Encyclopedia of Criminological Theory Francis T. Cullen, Pamela Wilcox, 2010-09-23 Consistently excellent The level and coverage of the content make this an invaluable reference for students studying criminology or taking criminal psychology modules at degree level and beyond Adam Tocock Reference Reviews In discussing a criminology topic lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and move on as if assuming their student audience possesses the necessary background to appreciate and integrate the reference However university reference librarians can tell you this is often far from the case Students often approach them seeking a source to provide a quick overview of a particular theory or theorist with just the basics the who what where how and why if you will And reference librarians often find it difficult to guide these students to a quick one stop source In response SAGE Reference is publishing the two volume Encyclopedia of Criminological Theory available in both print and electronic formats This serves as a reference source for anyone interested in the roots of contemporary criminological theory Drawing together a team of international scholars it examines the global landscape of all the key theories and the theorists behind them presenting them in the context needed to understand their strengths and weaknesses In addition to interpretations of long established theories it also offers essays on cutting edge research as one might find in a handbook And like an unabridged dictionary it provides concise to the point definitions of key concepts ideas schools and figures Coverage will include contexts and concepts in criminological theory the social construction of crime policy implications of theory diversity and intercultural

Self-Authorship: Theory, Research, and Application Marcia B. Baxter Magolda, Patricia M. King, 2012-09-27 One reason
so many students fail to achieve complex learning goals may be that they rely too heavily on others opinions about what to
believe who to be and how to relate to others The meaning making capacity of self authorship provides a basis from which to
understand and learn from one s experiences without this students are at a loss to know how to make intentional choices
about what to believe and how to act Similarly without a means to access and assess students meaning making researchers
are at a disadvantage in deciding how to interpret students academic performance and other behaviors and educators are at
a disadvantage in translating findings into the design of new programs and services This monograph is for those who are
interested in understanding self authorship and its assessment and in using this approach in their own work Drawing from
well established theories and extensive longitudinal research including nearly two thousand interviews it offers a detailed
account of how young adults capacities become more complex and adaptive over time Those who understand the role of
meaning making will be better able to document its effects on educational outcomes and provide better information to
decision makers about program effectiveness Each monograph in the series is the definitive analysis of a tough higher
education problem based on thorough research of pertinent literature and institutional experiences Topics are identified by a
national survey Noted practitioners and scholars are then commissioned to write the reports with experts providing critical
reviews of each manuscript before publication
