receive extra resources from schools in return for being labeled as gifted The editors explore how transformationally gifted people can seek to make the world a better and more just place they try to make a positive meaningful and possibly enduring contribution to changing things in the world that are not working They do not view giftedness merely as a transaction whereby in exchange for being labeled as gifted they accrue benefits to themselves such as a more prestigious education more income or residence in a more exclusive community The overarching aim of this book is to present conceptions of what identification and instruction of the gifted would look like if the focus of gifted education was transformational rather than transactional What if gifted education did not focus so much on acceleration vs enrichment or pull out versus in class integration but rather on how to be gifted in giving back in using one's gifts to create a better world **Creative**

Message from the author This book creates an impetus for change in a business world where unethical practices are rampant by providing a suggested New Integral Ethics for the economy an ethical approach based upon inner psychological and spiritual development arising from a serious consideration of Depth Psychology Readers will learn how adoption of specific Practices which lead to inner growth and spiritual maturity will result in ethical morally sound business practices not because they are mandated but because once the SELF is actualized you cannot do otherwise Laws appeals and directives which have never successfully resulted in ethical practices become unnecessary replaced by intrinsically ethical individuals who collectively influence corporate ethical behaviour This is a giant leap into a new dimension in our globalized digitized economy

Business Ethics 3.0 by Erhard Meyer Galow provides a much needed beacon of light to a segment of our society that seem to be sinking deeper and deeper into darkness The term business ethics once an important topic within the business community has slowly descended through the fog of profitable ends justifying unprincipled means to become nothing more than a self contradictory oxymoron especially among large international corporations In Business Ethics 3.0 Erhard Meyer Galow has taken a fresh approach that appeals to individual personal growth rather than the usual proffering of academic arguments that are not implementable in the real world of relentless Machiavellian competition Only through raising and improving individual awareness and responsibility can real long term change have a chance of developing

at the 2018 Humanistic Management Book Awards      Education during the Time of the Revolution in Egypt Nagwa Megahed, 2017-11-13 Since the 25th January 2011 revolution Egyptians experienced and engaged in a daily debate. Controversially some argued that the conflict and revolts in Egypt and the Arab region were neither coincidental nor the result of a domino effect of collective actions by oppressed people against autocratic regimes. Rather these revolts were the result of mobilization efforts made over decades by several activist groups as well as national and international non-governmental organizations. Contrary to this view others claim that despite the rapid economic growth of Egypt in the 2000s there was a wide gap in the distribution of wealth and economic return which left the majority of Egyptians suffering from poverty and high rate of unemployment especially among youth. Obviously while national and international economic and political dynamics dominated the daily debate education remains the forgotten arena amidst conflict. With the exacerbation of conflict between militant extremists and modern states in the region and most recently in many European countries it became more important than ever before to understand the dialectics of education in conflict in different local contexts starting in this book by the Egyptian context. The book focuses on education in Egypt during the time of the revolution as perceived by university students, youth activists, educational professionals, government officials and civil society organizations. Its chapters reveal the tension, contradiction and/or coherence among different players as related to their respective role in education for civic engagement, national identity, global citizenship, peace building, teacher professional development and women's and students empowerment. The book illustrates the dialectics of education in conflict by articulating diverse meanings and perspectives given by Egyptian stakeholders when describing their actions and realities during the time of the revolution and its aftermath.
