Nursing Children And Young People With Adhd:

Nursing Children and Young People with ADHD Noreen Ryan, Tim McDougall, 2009-01-21 ADHD is one of the most commonly diagnosed behavioural disorders in children and young people. It is a complex and contested condition with potential causes and treatments in biological, psychological and social domains. This is the first comprehensive text for nurses and other health professionals in this field. *Nursing Children and Young People with ADHD* explores the evidence incorporating and expanding on the new NICE guidelines for practice in this area to provide an essential knowledge base for practice. The text covers causes, diagnosis, comorbidity, user and carer perspectives, assessment, treatment and interventions including those suitable for use in schools, prescribing and the legal background. An invaluable text for pre-registration student nurses on mental health and children branches, this will also be a useful reference work for post-registration nurses and health professionals seeking evidence-based recommendations for practice.

Essentials of Nursing Children and Young People Jayne Price, Orla McAlinden, Zoë Veal, 2023-12-15 This book is a one-stop shop for the vast majority of children and young people's nursing students. The editors for the new edition are Jayne Price from Kingston University, Orla McAlinden previously from Queen's University Belfast and Zoë Veal from UWE Bristol, all with vast experience in nursing children and young people. A high level of research has gone into developing and refining the key features for this edition, such as updated voices and implementing new NMC standards. This book maps to the content of the majority of pre-registration child nursing programmes and, by adopting a 5-part structure, it clearly covers the core parts of training and practice that you will need: Part 1 Principles of nursing children and young people; Part 2 Wellbeing and development; Part 3 Caring for children and young people with acute health care needs and injury; Part 4 Caring for children and young people with complex and high dependency needs; Part 5 Being a professional children and young people's nurse.

Ethical and Philosophical Aspects of Nursing Children and Young People Gosia M. Brykczynska, Joan Simons, 2011-01-19 Nurses and healthcare professionals are constantly faced with ethical and philosophical dilemmas when working with children in everyday practice. *Ethical and Philosophical Aspects of Nursing Children and Young People* is a comprehensive text on the ethics and philosophy behind paediatric nursing that reflects the contemporary issues encountered while working with children and young people. The title provides a philosophical and historical analysis of the subject, looking at a review of sociological and political theories concerning the nature of childhood and providing a critical analysis of contemporary notions about childhood. It then goes on to look at moral theories and their application to paediatric nursing practice, ethical issues when caring for children of all ages from infancy to adolescence. It considers issues of disabled children, confidentiality, mental health issues, children's rights and pain management. With case studies and activities throughout, this book will enable students and newly qualified nurses both to understand philosophical concepts and issues but also to articulate their own reflections and observations on these subjects.
