

Personality psychology is the study of this phenomenon and has three main focuses: developing a complete analysis of a subject and his or her key psychological processes, investigating individual differences, and investigating human nature. There exists a wide array of theoretical explanations as to how and why different types of personalities develop, including humoral theories, morphological theories, psychoanalytic theories, trait theories, and more.

Socialization

Socialization is yet another term you will likely see on the CLEP Social Sciences and History test. Socialization refers to the process by which an individual person is integrated into a group or society and learns to behave in the manner subscribed to by that group or society. The process of socialization is studied extensively in psychology and other social sciences. This process is influenced by three key factors:

1. **Culture:** The behavior pattern shared between individuals within a society; passed from generation to generation through language, religion, philosophy, and the arts and sciences
2. **Subculture:** Refers to a distinct group within a larger culture; often characterized by social class, social role, or ethnic identity; within these groups, certain behaviors not common to the larger society are retained as a result of the differences between the members of the subculture and the general members of the culture-at-large *different from norms somewhat*
3. **Social Dyad:** A simple personal interaction between two people in which a reciprocal learning process occurs; the primary example of a social dyad is the relationship shared between a parent and child

duo of mutual learning.

SOCIOLOGY

Along with psychology, the CLEP Social Sciences and History test will also include questions on sociology, which is the systematic study of societies, social institutions, and social relationships. Much like their counterparts in psychology, sociologists study groups, their development and structure, and the function of human social behavior within. The goal of a sociologist is to build a mass of interrelated sociological knowledge that can be used to generalize, explain, or even predict patterns of behavior.

The following is a brief overview of some of the key sociology topics on which exam questions on the CLEP Social Sciences and History test are based. Keep in mind that this overview is only intended as a brief guide to the subject matter you will need to study further on your own.

Demography

One particular branch of sociology often featured on the CLEP Social Sciences and History test is demography. Demography is the study of human population. A typical demographic study examines the size, structure, and distribution of a given population and the changes that occur within it as a result of natural phenomena such as birth, aging, death, and migration. Such studies may be focused on a whole society or on subcultures that are defined by particular characteristics such as nationality/ethnicity, religious beliefs, educational background, or economic class.
