Poetics of Liveliness Ada Smailbegović, 2021-10-29 Can poetry act as an aesthetic amplification device akin to a microscope through which we can sense minute or nearly imperceptible phenomena such as the folding of molecules into their three dimensional shapes the transformations that make up the life cycle of a silkworm or the vaporous movements that constitute the ever shifting edges of clouds We tend to think of these subjects as reserved for science but as Ada Smailbegović argues twentieth and twenty first century writers have intermingled scientific methodologies with poetic form to reveal unfolding processes of change Their works can be envisioned as laboratories within which the methodologies of experimentation natural historical description and taxonomic classification allow poetic language to register the rhythms and durations of material transformation Poetics of Liveliness moves across scales to explore the realms of molecules fibers tissues and clouds It investigates works such as Christian B. k. s insertion of a

poetic text into the DNA code of living bacteria in order to generate a new poem in the shape of a protein molecule Jen Bervin's considerations of silk fibers and their use in biomedicine Gertrude Stein's examination of brain tissues in medical school and its subsequent influence on her literary taxonomies of character and Lisa Robertson's studies of nineteenth century meteorology and the soft architecture of clouds In their attempt to understand physical processes unfolding within lively material worlds Smailbegovi contends these poets have developed a distinctive materialist poetics Structured as a poetic cosmology akin to Lucretius's *On the Nature of Things* which begins at the atomic level and expands out to the vastness of the universe *Poetics of Liveliness* provides an innovative and surprising vision of the relationship between science and poetry

Attention Equals Life Andrew Epstein, 2016 Poetry has long been thought of as a genre devoted to grand subjects timeless themes and sublime beauty Why then have contemporary poets turned with such intensity to documenting and capturing the everyday and mundane Drawing on insights about the nature of everyday life from philosophy history and critical theory Andrew Epstein traces the modern history of this preoccupation and considers why it is so much with us today *Attention Equals Life* argues that a potent hunger for everyday life explodes in the post 1945 period as a reaction to the rapid unsettling transformations of this epoch which have resulted in a culture of perilous distraction Epstein demonstrates that poetry is an important and perhaps unlikely cultural form that has mounted a response and even a mode of resistance to a culture suffering from an acute crisis of attention In this timely and engaging study Epstein examines why a compulsion to represent the everyday becomes predominant in the decades after modernism and why it has so often sparked genre bending formal experimentation With chapters devoted to illuminating readings of a diverse group of writers including poets associated with influential movements like the New York School language poetry and conceptual writing the book considers the variety of forms contemporary poetry of everyday life has taken and analyzes how gender race and political forces all profoundly inflect the experience and the representation of the quotidian By exploring the rise of experimental realism as a poetic mode and the turn to rule governed everyday life projects *Attention Equals Life* offers a new way of understanding a vital strain at the heart of twentieth and twenty first century literature It not only charts the evolution of a significant concept in cultural theory and poetry but also reminds readers that the quest to pay attention to the everyday within today's frenetic world of and social media is an urgent and unending task

Rites of Way Mark Kingwell,Patrick Turmel,2011-04-07 There are many ways to approach the subject of public space the threats posed to it by surveillance and visual pollution the joys it offers of stimulation and excitement of anonymity and transformation its importance to urban variety or democratic politics But public space remains an evanescent and multidimensional concept that too often escapes scrutiny The essays in *Rites of Way The Politics and Poetics of Public Space* open up multiple dimensions of the concept from architectural political philosophical and technological points of view There is some historical analysis here but the contributors are more focused on the future of public space under conditions of growing urbanization and democratic confusion The added interest offered by non academic work visual art fiction poetry

and drama is in part an admission that this is a topic too important to be left only to theorists. It also makes an implicit argument for the crucial role that art not just public art plays in a thriving public realm. Throughout this work contributors are guided by the conviction not pious but steely that healthy public space is one of the best living parts of a just society. The paths of desire we follow in public trace and speak our convictions and needs our interests and foibles. They are the vectors and walkways of the social, the public dimension of life lying at the heart of all politics.

The Oxford Handbook of Ecocriticism Greg Garrard, 2014-07-03 The Oxford Handbook of Ecocriticism provides a broad survey of the longstanding relationship between literature and the environment. The moment for such an offering is opportune in many respects: multiple environmental crises are increasingly inescapable at both transnational and local levels; the role of the humanities in addition to technology and politics is increasingly recognized as central for exploring and finding solutions; and the subject of ecocriticism has reached a kind of critical mass both within its Anglo-American heartlands and beyond. From its origins in the study of American Nature Writing and British Romanticism, ecocriticism has developed along numerous theoretical, historical, cultural, and geographical axes, the most contemporary and exciting of which will be represented in the Handbook. The contributors include eminent founders of the field including Michael Branch and Richard Kerridge; a number of key second-wave ecocritics; and the best up-and-coming scholars. Topics covered include Renaissance anxieties about nature; the challenges of representing climate change; the racialization of the environment in the early 20th century; language and the concept of biosemiotics; and the possibilities for environmental humour.

Fieldworks Lytle Shaw, 2013-01-22 Fieldworks offers a historical account of the social, rhetorical, and material attempts to ground art and poetry in the physicality of a site. Arguing that place-oriented inquiries allowed poets and artists to develop new experimental models of historiography and ethnography, Lytle Shaw draws out the shifting terms of this practice from World War II to the present through a series of illuminating case studies. Beginning with the alternate national genealogies unearthed by William Carlos Williams in Paterson and Charles Olson in Gloucester, Shaw demonstrates how subsequent poets sought to ground such inquiries in concrete social formations to in effect live the poetics of place. Gary Snyder in his back-to-the-land familial compound, Kitkitdizze; Amiri Baraka in a black nationalist community in Newark; Robert Creeley and the poets of Bolinas, California in the capacious now of their poet-run town. Turning to the work of Robert

Smithson who called one of his essays an appendix to Paterson and who in turn has exerted a major influence on poets since the 1970s Shaw then traces the emergence of site specific art in relation both to the poetics of place and to the larger linguistic turn in the humanities considering poets including Clark Coolidge Bernadette Mayer and Lisa Robertson By putting the poetics of place into dialog with site specificity in art Shaw demonstrates how poets and artists became experimental explicators not just of concrete locations and their histories but of the discourses used to interpret sites more broadly It is this dual sense of fieldwork that organizes Shaw s groundbreaking history of site specific poetry *On the Outskirts of Form* Michael Davidson,2012-01-01 This new book by eminent scholar Michael Davidson gathers his essays concerning formally innovative poetry from modernists such as Mina Loy George Oppen and Wallace Stevens to current practitioners such as Cristina Rivera Garza Heriberto Y pez Lisa Robertson and Mark Nowak The book considers poems that challenge traditional poetic forms and in doing so trouble normative boundaries of sexuality subjectivity gender and citizenship At the heart of each essay is a concern with the politics of form the ways that poetry has been enlisted in the constitution and critique of community Davidson speculates on the importance of developing cultural poetics as an antidote to the personalist and expressivist treatment of postwar poetry A comprehensive and versatile collection *On the Outskirts of Form* places modern and contemporary poetics in a cultural context to reconsider the role of cultural studies and globalization in poetry **The Constellational Novel** Louis Klee,2025-08-05 A constellational novel is a novel that has an associative essayistic digressive and densely patterned prose form The Constellational Novel aims to shed light on the field of contemporary literature by offering a definitive theory of the constellational novel These novels are recognizable by the presence of a first person narrator committed to drawing affinities and making connections among disparate things Beginning with Marcel Proust Klee s argument focuses on novels published over roughly the last two decades between 2001 and 2020 by writers such as W G Sebald Lisa Robertson Teju Cole Jacqueline Rose and Olga Tokarczuk Strikingly it is often assumed that the attunement of their narrators to an unfolding web of potential interconnections holds an ethical promise of new ways of relating to oneself others and the world Klee considers this implication of ethics and associative form to be peculiar and in some important respects unprecedented in the history of the novel How is recognizing connections between things ethical exactly Could it not simply be the working of a resourceful or possibly even deranged intelligence one that obsessively sees patterns everywhere Why should the value of literature hinge on such an idiosyncratic process And what does finding affinities have to do with the more familiar categories of novelistic form like character and narrative Taking inspiration from the work of Walter Benjamin this book analyzes the distinctive ethics of affinity offered by these novels and thus seeks to clarify one of the most intriguing and consequential developments in the contemporary novel **Where We Live Now** Matthew Stadler,2008 The point of departure for this collection is a translation of excerpts from *Zwischenstadt* by Thomas Sieverts Sentient Subjects Gerda Roelvink,Magdalena Zolkos,2020-12-27 Non cognitive expressions of the life of the subject

feeling motion tactility instinct automatism and sentience have transformed how scholars understand subjectivity agency and identity This collection investigates the critical purchase of the idiom of affect in this post humanist thinking of the subject It also explores political and ethical questions raised by the deployment of affect as a theoretical and artistic category Together the contributors to this collection map the theoretically heterogeneous field of post humanist scholarship on affect making inspiring and at times surprising connections between Spinoza s and Tomkins s theories of affect the concept of affect and psychoanalysis and affect and animal studies in art and literature As a result the concepts vocabulary compatibility and attribution of affect are challenged and extended The chapters in this book were originally published as a special issue of *Angelaki*
