Lazy, Crazy, and Disgusting Alexandra Brewis, Amber Wutich, 2019-11-19 How stigma derails well intentioned public health efforts creating suffering and worsening inequalities 2020 Winner Society for Anthropological Sciences Carol R Ember Book Prize Shortlisted for the British Sociological Association's Foundation for the Sociology of Health and Illness Book Prize *Stigma* is a dehumanizing process where shaming and blaming are embedded in our beliefs about who does and does not have value within society In *Lazy Crazy and Disgusting* medical anthropologists Alexandra Brewis and Amber Wutich explore a darker side of public health that well intentioned public health campaigns can create new and damaging stigma even when they are otherwise successful Brewis and Wutich present a novel synthetic argument about how stigmas act as a massive driver of

global disease and suffering killing or sickening billions every year They focus on three of the most complex difficult to fix global health efforts bringing sanitation to all treating mental illness and preventing obesity They explain how and why humans so readily stigmatize how this derails ongoing public health efforts and why this process invariably hurts people who are already at risk They also explore how new stigmas enter global health so easily and consider why destigmatization is so very difficult Finally the book offers potential solutions that may be able to prevent challenge and fix stigma Stigma elimination Brewis and Wutich conclude must be recognized as a necessary and core component of all global health efforts Drawing on the authors keen observations and decades of fieldwork *Lazy Crazy and Disgusting* combines a wide array of ethnographic evidence from around the globe to demonstrate conclusively how stigma undermines global health's basic goals to create both health and justice

Invitations to Abundance Alicia J Akins, 2022-03-01 What do the feasts of the Bible reveal about our place in today's tired world In short everything From Genesis through Revelation redemptive history is captured through feasts Through them God calls his people to commemorate mercy delight in grace and commune with him and with each other In the process he proves he doesn't ration his rich soul satisfying love toward us but instead lets it overflow *Invitations to Abundance* brings to life the festivities described in the Bible and illuminates how relevant they remain in a modern world defined by isolation and disillusionment When your heart needs encouragement these wondrous celebrations remind you why where and how you can find security unity and hope Each chapter seats us at a unique feast from Scripture from the well known to the less familiar and considers how you can respond worshipfully as a partaker of these celebrations *Invitations to Abundance* shows you how to reciprocate God's initiating kindness and what it means to live knowing God's table is spread before you

Essential Fasting Jordan Rubin, Dr. Josh Axe, 2020-09-15 Let fasting unleash the healer within you Do you wish there was a simple way to lose weight feel healthier and increase your energy without the hassle of counting calories or planning meals There is It's the ancient practice of fasting The term fasting may sound intimidating but effective fasting simply

Home John S Allen, 2015-12-29 A leading anthropologist studies the science behind feeling at home to show us how home made us human Home is where the heart is Security comfort even love are all feelings that are centered on the humble abode But what if there is more to the feeling of being at home Neuroanthropologist John S Allen believes that the human habitat is one of the most important products of human cognitive technological and cultural evolution over the past two million years In *Home* Allen argues that to feel at home is more than just an expression but reflects a deep seated cognitive basis for the human desire to have use and enjoy a place of one's own Allen addresses the very basic question How did a place to sleep become a home Within human evolution he ranks house and home as a signature development of our species as it emerged alongside cooperative hunting language and other critical aspects of humanity Many animals burrow making permanent home bases but primates generally speaking do not most wander making nests at night wherever they might find themselves This is often in home territory but it isn't quite home Our hominid

ancestors were wanderers too so how did we over the past several million years find our way home To tell that story Allen will take us through evolutionary anthropology neuroscience the study of emotion and modern sociology He examines the home from the inside of our heads out homes are built with our brains as much as with our hands and tools Allen argues that the thing that may have been most critical in our evolution is not the physical aspect of a home but developing a feeling of defining creating and being in a home whatever its physical form The result was an environment relatively secure against whatever horrors lurked outside that enabled the expensive but creative human mind to reach its full flowering Today with the threat of homelessness child foster care and foreclosure this idea of having a home is more powerful than ever In a clear and accessible writing style Allen sheds light on the deep cognitive sources of the pleasures of having a home the evolution of those behaviors and why the deep reasons why they matter Home is the story about how humans evolved to create a space not only for shelter but also for nurturing creativity innovation and culture and why feeling at home is a fundamental aspect of the human condition
