M. Esquinas, Andrea Fabbo, Filiz Koc, Agnieszka Prymus, Małgorzata Farnik, 2023-06-12 In different sections of this book the relationships between the patterns of psychological response in acute and chronic respiratory failure as well as the epidemiology of neuropsychiatric disorders in ventilator management are collected and analyzed Main concepts such as vulnerability to stress critical illness psychological stress and susceptibility that may develop during NIV support as well as

the diagnosis of neuropsychiatric disorders in respiratory failure are also summarized. A section is devoted to the most frequent indications of NIV, also including a special use of NIV in pandemic and high risk infections as well as in several other conditions such as acute and chronic respiratory failures and neurological disorders. A summary of practical approaches for treatment and prevention in neurologic and psychiatric disorders during noninvasive mechanical ventilation as well as the perspective in terms of outcomes quality of life palliative care is also given. The book is intended for all those healthcare professionals treating patients suffering from neurological or psychiatric disorders and who develop acute or chronic respiratory failure. Neurologists, psychiatrists, pulmonary critical care professionals, geriatricians, internists, and psychologists will find in the book a valuable guide for their everyday clinical practice. *Noninvasive Mechanical Ventilation and Difficult Weaning in Critical Care* Antonio M. Esquinas, 2016-01-04. This book establishes the indications for the use of NIV in the context of weaning from invasive mechanical ventilation. It provides a comprehensive overview of key topics relevant for correct practical application, including NIV and weaning principles, important aspects of patient care before and after weaning, and pediatric and neonatology weaning. Finally, the book summarizes international guidelines and new perspectives of NIV during weaning. With contributions by international experts in the field on noninvasive mechanical ventilation, the book will serve as a valuable guide for critical care physicians, respiratory physiotherapists, and pulmonologists. Non-invasive Mechanical Ventilation in Critical Care, Anesthesiology and Palliative Care Giuseppe Servillo, Maria Vargas, 2023-10-11. This book provides an easy, modern, and practical way for physicians to approach the world of noninvasive mechanical ventilation (NIMV). Noninvasive ventilation is well established and increasingly used in routine clinical practice. However, some concepts and techniques of NIMV may be difficult to grasp for students or for healthcare professionals with less experience. The book is subdivided into 7 sections covering different aspects of clinical applications of NIMV. From modes of ventilation to the proper moment to start noninvasive ventilation, from critical care applications of NIMV pre intra and post hospitalization as well as in emergency medicine to the use outside of ICUs, its purpose is also considered in several different diseases and settings, including the experience during Covid 19 pandemic and at the end of life. The book addresses anesthesiologists, critical care, emergency care, palliative care, primary care physicians using noninvasive ventilation, and will represent an invaluable tool for a better understanding of this technique. *Teaching Pearls in Noninvasive Mechanical Ventilation* Antonio M. Esquinas, 2022-02-01. This book uses real world clinical case analyses of hot topics to provide insights into noninvasive mechanical ventilation (NIV). Written by leading international teachers and experts, it features a selection of major controversial topics in clinical practice and demonstrates how these cases can be used to teach about NIV. It then presents a discussion of the topics in various scenarios: anesthesiology, critical care, emergency, pneumology, and sleep medicine as well. The chapters allow readers to develop a case by case understanding of NIV in acute and chronic respiratory disorders and perioperative and in intensive care patients, also thanks to Electronic Supplementary Materials.
