addresses the objectives articulated for IPY in the 2004 National Research Council report A Vision for International Polar Year NRC 2004 These objectives include suggestions for scientific communities and agencies to use the IPY to initiate a sustained effort aimed at assessing large scale environmental change and variability in the polar regions the need to explore new scientific frontiers from the molecular to the planetary scale investment in critical infrastructure and technology to guarantee that IPY 2007 2008 leaves enduring benefits for the nation and for the residents of northern regions as well as increase public understanding of the importance of polar regions in the global system Legacies and Lessons of the International Polar Year 2007 2008 explains how activities at both poles led to scientific discoveries that provided a step change in scientific understanding and helped translate scientific knowledge into policy relevant information At a time when the polar regions are undergoing a transformation from an icy wilderness to a new zone for human affairs these insights could not be more timely or more relevant From outreach activities that engaged the general public to projects that brought researchers from multiple disciplines and several nations together the legacies of IPY extend far beyond the scientific results achieved and valuable lessons learned from the process will guide future endeavors of similar magnitude Sea Level Rise Orrin H. Pilkey, Keith C. Pilkey, 2019-09-20 The consequences of twenty first century sea level rise on the United States and its nearly 90 000 miles of shoreline will be immense Miami and New Orleans will disappear many nuclear and other power plants hundreds of wastewater plants and toxic waste sites and oil production facilities will be at risk port infrastructures will need to be raised and over ten million Americans fleeing rising seas will become climate refugees In Sea Level Rise Orrin H Pilkey and Keith C Pilkey argue that the only feasible response along much of the U S shoreline is an immediate and managed retreat Among many topics they examine sea level rise s effects on coastal ecosystems health and native Alaskan coastal communities They also provide guidelines for those living on the coasts or planning on moving to or away from them as well as the steps local governments should take to prepare for this unstoppable impending catastrophe **The Cure for Catastrophe** Robert Muir-Wood, 2016-09-06 We can t stop natural disasters but we can stop them being disastrous One of the world s foremost risk experts tells us how Year after year floods wreck people s homes and livelihoods earthquakes tear communities apart and tornadoes uproot whole towns Natural disasters cause destruction and despair But does it have to be this way In The Cure for Catastrophe global risk expert Robert Muir Wood argues that our natural disasters are in fact human ones We build in the wrong places and in the wrong way putting brick buildings in earthquake country timber ones in fire zones and coastal cities in the paths of hurricanes We then blindly trust our flood walls and disaster preparations and when they fail catastrophes become even more deadly No society is immune to the twin dangers of complacency and heedless development Recognizing how disasters are manufactured gives us the power to act From the Great Lisbon Earthquake of 1755 to Hurricane Katrina The Cure for Catastrophe recounts the ingenious ways in which people have fought back against disaster Muir Wood shows the power and promise of new predictive technologies and envisions a future where

information and action come together to end the pain and destruction wrought by natural catastrophes The decisions we make now can save millions of lives in the future Buzzing with political plots newfound technologies and stories of surprising resilience The Cure for Catastrophe will revolutionize the way we conceive of catastrophes though natural disasters are inevitable the death and destruction are optional As we brace ourselves for deadlier cataclysms the cure for catastrophe is in our hands
