workings of the mermaid realm offering insight into their innermost thoughts states of being and how they live Presenting a user's manual for incarnated merpeople the author shares the message of the mermaids to help unite the mermaid and human worlds and protect our oceans as well as to help us develop emotionally evolve spiritually and ascend to higher vibrational dimensions Intergenerational Equity, 2019-03-19 In *Intergenerational Equity Environmental and Cultural Concerns* the editors have produced an important broad based volume on intergenerational equity The authors explore the principle of intergenerational equity in many dimensions from the theoretical to the practical While the primary focus is on intergenerational equity in the context of environmental resources and cultural heritage the principle is also addressed in a broad array of other contexts The final section of the volume considers intergenerational justice as it applies to indigenous peoples genocide migration sovereign wealth funds and foreign investment The chapters also provide a critical analysis of the issues and a consideration of the difficulties in implementing intergenerational equity *The Mitigation of Marine Plastic Pollution in International Law* Judith Schläli, 2022-04-19 The open access publication of this book has been published with the support of the Swiss National Science Foundation The massive accumulation of plastics in marine environments is one of the most pressing environmental concerns of our time This book examines the relevant international legal framework applying to land based sources of plastic pollution Against the backdrop of the dynamics of recent policy formulation in this field it outlines the main developments and provides a snapshot inventory of state obligations related to plastic pollution mitigation *The Mitigation of Marine Plastic Pollution in International Law* identifies the main barriers and opportunities and points out the possible building blocks of an enhanced regime **Ocean Country** Liz Cunningham, 2015-09-08 *Ocean Country* is an adventure story a call to action and a poetic meditation on the state of the seas But most importantly it is the story of finding true hope in the midst of one of the greatest crises to face humankind the rapidly degrading state of our environment After a near drowning accident in which she was temporarily paralyzed Liz Cunningham crisscrosses the globe in an effort to understand the threats to our dazzling but endangered oceans This intimate account charts her thrilling journey through unexpected encounters with conservationists fishermen sea nomads and scientists in the Mediterranean Sulawesi the Turks and Caicos Islands and Papua New Guinea These Seas Count! Alison Formento, 2013-03-01 Mr Tate's class helps clean up a local beach and listens to the sea as it tells them about all the wildlife that make it their home One whale two giant sea turtles three marlins and more Of course the class discovers that this sea counts *These Seas Count* explores the environmental impact and importance of the seas and how crucial it is to keep them healthy Alison Formento's gentle story and Sarah Snow's amazing collages combine for a powerful message about the environment and what we can do to preserve our oceans The Third Plate Dan Barber, 2015-04-07 Not since Michael Pollan has such a powerful storyteller emerged to reform American food The Washington Post Today's optimistic farm to table food culture has a dark secret the local food movement has failed to change how we eat It has also offered a false promise for the future of food In his visionary

New York Times bestselling book chef Dan Barber recently showcased on Netflix's *Chef's Table* offers a radical new way of thinking about food that will heal the land and taste good too. Looking to the detrimental cooking of our past and the misguided dining of our present, Barber points to a future third plate, a new form of American eating where good farming and good food intersect. Barber's *The Third Plate* charts a bright path forward for eaters and chefs alike, daring everyone to imagine a future for our national cuisine that is as sustainable as it is delicious.

*The Prospects of Common Concern of Humankind in International Law* Thomas Cottier, Zaker Ahmad, 2021-05-13. The Common Concern of Humankind today is central to efforts to bring about enhanced international cooperation in fields including but not limited to climate change. This book explores the expression's potential as a future legal principle. It sets out the origins of Common Concern, its differences to other common interest legal principles, and expounds the potential normative structure and effects of the principle applying an approach of carrots and sticks in realizing goals defined as a Common Concern. Individual chapters test the principle in different legal fields including climate technology, diffusion, marine plastic pollution, human rights enforcement, economic inequality, migration, and monetary and financial stability. They confirm that basic obligations under the principle of Common Concern of Humankind comprise not only that of international cooperation and duties to negotiate but also of unilateral duties to act to enhance the potential of public international law to produce appropriate public goods.

*Environmental Damage Caused by Marine Litter* Ho Jeong Dan, 2024-12-09. This book provides a timely analysis of the limitations of existing international legal frameworks for solving the problem of marine litter. Ho Jeong Dan expertly examines international law principles related to allocating responsibility for marine litter and proposes a plan to combat the issue effectively.

*Insult to Our Planet & The Florida Keys* Jerrold J. Weinstock, 2017-12-29. Explore the Wonders, Face the Reality. The medical definition of INSULT is to cause some kind of physical or mental injury. Through the eyes of this psychiatrist and his raw existential passion for the planet, a web of insult is untangled to expose environmental degradation we face today and its impact on the human spirit. For over fifty years, Dr. Weinstock has lived in the Florida Keys, fishing the Atlantic and the Gulf waters off of Key West. A prize-winning angler, he shares exciting stories of the past in this sport fishing mecca. You'll feel the humidity as he fights the Permit on Boca Chica beach, hear the screeching of the terns while bonefishing on Marvin Key. Through twist and turns and stories of the mind, the author demonstrates the healing power of nature. Hundreds of colorful photos display the glorious diversity of fish and natural beauty from Key West to Alaska, exploring the uplifting and the dismal view. At the helm are many years of research that uncover abuses of nature in the Florida Keys as a metaphor for global environmental tragedies.

**Living with the Sea** Mike Brown, Kimberley Peters, 2018-10-03. The seas and oceans are currently taking centre stage in academic study and public consciousness. From the plastics littering our seas to the role of climate change on ocean currents, from unequal access of marine resources to the treacherous experiences of seafarers who keep our global economy afloat, now is a crucial time to examine how we live with the sea. This ambitious book brings

together an interdisciplinary and international cohort of contributors from within and beyond academia It offers a range and diversity of insights unlike previous collections An oceanic turn is taking place with a burgeoning of academic work that takes seriously the place of seas and oceans in understanding socio cultural and political life past and present Yet there is a significant gap concerning the ways in which we engage with seas and oceans with a will to enliven action and evoke change This book explores these challenges offering insights from spatial planning architectural design geography educational studies anthropology and cultural studies An examination through these lenses can help us to better understand human relationships with the seas and oceans and promote an ethic of care for the future

*Spineless* Juli Berwald, 2017-11-07 A book full of wonders Helen Macdonald author of *H Is for Hawk* Witty insightful The story of jellyfish is a significant part of the environmental story Berwald's engaging account of these delicate often ignored creatures shows how much they matter to our oceans future New York Times Book Review Jellyfish have been swimming in our oceans for well over half a billion years longer than any other animal that lives on the planet They make a venom so toxic it can kill a human in three minutes Their sting microscopic spears that pierce with five million times the acceleration of gravity is the fastest known motion in the animal kingdom Made of roughly 95 percent water some jellies are barely perceptible virtuosos of disguise while others glow with a luminescence that has revolutionized biotechnology Yet until recently jellyfish were largely ignored by science and they remain among the most poorly understood of ocean dwellers More than a decade ago Juli Berwald left a career in ocean science to raise a family in landlocked Austin Texas but jellyfish drew her back to the sea Recent massive blooms of billions of jellyfish have clogged power plants decimated fisheries and caused millions of dollars of damage Driven by questions about how overfishing coastal development and climate change were contributing to a jellyfish population explosion Juli embarked on a scientific odyssey She traveled the globe to meet the biologists who devote their careers to jellies hitched rides on Japanese fishing boats to see giant jellyfish in the wild raised jellyfish in her dining room and throughout it all marveled at the complexity of these alluring and ominous biological wonders Gracefully blending personal memoir with crystal clear distillations of science *Spineless* is the story of how Juli learned to navigate and ultimately embrace her ambition her curiosity and her passion for the natural world She discovers that jellyfish science is more than just a quest for answers It's a call to realize our collective responsibility for the planet we share

*Molecules of Nature* Paul F. Torrence, 2017-12-13 Molecules of nature are created by living organisms in their quest to survive and thrive in Earth's challenging environments This ages old evolutionary struggle has produced an immense library of chemicals from which humans have selected invaluable therapeutics critical to modern medicine Natural products presently provide half of all prescription medications and 70% of all cancer drugs The success of continued drug development from natural products depends upon the diversity of molecules of nature which in turn depends upon biodiversity Unfortunately human caused damage to the environment from pollution to habitat loss to overexploitation of resources is causing unprecedented

ecological damage and death of species a mass extinction event Unless this biotic crisis is obviated humanity will lose a primary source of future novel medicines This book assembles a powerful argument for nature s critical role in providing medicines for humanity and how that irreplaceable service is threatened by the extinction crisis A sampling of the molecules of nature employed in modern medicine reads like a catalog of biodiversity For example one of the most prescribed drugs in the United States is lisinopril which controls high blood pressure Lisinopril originated from the venom of a deadly viper from the Amazonian forests A denizen of US southwestern deserts provided a therapeutic for type II diabetes The ancient horseshoe crab of the US Atlantic coast enables a critical test for deadly endotoxins in medical products of all kinds Once a diagnosis of acute lymphocytic leukemia in children was a death sentence A tropical flower from Madagascar provided two natural products that changed a 90% fatality rate to a 90% cure rate The Pacific Yew tree from the US northwest was discovered to contain the potent anticancer agent Taxol now vital in the treatment of breast and ovarian cancers and Kaposi s sarcoma This book tells the fascinating story of these and other medicines It also summarizes some of the driving forces of the Sixth Mass Extinction and shows how it threatens at least half of the planet s species with extinction We rightly ask What will be the future of medicine without the contribution of millions of species How many treatments for disease will be forever lost What cures are we asking future generations to forgo As we willy nilly extinguish the future of one organism after another together with all the knowledge they hold we are like the looters of the Great Library of Alexandria The final chapter challenges readers to pursue a different outcome By uniting our efforts we can still preserve many of the remaining species on our blue green planet and the invaluable gifts they offer

**A Future Beyond Growth** Haydn Washington,Paul Twomey,2016-04-14

There is a fundamental denial at the centre of why we have an environmental crisis a denial that ignores that endless physical growth on a finite planet is impossible Nature provides the ecosystem services that support our civilisation thus making humanity unavoidably dependent upon it However society continues to ignore and deny this dependence A Future Beyond Growth explores the reason why the endless growth economy is fundamentally unsustainable and considers ways in which society can move beyond this to a steady state economy The book brings together some of the deepest thinkers from around the world to consider how to advance beyond growth The main themes consider the deep problems of the current system and key aspects of a steady state economy such as population throughput and consumerism ethics and equity and policy for change The policy section and conclusion bring together these various themes and indicates how we can move past the growth economy to a truly sustainable future This volume will be of great interest to students and scholars of economics sustainability and environmental studies in general
