On The Study Methods Of Our Time:

On the Study Methods of Our Time Giambattista Vico, 2018-08-06 *On the Study Methods of Our Time* remains a key text for anyone interested in the development of Vico's thought and serves as a concise introduction to his work. Scholars and students in such disciplines as the history of philosophy, intellectual history, literary theory, rhetoric, and the history and philosophy of education will find this volume helpful and fascinating. Giambattista Vico's first original work of philosophy, *On the Study Methods of Our Time* 1708-9 takes up the contemporary quarrel between the ancients and the moderns and provides a highly interesting statement of the nature of humanistic education. This edition makes available again Elio Gianturco's superb 1965 English translation of a work generally regarded as the earliest statement by Vico of the fundamentals of his position. An important contribution to the development of the scientism versus humanism debate over the comparative merits of classical and modern culture, this book lays out Vico's powerful arguments against the compartmentalization of knowledge which results from the Cartesian world view. In opposition to the arid logic of Cartesianism, Vico here celebrates the humanistic tradition and posits the need for a comprehensive science of humanity which recognizes the value of memory and imagination.

On the Study Methods of Our Time. Translated, with an Introduction and Notes by Elio Gianturco Giovanni Battista Vico, 1965 *On the Study Methods of Our Time.*

Translated, with an Introd. and Notes by Elio Gianturco Elio Gianturco, Giambattista Vico, 1965 *On the Study Methods of Our Time* Giovanni Battista Vico, 1965 *The Rehabilitation of Myth* Joseph Mali, 2002-05-02 In this important essay Joseph Mali argues that Vico's New Science must be interpreted according to Vico's own clues and rules of interpretation, principally his claim that the master key of his New Science is the discovery of myth. Following this lead, Mali shows how Vico came to forge his new scientific theories about the mythopoeic constitution of consciousness, society, and history by reappraising or rehabilitating the ancient and primitive mythical traditions which still persist in modern times. He further relates Vico's radical redefinition of these traditions as the true narrations of all religious, social, and political practices in the civil world to his unique historical depiction of Western civilisation as evolving in a rational and cyclical motion. On this account, Mali elaborates the wider, distinctly revisionist implications of Vico's New Science for the modern human sciences. He argues that inasmuch as the New Science exposed the linguistic and other cultural systems of the modern world as being essentially mythopoeic, it challenges not only the Christian and Enlightenment ideologies of progress in his time but also the main cultural ideologies of our time.

James Joyce and the Language of History Robert E. Spoo, 1994 Born into a culture oppressed by its history, Joyce was preoccupied by it. Torn between conflicting images of Ireland's past, he was confronted with the challenge of creating a historical conscience. His art became his political protest, and the belief that individual passion and freely expressed works of fiction defy and subvert dominant discourses is the basis of his historiographic art.

Giordano Bruno: Philosopher of the Renaissance Hilary Gatti, 2017-03-02 Giordano Bruno was burnt at the stake in Rome in 1600 accused of heresy by the Inquisition His life took him from Italy to Northern Europe and England and finally to Venice where he was arrested His six dialogues in Italian which today are considered a turning point towards the philosophy and science of the modern world were written during his visit to Elizabethan London as a gentleman attendant to the French Ambassador Michel de Castelnau He died refusing to recant views which he defined as philosophical rather than theological and for which he claimed liberty of expression The papers in this volume derive from a conference held in London to commemorate the 400th anniversary of Bruno's death A number focus specifically on his experience in England while others look at the Italian context of his thought and his impact upon others Together they constitute a major new survey of the range of Bruno's philosophical activity as well as evaluating his use of earlier cultural traditions and his influence on both contemporary and more modern themes and trends

Aristocratic Voices Richard Avramenko, Ethan Alexander-Davey, 2024-12-15 In the 21st century political debates appear to center on fundamental conflicts between the people and elites Most of these discussions emphasize strategies to protect and empower the oppressed masses against a predatory ruling class Much of classical political thought however was written from an aristocratic point of view that is it ascribed paramount importance to the question of elite formation Assuming inequality as a permanent feature of human associations what virtues would elites need to have what institutions and traditions would cultivate the best qualities in members of the ruling class and curb their extravagances Aristocratic Voices Forgotten Arguments about Virtue Authority and Inequality consists of essays by political theorists who

Classical Rhetoric and Contemporary Law Kirsten K. Davis, Brian N. Larson, Francis J. Mootz, Kristen K. Tiscione, 2024-04-30 From the twin birth of western rhetoric and law in the Greek speaking world in the first millennium BCE law and rhetoric were deeply connected in the ancient world In the modern era of legal practice the clear connections between law and classical rhetoric have largely been lost to both those trained in the law and those who study rhetoric This

interdisciplinary reader reestablishes those lost connections by pairing primary source materials in classical rhetoric and contemporary law. The chapters in this volume show that ancient rhetorical texts can deepen or disrupt contemporary notions about principles that lie at the root of western legal traditions and return to us our past making it possible for scholars across several disciplines to build on work accomplished centuries before. Broken into four parts, this volume first covers the historical development of rhetoric. In Part Two, volume editor Mootz and scholar David A. Frank look at rhetorical theorists at bookends of an era when classical rhetoric was devalued as a mode of thought. Mootz discusses the hegemonic wave of Enlightenment epistemology that separated law from rhetoric and Frank shows that where Cartesian rationality fails in the modern era, the humanistic tradition of rhetoric allows law to respond to the needs of justice. Part Three consists of ten chapters that each 1) introduce a classical rhetorical theorist to the reader, 2) provide an excerpt from a text by that theorist, and then 3) demonstrate the relevance of that work to a contemporary court case. Moving from the Sophists through Aristotle and Plato and their Greek contemporaries to the Roman rhetoricians Cicero and Quintilian and finally to the early medieval rhetorician St. Augustine, these reprinted classical texts are contextualized by leading scholars in law, classics, and rhetoric, each with probing discussion questions for readers to engage and interact with the materials rhetorically. This vital resource of primary texts demonstrates how rhetoric illuminates the operation of the legal system and reconnects law to its rhetorical roots. Structured for use by scholars in critical inquiry and well suited for use in graduate or law school courses, *Classical Rhetoric and Contemporary Law* will be of interest to law, rhetoric, English, and communication scholars and as an interactive catalyst to examine the ways in which ancient rhetorical theory informs our understanding of law practice today.

Professing Criticism John Guillory, 2022-12-30. A sociological history of literary study both as a discipline and as a profession. As the humanities in higher education struggle with a labor crisis and with declining enrollments, the travails of literary study are especially profound. No scholar has analyzed the discipline's contradictions as authoritatively as John Guillory. In this much anticipated new book, Guillory shows how the study of literature has been organized both historically and in the modern era, both before and after its professionalization. The traces of this volatile history he reveals have solidified into permanent features of the university. Literary study continues to be troubled by the relation between discipline and profession, both in its ambivalence about the literary object and in its anxious embrace of a professionalism that betrays the discipline's relation to its amateur precursor, criticism. In a series of timely essays, *Professing Criticism* offers an incisive explanation for the perennial churn in literary study, the constant revolutionizing of its methods and objects, and the permanent crisis of its professional identification. It closes with a robust outline of five key rationales for literary study, offering a credible account of the aims of the discipline and a reminder to the professoriate of what they already do and often do well.
