Sustainable Finance and Insurance in Africa Athenia Bongani Sibindi,2025-04-21 This book explains the concerted efforts being implemented to promote environmentally and socially responsible practices within Africa s finance and insurance sectors Sustainable development has emerged as a crucial policy area and an ongoing research challenge gaining the attention of governments and scholars worldwide since the adoption of the Sustainable Development Goals SDGs by the United Nations in 2015 In this context sustainable finance and insurance initiatives have gained prominence aiming to address social environmental and governance ESG issues that impact sustainability within the finance and insurance sectors While there is growing global recognition of sustainable finance and insurance as fundamental drivers of sustained economic growth social development and environmental protection Africa faces obstacles in embracing these practices The continent lags behind in adopting sustainable finance and insurance approaches hindering its progress towards sustainable development goals The integration of sustainability considerations into financial and insurance practices is essential to foster responsible investment long term resilience and effective risk management However compared to some developed economies there is a dearth of empirical theoretical and practical insights on sustainable finance and insurance specific to Africa Nevertheless Africa grapples with unique sustainable development challenges that demand urgent attention Thus this book aims to provide a comprehensive compilation of research and insights on sustainable finance and insurance initiatives in Africa By gathering a wide range of studies the book sheds light on the progress challenges and potential strategies for fostering sustainable finance and insurance practices in Africa Through rigorous analysis and case studies the book aims to contribute valuable knowledge and recommendations for policymakers practitioners and researchers interested in advancing sustainable development in the region The book aims to inspire and catalyze transformative change ultimately leading to more inclusive and sustainable financial systems that benefit both society and the environment *Telemedicine in Low-Resource Settings* Richard Wootton,2015-04-24 Telemedicine networks to support healthcare workers in resource limited settings often for humanitarian purposes have evolved over the last decade or so in a largely autonomous way Communication between them has been informal and relatively limited in scope This situation could be improved by developing a comprehensive approach to the collection and dissemination of information A recent review identified seven telemedicine networks each of which had been in operation for at least five years and which provided store and forward

telemedicine services to doctors in low and middle income countries These networks provide clinically useful services and improved healthcare access However like much of telemedicine the formal evidence for their cost effectiveness remains weak Topics of current research interest therefore include the cost effectiveness of telemedicine in resource limited settings Outcomes data and methods for gathering it such as patient quality of life following a telemedicine episode the knowledge gain of healthcare staff involved in telemedicine and staff recruitment and retention in rural areas are also of interest Finally there is little published information about the performance of these telemedicine networks and methods for measuring it about how best to manage them and about how to share resources between them A collection of articles reporting the current evidence supporting the use of telemedicine in resource limited settings would build the evidence base and should provide a focus for future research It would also serve to raise the profile of this potentially important research field **The**

Rural Wage Employment in Developing Countries Carlos Oya,Nicola Pontara,2015-05-22 There is a striking scarcity of work conducted on rural labour markets in the developing world particularly in Africa This book aims to fill this gap by bringing together a group of contributors who boast substantial field experience researching rural wage employment in various developing countries It provides critical perspectives on mainstream approaches to rural agrarian development and analysis of agrarian change and rural transformations from a long term perspective This book challenges the notion that rural areas in low and middle income countries are dominated by self employment It purports that this conventional view is largely due to the application of conceptual frameworks and statistical conventions that are ill equipped to capture labour market participation The contributions in this book offer a variety of methodological lessons for the study of rural labour markets focusing in particular on the use of mixed methods in micro level field research and more emphasis on capturing occupation multiplicity The emphasis on context history and specific configurations of power relations affecting rural labour market outcomes are key and reoccurring features of this book This analysis will help readers think about policy options to improve the quantity and quality of rural wage employment their impact on the poorest rural people and their political feasibility in each context
