Critical Thinking Now , Nancy Burkhalter, 2016-12-08 Today s curricula can and should incorporate critical thinking methods because they are the means by which people best understand learn and retain higher level concepts Contrary to what many professional trainers assume teaching critical thinking is not achieved by shoveling facts at an audience through lecturing or multiple choice testing It requires sustained finely tuned teaching and assessment methods This book lays out a blueprint to do just that Specifically it outlines the necessary components of a critical thinking classroom and provides assessment techniques and ample exercises adaptable to any student s field age or level of education Often not considered are those learners schooled in a non Western culture and not proficient in the presenter s language These audiences can create invisible barriers to instruction Without understanding these pitfalls trainers invite frustration and failure and risk wasting everyone s time and money because they were unaware any problem existed The book addresses these linguistic cultural and cognitive obstacles and suggests several solutions whether you teach these students on your home turf or theirs
