Week	Unit and Topic	Days Completed
<p align="center">Operations and Algebraic Thinking</p> <p align="center"><i>Represent and solve problems involving multiplication and division</i></p>		
1-2	Integers products of whole numbers e.g., interpret 4×5 as the total number of objects in a group of 4 groups of 5 objects each. For example, describe a number in words as the number of objects that is represented as 3×7 .	
3-4	Interpret whole-number products of whole numbers e.g., interpret $56 \div 8$ as the number of groups of 8 that divide into 56 objects as partitions equally into 8 groups to see whether it divides evenly. Use objects as partitions to represent whole or 10 objects each. For example, describe a number in which a number of groups is a certain of groups that is represented as $56 \div 8$.	
5	Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays and measurement quantities, e.g., for unknowns in all three positions with a number for the unknown, needed to represent the problem.	
6	Interpret the unknown in a word problem as a multiplication or division equation involving two whole numbers. For example, determine the unknown number that when being divided by 3 is equal to 4 or $4 \times ? = 12$ or $? \div 3 = 4$ or $4 \times ? = 12$.	
<p align="center">Number and Operations in Base Ten</p> <p align="center"><i>Use place value and rounding to perform multi-digit arithmetic</i></p>		
7	Use place value understanding to round whole numbers to the nearest 10 or 100. Explain and justify addition within 100 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.

Resources in Education, 2001-04 Mathematics Teachers at Work Janine T. Remillard, Beth A.

Herbel-Eisenmann, Gwendolyn M. Lloyd, 2011-09-20 This book compiles and synthesizes existing research on teachers use of mathematics curriculum materials and the impact of curriculum materials on teaching and teachers with a particular emphasis on but not restricted to those materials developed in the 1990s in response to the NCTM's Principles and Standards for School Mathematics Despite the substantial amount of curriculum development activity over the last 15 years and growing scholarly interest in their use the book represents the first compilation of research on teachers and mathematics curriculum materials and the first volume with this focus in any content area in several decades **Mathematics**

Teaching, Learning, and Liberation in the Lives of Black Children Danny Bernard Martin, 2010-06-21 With issues of equity at the forefront of mathematics education research and policy *Mathematics Teaching Learning and Liberation in the Lives of Black Children* fills the need for authoritative rigorous scholarship that sheds light on the ways that young black learners experience mathematics in schools and their communities This timely collection significantly extends the knowledge base on mathematics teaching learning participation and policy for black children and it provides new framings of relevant issues that researchers can use in future work More importantly this book helps move the field beyond analyses that continue to focus on and normalize failure by giving primacy to the stories that black learners tell about themselves and to the voices of mathematics educators whose work has demonstrated a commitment to the success of these children Teaching

Mathematics in the Visible Learning Classroom, Grades 3-5 John Almarode, Douglas Fisher, Kateri Thunder, Sara Delano Moore, John Hattie, Nancy Frey, 2019-02-13 It could happen in the morning during homework review Or perhaps it happens when listening to students as they struggle through a challenging problem Or maybe even after class when planning a lesson At some point the question arises How do I influence students learning what's going to generate that light bulb aha moment of understanding In this sequel to the megawatt best seller *Visible Learning for Mathematics* John Almarode Douglas Fisher Nancy Frey John Hattie and Kateri Thunder help you answer that question by showing how *Visible Learning* strategies look in action in the mathematics classroom Walk in the shoes of elementary school teachers as they engage in the 200 micro decisions per minute needed to balance the strategies tasks and assessments seminal to high impact mathematics instruction Using grade leveled examples and a decision making matrix you'll learn to Articulate clear learning intentions and success criteria at surface deep and transfer levels Employ evidence to guide students along the path of becoming metacognitive and self directed mathematics achievers Use formative assessments to track what students understand what they don't and why Select the right task for the conceptual procedural or application emphasis you want ensuring the task is for the right phase of learning Adjust the difficulty and complexity of any task to meet the needs of all learners It's not only what works but when Exemplary lessons video clips and online resources help you leverage the most effective teaching practices at the most

effective time to meet the surface deep and transfer learning needs of every student Resources in Education ,1996

Teaching Mathematics in the Visible Learning Classroom, Grades K-2 John Almarode,Douglas Fisher,Kateri Thunder,John Hattie,Nancy Frey,2019-01-09 Select the right task at the right time for the right phase of learning How can you best help K 2 students to become assessment capable visible learners in mathematics This book answers that question by showing Visible Learning strategies in action in high impact mathematics instruction Walk in the shoes of K 2 teachers as they mix and match strategies tasks and assessments demonstrating that it s not only what works but when A decision making matrix and grade leveled examples help you leverage the most effective teaching practices at the most effective time to meet the surface deep and transfer learning needs of every young student *The Mathematics Lesson-Planning Handbook, Grades K-2* Beth McCord Kobett,Ruth Harbin Miles,Lois A. Williams,2018-02-09 This book brings together the best of Visible Learning and the teaching of mathematics The chapters on learning intentions success criteria misconceptions formative evaluation and knowing thy impact are stunning Rich in exemplars grounded in research about practice and with the right balance about the surface and deep learning in math it s a great go to book for all who teach mathematics John Hattie Laureate Professor Deputy Dean of MGSE Director of the Melbourne Education Research Institute Melbourne Graduate School of Education Your blueprint to planning K 2 math lessons for maximum impact and understanding Not sure of tomorrow morning s lesson plan Or maybe you feel it isn t tailored enough for your students needs What do you do For that and more help is here The Mathematics Lesson Planning Handbook Grades K 2 Your Blueprint for Building Cohesive Lessons guides teachers step by step through the decision making process of planning K 2 math lessons that are purposeful rigorous and coherent Instructional experts Beth McCord Kobett Ruth Harbin Miles and Lois A Williams streamline and deepen the lesson planning process showing teachers how to access students complex needs clarify learning intentions and select tasks that will best lead to student understanding of mathematical concepts and skills Along the way teachers create an individualized blueprint for planning K 2 math lessons for maximum student learning The lesson planning process guides teachers to Identify the mathematical content language and social learning intentions for a lesson or unit and connect goals to success criteria Determine the purpose of a math lesson you re planning by distinguishing between conceptual understanding procedural fluency and transfer Select worthwhile tasks and materials that make the best use of representations manipulatives and other instructional tools and resources Choose the format of your lesson using reasoning and number routines games whole class discussion and pairs or small group work Anticipate student misconceptions and evaluate understanding using a variety of formative assessment techniques Decide how you ll launch your lesson facilitate questioning encourage productive struggle and close your lesson Included is a lesson planning template and examples from kindergarten first and second grade classrooms Chapter by chapter the decision making strategies empower teachers to plan math lessons strategically to teach with intention and confidence and to build an exceptional foundation in math for all students *The Mathematics Program*

Improvement Review Ron Pelfrey, 2006 How good is your school's mathematics program Test scores can provide some general trend information but what you and your students' parents really need are specifics about the quality of the curriculum the effectiveness of the instruction and the school's overall capacity to support mathematics learning The Mathematics Program Improvement Review MPIR is a proven evaluation process focused on standards for high quality mathematics programs in grades K-12 Based on research into effective program evaluation methods the MPIR approach uses multiple data sources to clarify exactly what is working within an individual school's math program and what is not Author and MPIR developer Ron Pelfrey has used this process to evaluate mathematics programs in more than 300 rural urban and suburban schools and has trained hundreds of educators to conduct reviews Now this handbook makes the MPIR process and its benefits available to everyone Inside you'll find guidelines for training review team members and all the materials needed to conduct a review including Lists of standards and indicators for the 10 essential components of an effective mathematics program Templates for questionnaires interviews and classroom observations Detailed evaluation rubrics Forms for compiling ratings and generating a final report Whether used as a basis for informal faculty or departmental discussion to promote best practices in a particular area such as curriculum or instruction or to guide a formal program evaluation this book will help any school or district apply MPIR tools and procedures to bring about positive change in students' mathematics learning

Index of Specifications and Standards, 2005 [Transform Your Math Class Using Asset-Based Teaching for Grades 6-12](#) Michael D. Steele, Joleigh Honey, 2024-07-30 Foster a love of mathematics by creating a more inclusive and empowering learning environment through asset-based teaching An asset-based perspective on math education means starting with what students already know instead of focusing on what's missing This approach elevates student thinking and reasoning skills In this way educators acknowledge that all students bring prior experiences strengths talents and resources to the learning process and can contribute meaningfully in an authentic learning environment Transform Your Math Class Using Asset-Based Teaching for Grades 6-12 provides insight into asset-based perspectives in mathematics education to create an environment where all students feel valued and capable of being doers of mathematics In the book Michael Steele and Joleigh Honey highlight the importance of using language instructional routines and systemic structure that positively impact student engagement their math identity and ultimately their outcomes Providing a wealth of knowledge and practical strategies that can be used to transform math classrooms into inclusive supportive and empowering learning environments this book Introduces an asset-based perspective that focuses on students' strengths assets and potential to learn mathematics Includes a variety of frameworks and tools that teachers can use to build and grow their sense of asset-based perspectives Offers strategies for promoting a growth mindset in mathematics encouraging productive struggle in math and promoting equitable math instruction Supports teachers in reflecting on their decisions self-awareness and self-management Includes a companion online study guide to support teachers individually or as part of a professional learning community Adopting asset

based perspectives is about movement over time not about flipping a switch This book paves the path for an asset based journey that ultimately helps to transform our math classrooms and advance all students learning and development
