Readability: science, earth, astronomy, seasons, moon, rotation, revolution, related content

Prior Knowledge Questions: (Do these BEFORE using the Game.)

- Supposed you were stranded on the international airport as everyone is there. How would you know which way is north, or a particular season? I don't know. I would just wait till the sun is either up or down, I would either be looking at sunset or the sun will be over the horizon.
- How could you determine all your time? if it showed a watch.

Game Play:

Thousands of years ago, people were already looking at the sky. They figured out that seasons and constellations do not go away. The scientists' questions at that time passed thousands. How does it go on? How does it work? How does it work?

In the Seasons: Earth, Moon, and Sun Game, you will learn how the sun and moon affect the seasons of time in different ways.

Keep the Simulation open when all the days finish off. Click Play (A) and observe the effects of the game.

- What happens? The Earth is rotating.
- What does the Earth look like when it is in the sun? The sun is in the Earth, and it is in the sun.
- What does the Earth look like when it is in the sun? The sun is in the Earth, and it is in the sun.
- What does the Earth look like when it is in the sun? The sun is in the Earth, and it is in the sun.
