Gianfranco Minati, Eliano Pessa

Metadecisions Rehabilitating Epistemology Contemporary Systems Thinking:

Metadecisions John P. van Gigch, 2012-12-06 Metadecisions Rehabilitating Epistemology constitutes an epistemological inquiry about the foundations of knowledge of a scientific discipline This text warns contemporary scientific disciplines that neglecting epistemological issues threatens the viability of their pronouncements and designs It shows that the processes by which complex artefacts are created require a pluralistic approach to artefact design It argues that viable solutions to fundamental problems in each discipline require cooperation creativity and respect for contributions from all walks of life all levels of logic and all standards of rigor be they in the natural sciences the social sciences engineering sciences management the law or political sciences Several true cases obtained from different walks of life are used to illustrate logic levels in problems and how the application of the process of modeling metamodeling helps to conceptualize problem dysfunctions and to convert decisions into metadecisions Ten cases spanning subjects like Doctor Assisted Suicides DASs Advising Women on The Risks of Mammograms a Deregulation Crusade The Crash of TWA Flight 800 The Control of The World Wide Web The Creation of the US Department of Homeland Security among others are used to illustrate the application of the metasytem framework to increase knowledge and meaning of fundamental problems The design of any human activity requires the intervention of several inquiring systems where the manager the engineer the scientist the lawyer the epistemologist the ethicist and even the artist contribute to shape how problems in the real world are formulated how decisions metadecisions to solve problems are taken and finally how actions are implemented

Realising Systems Thinking: Knowledge and Action in Management Science John Mingers, 2006-09-13 This book deals with the contribution of a systems approach to a range of disciplines from philosophy and biology to social theory and management It weaves together material from some of the pre eminent thinkers of the day In doing so it creates a coherent path from fundamental work on philosophical issues of ontology and epistemology through specific domains of knowledge about the nature of information and meaning human communication and social intervention

Ontologies, Taxonomies and Thesauri in Systems Science and Systematics Emilia Currás, 2010-10-26 The originality of this book which deals with such a new subject matter lies in the application of methods and concepts never used before such as ontologies and taxonomies as well as thesauri to the ordering of knowledge based on primary information Chapters in the book also examine the study of ontologies taxonomies and thesauri from the perspective of systematics and general systems theory Ontologies Taxonomies and Thesauri in Systems Science and Systematics will be extremely useful to those operating within the network of related fields which includes documentation and information science Ontologies and Taxonomy Knowledge classification Systems Thesauri

Metadecisions John P. van Gigch, 2003-01-31 Metadecisions Rehabilitating Epistemology constitutes an epistemological inquiry about the foundations of knowledge of a scientific discipline This text warns contemporary scientific disciplines that neglecting epistemological issues threatens the viability of their pronouncements and designs It shows that the processes by which complex artefacts are

created require a pluralistic approach to artefact design It argues that viable solutions to fundamental problems in each discipline require cooperation creativity and respect for contributions from all walks of life all levels of logic and all standards of rigor be they in the natural sciences the social sciences engineering sciences management the law or political sciences Several true cases obtained from different walks of life are used to illustrate logic levels in problems and how the application of the process of modeling metamodeling helps to conceptualize problem dysfunctions and to convert decisions into metadecisions Ten cases spanning subjects like Doctor Assisted Suicides DASs Advising Women on The Risks of Mammograms a Deregulation Crusade The Crash of TWA Flight 800 The Control of The World Wide Web The Creation of the US Department of Homeland Security among others are used to illustrate the application of the metasystem framework to increase knowledge and meaning of fundamental problems The design of any human activity requires the intervention of several inquiring systems where the manager the engineer the scientist the lawyer the epistemologist the ethicist and even the artist contribute to shape how problems in the real world are formulated how decisions metadecisions to solve problems are taken and finally how actions are implemented

In Search of an Integrative Vision for Technology Sytse Strijbos, Andrew Basden, 2006-06-22 In Search Of An Integrative Vision For Technology will stimulate its readers to consider the whole story that is information systems within the context of an integrative vision of technology It integrates disparate areas of debate and research while appreciating the contribution that philosophy can make to such thinking It is deliberately broad in coverage and designed to provide useful pointers so that researchers students practitioners and developers can easily apply each point as needed Human issues of technology and their normative aspects is a theme that runs throughout the entire book The integrative vision is centered on an understanding of human practice the twin notions of structure and direction and the leading and the founding functions of such practice While this understanding applies to all technologies it is worked out in more detail for information technology From this philosophical understanding many interdisciplinary areas of interest are identified

Community Operational Research Gerald Midgley, Alejandro Ochoa-Arias, 2012-12-06 Community Operational Research OR and Systems Thinking for Community Development sets out the current concerns of Community Operational Research Community OR for short and explores new possibilities for its continued development Leading Community OR writers with international reputations in operational research and systems thinking have contributed chapters that illuminate different aspects of Community OR theory and practice There is a focus on the value of systems approaches and other significant perspectives are also represented The result is a rich mix of theories methodologies and case studies that will be a significant resource for both practitioners and academics engaged in community development

Critical Systemic Praxis for Social and Environmental Justice Janet McIntyre-Mills, 2012-12-06 The book develops a practical approach to public policy issues that have continued to be intractable because of a lack of emphasis on transcultural understanding Sustained examples help to increase the readability and the accessibility of theory and methodology The key

themes address the issue that Management needs to be more systemic Critical Systemic Praxis is the process whereby we find ways to work across discipline areas and sectoral areas in order to address complex social political economic and environmental problems The way we define and address problems depends on an ability to work with rather than within knowledge areas By introducing the notion of governance we can extend traditional management from an organisational context to an inter organisational context and locate governance as the goal for sustainable social and environmental justice The core aspects of praxis are Respectful listening and dialogue to set up appropriate contexts for participatory design Participatory designs based on participatory action research to map tacit and explicit knowledge of participants professional and ordinary citizens Strategic decision making across discipline areas cultural contexts and knowledge areas Action learning to transfer the policy and practice learnings Mainstreaming the approach to governance in the social political economic and environmental sectors The book develops a systemic approach to public policy issues Examples are used throughout to exemplify theory The integrated approach to policy and practice is ideally suited to addressing the socio economic and environmental issues

Processes and Boundaries of the Mind Yair Neuman, 2013-03-11 How is it that the world is conceived as exclusively populated by objects e g books cars numbers and people while cognition is first and foremost a dynamic process Inquiring into the reified universe Dr Neuman explores questions of mind reality knowledge and signification in a provocative stimulating and humorous way Drawing on various domains such as systems research semiotics philosophy and complexity sciences Dr Neuman is touching basic questions of our Being in the World as cognate creatures and presents a novel theory of the mind as a boundary phenomenon Following the footsteps of Gregory Bateson and Valentine Volosinov the book propagates a process oriented theory of the mind in a way that has never been presented before In this context new and creative solutions are presented for a variety of old philosophical problems such as What is the Mind Why do we use different signs for the same object across different cultures and how is it possible to think on our thinking without getting into problems such as an infinite regression
