Bloomsbury Handbook of Religious Ecstasy Alison Marshall, Rubina Ramji, Michael Wilkinson, 2025-03-20 Why do people seek a connection to something beyond the social dimensions of the world? Ecstatic experiences are often labelled religious, spiritual, mystical or even sacred. However, ecstasy is not just extraordinary for many people throughout the world; it is an ordinary part of daily life. The Handbook highlights the diverse individuals who have experienced ecstasy in the past and present, from ordinary people to mystics, pastors, healers, spirit mediums and urban neo-therapeutic shamans. Chapters show that ecstasy may be experienced during trance, possession, prayer and even through the use of drugs such as soma, peyote, ayahuasca, ibogaine, mushrooms, LSD and other substances. While institutional expressions of religion may be on the decline, experiences of religious ecstasy and interactions among living people and gods, saints, angels and demons individually and collectively are happening everywhere, occurring at home, online, in the community and through prayer, dance, song, possession and the ingestion of drugs. Ecstatic religious experience, as this handbook shows, provides meaning, belonging and for some profit in the late capitalist marketplace.

Psychedelic Humanities Erika Dyck, Tehseen Noorani, Nicolas Langlitz, Alex Dymock, Anne Katrin Schlag, Oliver Davis, 2024-06-19 Psychedelics are part of a resurgence of interest in consciousness studies, especially as altered states of consciousness are being re-examined in the context of psychedelic-assisted therapies. To date, discussions about psychedelics in modern medicine have been dominated by studies in biomedicine. However, given that cultural factors play a significant role in the subjective effects of psychedelics, psychedelics can be considered a uniquely powerful point of convergence between the cultural and biomedical. Writers and artists alongside psychiatrists and pharmacologists have participated in shaping the psychedelic experience by drawing on a rich set of approaches that blend narrative arts and humanities concepts to explain and interpret psychedelic experiences and explore consciousness for creative purposes. Psychedelic studies past and present emphasize the importance of set and setting or the context of psychedelic consumption and its paramount importance in shaping psychedelic experiences. These non-pharmacological factors rely on a different set of methods and interpretations that necessarily rely on studies conducted outside of the biomedical sciences.
