

Problem 1:

Jungkook wants to measure the height of a tree. He walks exactly 100 feet from the base of the tree and looks up. The angle from the ground to the highest point of the tree is 35° . This particular tree grows at an angle of 85° with respect to the ground rather than vertically (90°). How long is the tree?

Processing Julio Sanchez, 2018-12-19 Space Image Processing covers the design and coding of PC software for processing and manipulating imagery obtained by satellites and other spacecraft. Although the contents relate to several scientific and technological fields, it serves as a programming book providing readers with essential technical information for developing PC applications. The material focuses on images of the planet and other celestial bodies obtained by orbiting and non-orbiting spacecraft. This book is not about raster graphics in general but about raster graphics processing as it applies to space imagery. Three parts divide the text: 1 Science background at an introductory level, scientific principles underlying space imagery and its processing; topics related to space and remote sensing; 2 Technology topics related to space imagery, geodesy, cartography, image data formats, image processing; 3 Programming code examples for DOS and Windows programming on the PC, consideration of low-level and C code routines with a tutorial and demonstrative purpose.
