Missing Link The Evolution Of Metaphor And The Metaphor Of Evolution:

Missing Link Jeffery Donaldson, 2015-04-01 We look for missing links in the sciences and humanities but the essential missing link metaphor is always in front of us In Missing Link Jeffery Donaldson unites literary criticism and evolutionary and cognitive science to show how metaphor has been with us since the beginning of time as a seed in the nature of things With examples from centuries of poets critics philosophers and scientists he details how metaphor is a chemistry an exchange of energies forming and dissolving and an openness in the spaces between things He considers the ways in which DNA learns how to liken things that have been how mutation makes errors and then tries them on and how evolution is hypothesis nature's way of thinking more The mind is a matrix of relations neural synapses cascade into ever changing pathways and patterns Metaphor is the substance of things hoped for the evidence of things not seen It is the unbroken thread between matter and spirit Whether offering analysis of a turn of phrase or chemical reaction Missing Link presents a vision of literature that is also a vision of the cosmos and vice versa It enters the debate between evolution and religion and challenges scientists literary theorists and religious advocates to rethink the relations between their disciplines Biosemiotics and Evolution Elena Pagni, Richard Theisen Simanke, 2022-01-03 This book reviews the evolution of Biosemiotics and gives an outlook on the future of this interdisciplinary new discipline In this volume the foundations of symbolism are transformed into a phenomenological technological philosophical and psychological discussion enriching the readers knowledge of these foundations It offers the opportunity to rethink the impact that evolution theory and the confirmations about evolution as a historical and natural fact has had and continues to have today The book is divided into three parts Part I Life Meaning and Information Part II Semiosis and Evolution Part III Physics medicine and bioenergetics It starts by laying out a general historical philosophical and scientific framework for the collection of studies that will follow In the following some of the main reference models of evolutionary theories are revisited Extended Synthesis Formal Darwinism and Biosemiotics The authors shed new light on how to rethink the processes underlying the origins and evolution of knowledge the boundary between teleonomic and teleological paradigms of evolution and their possible integration the relationship between linguistics and biological sciences especially with reference to the concept of causality biological information and the mechanisms of its transmission the difference between physical and biosemiotic intentionality as well as an examination of the results offered or deriving from the application in the economics and the engineering of design of biosemiotic models for the transmission of culture digitalization and proto design This volume is of fundamental scientific and philosophical interest and seen as a possibility for a dialogue based on theoretical and methodological pluralism The international nature of the publication with contributions from all over the world will allow a further development of academic relations at the service of the international scientific and humanistic heritage **Thinking with Metaphors in Medicine** Alan Bleakley, 2017-07-06 While medical language is soaked in metaphor and thinking with metaphor is central to diagnostic work medicine that is

medical culture clinical practice and medical education outwardly rejects metaphor for objective literal scientific language This thought provoking book argues that this is a misstep and critically considers what embracing the use of metaphors and similes might mean for shaping medical culture and especially the doctor patient relationship in a healthy way Thinking With Metaphors in Medicine explores how metaphors inhabit medicine sometimes for the better and sometimes for the worse and how these metaphors can be revealed appreciated and understood how diagnostic work utilizes thinking with metaphors how patient doctor communication can be better understood and enhanced as a metaphorical exchange how the landscape of medicine is historically shaped by leading or didactic metaphors such as the body as machine and medicine as war which may conflict with other values or perspectives on healthcare for instance person centred care Outlining the kinds of metaphors and resemblances that inhabit medicine and how they shape practices and identities of doctors colleagues and patients this book demonstrates how the landscape of medicine may be reshaped through metaphor shift It is an important work for all those interested in the use of language and rhetoric in medicine whether hailing from a humanities social science or healthcare background

The Productions of Time Michael Dolzani, 2021-02-18 Myth criticism flourished in the mid twentieth century under the powerful influence of Canadian thinker Northrop Frye It asserted the need to identify common unifying patterns in literature arts and religion Although it was eclipsed by postmodern theories that asserted difference and conflict those theories proved incapable of inspiring solidarity or guiding social action The Productions of Time argues for a return to myth criticism in order to refine and extend its vision With the aim of rehabilitating myth criticism for our time Michael Dolzani sketches an anatomy of the imagination as demonstrated in the total body of its productions including literature mythology the arts popular culture and religious and political texts Dolzani situates a vast panoply of images character types plot structures themes and genres to better understand their purposes their recurrences across broad spans of history and their interrelations Illustrating the relationship between mythology and history The Productions of Time proposes a symbolic language as a way of enabling dialogue across ideological and individual differences Arguing for the ethical and intellectual necessity of conceiving a unifying pattern that transcends differences The Productions of Time demonstrates that imagination is part of the human inheritance common to all not just to poets and mystics

Routledge Handbook of the Medical Humanities Alan Bleakley, 2019-07-31 This authoritative new handbook offers a comprehensive and cutting edge overview of the state of the medical humanities globally showing how clinically oriented medical humanities the critical study of medicine as a global historical and cultural phenomenon and medicine as a force for cultural change can inform each other Composed of eight parts the Routledge Handbook of the Medical Humanities looks at the medical humanities as a network and system therapeutic provocation forms of resistance a way of reconceptualising the medical curriculum concerned with performance and narrative mediated by artists as diagnosticians of culture through public engagement This book describes how the medical humanities can be used in and out of clinical settings acting as a point of

resistance redistributing medicine's capital amongst its stakeholders embracing the complexity of medical instances shaping medical education promoting interdisciplinary understandings and recognising an identity for the medical humanities as a network effect This book is an essential read for all students scholars and practitioners with an interest in the medical humanities

The Reception of Northrop Frye, 2021-08-31 The widespread opinion is that Northrop Frye's influence reached its zenith in the 1960s and 1970s after which point he became obsolete his work buried in obscurity This almost universal opinion is summed up in Terry Eagleton's 1983 rhetorical question Who now reads Frye In *The Reception of Northrop Frye* Robert D Denham catalogues what has been written about Frye books articles translations dissertations and theses and reviews in order to demonstrate that the attention Frye's work has received from the beginning has progressed at a geomantic rate Denham also explores what we can discover once we have a fairly complete record of Frye's reception in front of us such as Hayden White's theory of emplotments applied to historical writing and Byron Almon's theory of musical narrative The sheer quantity of what has been written about Frye reveals that the only valid response to Eagleton's rhetorical question is a very large and growing number the growth being not incremental but exponential

The Major Metaphors of Evolution Salvatore J. Agosta, Daniel R. Brooks, 2020-08-29 This book presents a unified evolutionary framework based on three sets of metaphors that will help to consolidate discussions on evolutionary transitions Evolution is the unifying principle of life making identifying ways to apply evolutionary principles to tackle existence threatening crises such as climate change crucial A more cohesive evolutionary framework will further the discussions in this regard and also accelerate the process itself This book lays out a framework based on three dualistic classes of metaphors time space and conflict resolution Evolutionary transitions theory shows how metaphors can help us understand selective diversification as Darwin described with his tree of life Moreover the recently proposed Stockholm paradigm demonstrates how metaphors can help shed light on the emergence of complex ecosystems that Darwin highlighted with his tangled bank metaphor Taken together these ideas offer proactive measures for coping with existential crises for humanity such as climate change The book will appeal to biologists philosophers and historians alike

Cooperative Evolution Christopher Bryant, Valerie A. Brown, 2021-03-16 Cooperative Evolution offers a fresh account of evolution consistent with Charles Darwin's own account of a cooperative interconnected buzzing and ever changing world Told in accessible language treating evolutionary change as a cooperative enterprise brings some surprising shifts from the traditional emphasis on the dominance of competition The book covers many evolutionary changes reconsidered as cooperation These include the cooperative origins of life evolution as a spiral rather than a ladder or tree humans as a part of natural systems rather than the purpose relationships between natural and social change and the role of the individual in adaptive radiation onto new ground The story concludes with a projection of human evolution from the past into the future Environmental studies courses have needed a book like Cooperative Evolution for a long time It is a boon for those teaching the complexity of the evolutionary story Dr John A Harris BSc Hons MSc PhD

School of Environmental Science University of Canberra As a regenerative holistic thinking farmer I daily witness the results of cooperative evolution as the seasons unfold A pleasure to read Cooperative Evolution gives entry to recent thinking on evolutionary processes David Marsh MSA Allendale Boorowa New South Wales 2018 National Individual Landcarer Award recipient This book is an engaging new look at ideas about evolution as we know it today In the hands of two eminent biologists it presents an approachable yet challenging argument I heartily recommend it Emeritus Professor Sue Stockmayer AO BSc MSc PhD Centre for the Public Awareness of Science The Australian National University *The Geography of Names* Gwilym Lucas Eades, 2016-07-15 This book examines geographical names place names and toponymy from philosophical and cultural evolutionary perspectives Geographical name tracking networks Geo NTN are posited as tools for tracking names through time and across space and for making sense of how names evolve both temporally and spatially Examples from North and South American indigenous groups the Canadian arctic Wales England and the Middle East are brought into a theoretical framework for making sense of aspects of place naming practices beliefs and systems New geographical tools such as geographic information systems GIS and global positioning systems GPS are demonstrated to be important in the production and maintenance of robust networks for keeping names and their associated meanings viable in a rapidly changing world where place naming is being taken up increasingly in social media and other new mapping platforms The Geography of Names makes the case that geographical names are transmitted memetically i e as cultural units or memes through what Saul Kripke called communication chains Combining insights from Kripke with views of later Wittgenstein on language and names as being inherently spatial the present work advances theories of both these thinkers into an explicitly geographical inquiry that advances philosophical and practical aspects of naming language and mapping

Alice in Wonderland in Film and Popular Culture Antonio Sanna, 2022-10-19 This book examines the many reincarnations of Carroll's texts illuminating how the meaning of the original books has been re negotiated through adaptations appropriations and transmediality The volume is an edited collection of eighteen essays and is divided into three sections that examine the re interpretations of Alice in Wonderland and Through the Looking Glass in literature film and other media including the branches of commerce music videos videogames and madness studies This collection is an addition to the existing work on Alice in Wonderland and its sequels adaptations and appropriations and helps readers to have a more comprehensive view of the extent to which the Alice story world is vast and always growing **Evolution** Donald R.

Prothero, 2007-11-06 Over the past twenty years paleontologists have made tremendous fossil discoveries including fossils that mark the growth of whales manatees and seals from land mammals and the origins of elephants horses and rhinos Today there exists an amazing diversity of fossil humans suggesting we walked upright long before we acquired large brains and new evidence from molecules that enable scientists to decipher the tree of life as never before The fossil record is now one of the strongest lines of evidence for evolution In this engaging and richly illustrated book Donald R Prothero weaves an

entertaining though intellectually rigorous history out of the transitional forms and series that dot the fossil record Beginning with a brief discussion of the nature of science and the monkey business of creationism Prothero tackles subjects ranging from flood geology and rock dating to neo Darwinism and macroevolution He covers the ingredients of the primordial soup the effects of communal living invertebrate transitions the development of the backbone the reign of the dinosaurs the mammalian explosion and the leap from chimpanzee to human Prothero pays particular attention to the recent discovery of missing links that complete the fossil timeline and details the debate between biologists over the mechanisms driving the evolutionary process Evolution is an absorbing combination of firsthand observation scientific discovery and trenchant analysis With the teaching of evolution still an issue there couldn t be a better moment for a book clarifying the nature and value of fossil evidence Widely recognized as a leading expert in his field Prothero demonstrates that the transformation of life on this planet is far more awe inspiring than the narrow view of extremists *Ecclesiology in the New Testament* E. Elizabeth Johnson,2020-07-21 The earliest Christians thought of themselves in communal terms They did not simply make individual commitments to Jesus as God s messiah they constituted themselves as communities shaped by the in breaking of God s realm They likely learned to do so from Jesus himself When he summoned an inner circle of his followers and numbered them twelve he signaled that his ministry had the character of a reform movement within Israel In his work of preaching healing exorcism and prophetic sign actions Jesus shaped his followers into what would eventually become the church By transgressing contemporary religious and social boundaries in his ministry he planted the seeds of the church s later inclusion of non Jews This book will investigate New Testament texts about the church from a comparative standpoint That is the various authors adopt different metaphors for their communities family assembly nation priesthood and so on to make varying claims about how they ought to live together and how they ought to live among their neighbors In their descriptions of themselves as the church Christians implicitly and explicitly describe their theology but also the Roman empire the Jerusalem temple the synagogue popular philosophical circles and first century domestic order *Ancestors in Evolutionary Biology* Ronald A. Jenner,2022-07-28 Phylogenetics emerged in the second half of the nineteenth century as a speculative storytelling discipline dedicated to providing narrative explanations for the evolution of taxa and their traits It coincided with lineage thinking a process that mentally traces character evolution along lineages of hypothetical ancestors *Ancestors in Evolutionary Biology* traces the history of narrative phylogenetics and lineage thinking to the present day drawing on perspectives from the history of science philosophy of science and contemporary scientific debates It shows how the power of phylogenetic hypotheses to explain evolution resides in the precursor traits of hypothetical ancestors This book provides a comprehensive exploration of the topic of ancestors which is central to modern biology and is therefore of interest to graduate students researchers and academics in evolutionary biology palaeontology philosophy of science and the history of science **Best Canadian Essays 2019** Biblioasis,2019-12-10 The eleventh installment of Canada s annual volume of

essays showcases diverse nonfiction writing from across the country Culled from leading Canadian magazines and journals Best Canadian Essays 2019 contains award winning and award nominated nonfiction articles that are topical and engaging and have their finger on the pulse of our contemporary psyches

A Cognitive Semantics Approach to Darwin's Theory of Evolution Dr. Anna Drogoz, 2019 DARWIN'S THEORY OF EVOLUTION ranks among the most influential of modern scientific theories Applying the methodology of COGNITIVE SEMANTICS this study investigates how metaphors based on domains of JOURNEY STRUGGLE TREE and HUMAN AGENCY serve to conceptualize key concepts of Darwin's theory such as evolutionary change natural selection and relationships among organisms At the outset the author identifies original metaphors in The Origin of Species to turn to their realizations in modern discourse on evolution in later chapters Thus the study uncovers how metaphors contribute to structuring the theory by expressing it in a coherent and attractive way and how they provide mental tools for reasoning As the first comprehensive study of conceptual metaphors that underlie Darwin's theory and affect the way we talk and think about evolution it may be of interest not only to linguists and evolutionary biologists but also to anyone interested in the interconnection between thought and language

David J. Tietge, 2008-07-09 David J Tietge examines the place and influence of scientific discourse in the popular consciousness of contemporary American society offering critical strategies for recognizing decoding and understanding scientific language as it is used by both scientific and a scientific agents and agencies *The Poetic of Reason: Introducing Rational Poetic Experimentalism* Stefán Snævarr, 2022-09-26 This book makes the attempt to wed reason and the poetic The tool for this attempt is Rational Poetic Experimentalism RPE which is introduced and explored in this book According to RPE it makes sense to look for poetic elements in human reality including reason outside of the realm of imaginative literature Provocatively RPE contends that philosophy's search for truth has not been a great success so far So why not experiment with philosophical concepts and look for thought provoking ideas by employing the principles of RPE instead of fruitlessly searching for truths using conventional methods Disbelief 101 S. C. Hitchcock, Tom Flynn, 2009-05-01 Filled with wit humor and clear metaphor this exploration into atheism is written specifically for young adults though any adult interested in learning more about atheism will find value within Not just focused on atheism this crash course in logical thinking addresses the issues of indoctrination whether it be religious political or commercial and makes the case that morality is created through reasoning and logic not through divine communication Many hot topics are touched upon such as traditional arguments for God's existence the relationship of evolution and religious belief the incompatible nature of science and religion and the harmfulness of both Christianity and Islam A Sociological Theory of Communication Loet Leydesdorff, 2001-01-01 Networks of communication evolve in terms of reflexive exchanges The codification of these reflections in language that is at the social level can be considered as the operating system of society Under sociologically specifiable conditions the discursive reconstructions can be expected to make the systems under reflection increasingly knowledge intensive This sociological theory of communication is founded in a tradition that includes Giddens 1979 structuration theory Habermas 1981 theory of communicative action and Luhmann's 1984 proposal to consider social systems as self organizing The study also elaborates on Shannon's 1948 mathematical theory of communication for the formalization and operationalization of the non linear dynamics The development of scientific communications can be studied using citation analysis The exchange media at the interfaces of knowledge production provide us with the evolutionary model of a Triple Helix of university industry government relations The construction of the European Information Society can then be analyzed in terms of interacting networks of communication The issues of sustainable development and the expectation of social change are discussed in relation to the possibility of a general theory of communication REVIEW In this book Loet Leydesdorff sets out to answer the question Can society be considered as a self organizing autopoietic system In the process Leydesdorff develops a general sociological theory of communication as well as a special theory of scientific communication designed to analyze complex systems such as the European Information Society from review in JASIST 53 1
