**NWEA FAQ** Northwest Evaluation Association, 2015 Northwest Evaluation Association NWEA conducts norming studies every several years to provide the best and most up to date information we can about student achievement and growth to better support educational decision making It is an important part of our commitment to our partners The most recent NWEA norms were released in July 2015 Just as we expect student performance to change with time norms of student performance will change correspondingly For 2015 several factors may have influenced how the US school age population performed on Measures of Academic Progress MAP assessments of language usage mathematics and reading over the 2011 12 2012 13 and 2013 14 school years Prominent among these possible factors are the introduction of Common Core instruction and Common Core versions of MAP But as with all empirical studies changes in scope and data necessitated changes in statistical design and analyses The methodological improvements introduced in the 2015 norms have resulted in a set of norms that are more representative of the US school age population than previous NWEA norms Methodological changes involved differences in the way post stratification weights were developed and the way growth was modeled Details of these changes are addressed more thoroughly in the 2015 Norms Study As a result of the improved methodology partners can expect some differences from previous norms as explained below

**2015 NWEA Measures of Academic Progress Normative Data** Northwest Evaluation Association, 2015 By using carefully constructed measurement scales that span grades Measures of Academic Progress MAP interim assessments from Northwest Evaluation Association NWEA offer educators efficient and very accurate estimates of student achievement status within a subject Before achievement test scores can be useful to educators however they need to be evaluated within a context The RIT Scale is a curriculum scale that uses individual item difficulty values to estimate student achievement An advantage of the RIT scale is that it can relate the numbers on the scale directly to the difficulty of items on the tests In addition the RIT scale is an equal interval scale Equal interval means that the difference between scores is the same regardless of whether a student is at the top bottom or middle of the RIT scale and it has the same meaning regardless of grade level To that end 2015 RIT Scale Norms allow educators to compare achievement status and changes in achievement status growth between test occasions to students performance in the same grade at a comparable stage of the school year This contextualizing of student performance 1 helps teachers as they plan instruction for individual students or confer with parents 2 supports school and district administrators as they focus on allocating resources and 3 empowers school staff as they work to improve all educational outcomes The 2015 NWEA RIT Scale Norms Study provides status and growth norms for individual students as well as for schools on each of the four RIT scales Reading Language Usage Mathematics and General Science The study's results are based on K 11 grade level samples Each sample is comprised of 72 000 to 153 000 student test records from approximately 1000 schools These numbers vary by subject These samples were drawn randomly from test record pools of up to 10 2 million students attending more than 23 500 public

schools spread across 6 000 districts in 49 states Rigorous procedures were used to ensure that the norms were representative of the U S school age population Since MAP assessments can be administered on a schedule designed to meet a school s needs tests can be administered at any time during the school year The 2015 norms adjust for this scheduling flexibility by accounting for instructional days allowing more valid comparisons for status and growth

**Beyond Gifted Education** Scott J. Peters,Michael S. Matthews,Matthew T. McBee,D. Betsy McCoach,2021-09-03 Seeking a more comprehensive vision for gifted education this book offers a modern vision of programs and services for gifted and talented students Beyond Gifted Education Designing and Implementing Advanced Academic Programs provides the first comprehensive look at designing and implementing advanced academic student programs Written by four leading experts in the field Beyond Gifted Education reviews the current range of traditional gifted education practices and policies Then the book offers the concerned gifted program coordinator or school administrator a more expansive approach to educating gifted learners The authors lead readers through the process of identifying needs responding with programming and then finding students who are well suited for and would benefit from advanced academic programming Detailed examples walk the reader through real world scenarios and programs common to the gifted coordinator on topics such as cluster grouping acceleration and increasing diversity Throughout the book connections are made to Common Core State Standards Response to Intervention and a wealth of outside research in order to support ideas

Curriculum Alignment David A. *Value Added Modeling and Growth Modeling with Particular Application to Teacher and School Effectiveness* Robert W. Lissitz, Hong Jiao, 2014-12-01

Modeling student growth has been a federal policy requirement under No Child Left Behind NCLB In addition to tracking student growth the latest Race To The Top RTTP federal education policy stipulates the evaluation of teacher effectiveness from the perspective of added value that teachers contribute to student learning and growth Student growth modeling and teacher value added modeling are complex The complexity stems in part from issues due to non random assignment of students into classes and schools measurement error in students achievement scores that are utilized to evaluate the added value of teachers multidimensionality of the measured construct across multiple grades and the inclusion of covariates National experts at the Twelfth Annual Maryland Assessment Research Center's Conference on Value Added Modeling and Growth Modeling with Particular Application to Teacher and School Effectiveness present the latest developments and methods to tackle these issues This book includes chapters based on these conference presentations Further the book provides some answers to questions such as what makes a good growth model What criteria should be used in evaluating growth models How should outputs from growth models be utilized How auxiliary teacher information could be utilized to improve value added How multiple sources of student information could be accumulated to estimate teacher effectiveness Whether student level and school level covariates should be included And what are the impacts of the potential heterogeneity of teacher effects across students of different aptitudes or other differing characteristics on growth modeling and teacher evaluation Overall this book addresses reliability and validity issues in growth modeling and value added modeling and presents the latest development in this area In addition some persistent issues have been approached from a new perspective This edited volume provides a very good source of information related to the current explorations in student growth and teacher effectiveness evaluation

**Mismeasuring Schools' Vital Signs** Steve Rees, Jill Wynns, 2022-09-29 This book helps school and district leaders avoid the pitfalls that await those making sense of their school's data Whether you're interpreting

achievement gaps graduation rates or test results you're at risk of reaching a mistaken judgment. By learning about common errors and how they're made you'll be ready to choose safer, surer paths to making better sense of the wealth of data in your school or district. The authors help educators build better evidence, see conclusions more clearly and explain the data more persuasively. Special features include questions to spark discussion in each chapter encourage school site district leaders and board trustees to apply each chapter's content to their own situations. Data visualizations together with the authors' interpretations will help you learn how to do visual analysis and reach the right conclusions. Practical tips provide clear guidance. Supplemental resources can be found at the book's website [k12measures.com](http://k12measures.com) including interactive data visualizations and analytic exercises to help you learn a concept by doing.

**Expeditionary Learning Schools** Thomas Van Winkle, 2008

**The Principal as a Learning-Leader** M. Scott Norton, Larry K. Kelly, 2012-12-03

Expanding a principal's formal education and training. The Principal as Learning Leader is an administrator's guide to improving student achievement showing practitioners how to focus on the individual academic performance of each and every student and to work with the school staff and community to develop a learning culture that supports student success. Norton and Kelly show current principals how to assess their present behaviors relative to learning leadership. Providing a clear definition of learning leadership and identifying successful practices most commonly implemented by true learning leaders, this book features the administrative tools and accountability strategies that will allow principals to create a culture of learning leadership among all school personnel which is key to engaging students and the community in the learning process.

*North Carolina Linking Study* Northwest Evaluation Association, 2014

Recently the Northwest Evaluation Association (NWEA) completed a study to connect the scale of the North Carolina State End of Grade (EOG) Testing Program used for North Carolina's mathematics and reading assessments with NWEA's Rausch Interval Unit (RIT) scale. Information from the state assessments was used in a study to establish performance level scores on the RIT scale that would indicate a good chance of success on these tests. To perform the analysis we linked together state test and NWEA test results for a sample of 18,730 North Carolina students who completed both exams in the spring of 2013, the term in which the EOG is administered. For the spring season, labeled current season, an Equipercentile method was used to estimate the RIT score equivalent to each state performance level. For fall, labeled prior season, we determined the percentage of the population within the selected study group that performed at each level on the state test and found the equivalent percentile ranges within the NWEA dataset to estimate the cut scores. For example, if 40% of the study group population in grade 3 mathematics performed below the proficient level on the state test, we would find the RIT score that would be equivalent to the 40th percentile for the study population; this would not be the same as the 40th percentile in the NWEA norms. This RIT score would be the estimated point on the NWEA RIT scale that would be equivalent to the minimum score for proficiency on the state test. Documentation about this method can be found on our website. Table Sets 1 and 2 show the best estimate of the minimum RIT equivalent to each state performance level for

same season spring and prior season fall RIT scores These tables can be used to identify students who may need additional help to perform well on these tests Table Sets 3 and 4 show the estimated probability of a student receiving a proficient score on the state assessment based on that student's RIT score These tables can be used to assist in identifying students who are not likely to pass these assessments thereby increasing the probability that intervention strategies will be planned and implemented These tables can also be useful for identifying target RIT score objectives likely to correspond to successful or proficient performance on the state test Table 5 shows the correlation coefficients between Measured Academic Performance MAP and the state test in each grade These statistics show the degree to which MAP and the state test are linearly related with values at or near 1.0 suggesting a perfect linear relationship and values near 0.0 indicating no linear relationship Table 6 shows the percentages of students at each grade and within each subject whose status on the state test i.e. whether or not the student met standards was accurately predicted by their MAP performance and using the estimated cut scores within the current study This table can be used to understand the predictive validity of MAP with respect to the EOG

**How RTI Works in Secondary Schools** Holly Windram, Kerry Bollman, 2011-11-25 Focusing on the unique response to intervention challenges faced by those working in a secondary school including larger student and educator populations curriculum specializations a growing achievement gap and more the authors outline three imperative components of a successful RTI program and then provide action steps and examples illustrating how each component should surface within the different RTI tiers Motivate! Inspire! Lead! RoseAnne O'Brien Vojtek, Robert J. Vojtek, 2009-05-05 Incorporating motivational theory and the authors' administrative experience this resource presents 10 strategies for developing a collegial learning community through positive interdependence reciprocal relationships and mutual responsibility Supporting and Accommodating Students with Special Health Care Needs Azure D. S. Angelov, Mary Jo Rattermann, 2023-12-06 Schools are increasingly responding to the impact and prevalence of special health care needs among children and youth COVID 19 brought the health needs of many students to the forefront Now more than ever it is crucial to for educators to plan for working with students with health needs Many of these students with health needs are eligible for special education and related services and will need programming appropriate to address their unique needs Further school teams and special education personnel must continually ensure that goals and services within an IEP consider the student's individual circumstances and impact on functioning This book will provide strategies for supporting students with health care needs throughout their education including referral family engagement report writing IEP design and implementation Fortunately school teams can apply many components of a health care needs approach to developing IEPs regardless of the concern or the existence of a medical history This book provides guidance to educators to assist in the development of legally defensible IEPs for all students particularly those with a known or suspected history of health care needs Specifically the book will help

Provide a clear description of the impact of adversity and health care needs on student functioning particularly for students with disabilities Describe how symptoms of health care needs map onto existing disability categories within IDEA Apply a supportive approach to family engagement assessment and report writing Take a different approach to PLAAFPs Establish goals that are legally defensible and are written in light of the child's circumstances viewing behavioral concerns as a skill deficit rather than purely a performance deficit Beyond the objectives described above the information is particularly valuable given ongoing state and local legislation mandating schools become more aware of students with health care needs and apply those approaches to all aspects of our work in schools e.g. interactions discipline interventions Despite the significant increase in recognizing the impact of students with health care needs few books have operationalized that to the various components of service delivery This book is the first of its kind in operationalizing a health care informed approach to IEP development
