingandServiceDevelopment@nokia.com](mailto:TrainingandServiceDevelopment@nokia.com)

### A NEW FEATURE FOR ON-LINE USE

We have now linked those measurement points  which are related to the waveform shown on the signal overview page. As example clicking on the measurement point  guides you to the matching oscillogram on the signal overview page. The next click sets the row down signal guides you to the related measurement point on the module. Finally, a third click, now onto the measurement point  on the module takes you back to the starting point inside the schematics.
