Thunderchief vs VPAF MiG-17 Peter E. Davies, 2019-07-25 The F 105D Thunderchief was originally designed as a low altitude nuclear strike aircraft but the outbreak of the Vietnam War led to it being used instead as the USAF's primary conventional striker against the exceptionally well defended targets in North Vietnam and Laos F 105 crews conducted long distance missions from bases in Thailand refuelling in flight several times and carrying heavy external bombloads The MiG 17 was the lightweight highly manoeuvrable defending fighter it encountered most often in 1965-68 during Operation Rolling Thunder A development of the MiG 15 which shocked UN forces during the Korean War its emphasis was on simplicity and ease of maintenance in potentially primitive conditions Fully illustrated with stunning artwork this book shows how these two aircraft totally different in design and purpose fought in a series of duels that cost both sides dearly Army, 1993

Selections from Regional Press, 2001 *F-8 Crusader vs MiG-17* Peter Mersky, 2014-11-20 Revered by Naval Aviators as the last of the gunfighters due to its quartet of Colt Browning Mk 12 20 mm cannon the F 8 Crusader enjoyed great success against VPAF MiG 17s during the Rolling Thunder campaign of 1966-68 But the MiG 17's unequalled low speed manoeuvrability small size and powerful cannon armament meant that the American forces didn't have it all their own way This fully illustrated book featuring photographs maps and battlescene artwork reveals the tactics that were developed by pilots on both sides to give themselves the edge in air to air dogfights allowing the reader to understand how the differing design and development doctrines played a part in combat *Modern Land Combat* David Miller, Christopher F.
