Metastasis And Metastability A Deleuzian Approach To Information:

Metastasis and Metastability Kane X. Faucher, 2013-11-19 The word information carries a number of connotations depending on context and can be said to be one of the most problematic words to define despite many efforts by statistical theorists mathematicians physicists cyberneticians communication theorists computer scientists and philosophers Is information physical or non physical Is the universe digital analog or a chaotic mixture of the two This book explores a Deleuzian way of understanding information by retracing Deleuze's ontology of difference back to Gilbert Simondon's concepts of transduction metastability and perpetual individuation as a source for Deleuze's concept of the virtual Although Deleuze did not address information specifically in his oeuvre this book attempts to construct what a Deleuzian theory of information might look like as a consequence of his philosophical insights The reader is presented with a brief survey of information theories capsule explanations of the philosophy of Gilbert Simondon and Gilles Deleuze and a discussion on the roles of metastasis and metastability as a means of addressing the problematic known as information outside of computing regimes and as a critique of cybernetics informatics and memetics Can information be reconfigured as affirmative difference transformed into a nomad science or must it remain consigned to the realm of probabilism **Deleuze, Digital Media and Thought** Timothy Deane-Freeman, 2024-05-31 Timothy Deane Freeman traces Deleuze's remarks about the digital to reveal both their origins and implications In so doing we encounter a position which is fundamentally ambiguous On the one hand digital techniques are intimately related to what Deleuze calls societies of control which deploy them in order to close down potential spaces of creativity and resistance On the other digital images take up the mantle of cinema displacing habitual forms of cognition and forcing us to think in new ways Deane Freeman traces these dual impulses through the images of cinema television and social media as well as explicating key Deleuzian concepts including virtuality immanence and the outside *Pedagogical Encounters in the Post-Anthropocene, Volume 2* Jan Jagodzinski, 2024-04-26 As a follow up to *Pedagogical Encounters in the Post Anthropocene Volume I* this book addresses three major areas in response to the post Anthropocene Technology Neurology Quantum Each of these areas is broadly addressed in relation to the concerns that have arisen both theoretically and educationally As in Volume I the author terms these to be encounters as each area presents a particular problematic when addressing the phase change that the planet is undergoing where the anthropogenic labour of global humanity is contributing to climate change endangering our very existence Technology in education has been a significant development There is a concerted effort to review this development placing stress on the rise of learning machines and algorithms In the second encounter the vast literature on neurology is addressed especially neurodiversity and the various symptoms that have emerged in the post Anthropocene era The last section reviews issues related to quantum theory as this is fundamental to tensions between physics and metaphysics The volume concludes with the author's own pedagogical proposal for the future *Social Capital Online* Kane X. Faucher, 2018-06-14 What is social capital The

enormous positivity surrounding it conceals the instrumental economic rationality underpinning the notion as corporations silently sell consumer data for profit Status chasing is just one aspect of a process of transforming qualitative aspects of social interactions into quantifiable metrics for easier processing prediction and behavioural shaping A work of critical media studies Social Capital Online examines the idea within the new network spectacle of digital capitalism via the ideas of Marx Veblen Debord Baudrillard and Deleuze Explaining how such phenomena as online narcissism and aggression arise Faucher offers a new theoretical understanding of how the spectacularisation of online activity perfectly aligns with the value system of neoliberalism and its data worship Even so at the centre of all lie familiar ideas alienation and accumulation new conceptions of which he argues are vital for understanding today s digital society *The Incorporeal* Elizabeth Grosz,2017-03-14 Philosophy has inherited a powerful impulse to embrace either dualism or a reductive monism either a radical separation of mind and body or the reduction of mind to body But from its origins in the writings of the Stoics the first thoroughgoing materialists another view has acknowledged that no forms of materialism can be completely self inclusive space time the void and sense are the incorporeal conditions of all that is corporeal or material In *The Incorporeal* Elizabeth Grosz argues that the ideal is inherent in the material and the material in the ideal and by tracing its development over time she makes the case that this same idea reasserts itself in different intellectual contexts Grosz shows that not only are idealism and materialism inextricably linked but that this belonging together of the entirety of ideality and the entirety of materiality is not mediated or created by human consciousness Instead it is an ontological condition for the development of human consciousness Grosz draws from Spinoza s material and ideal concept of substance Nietzsche s amor fati Deleuze and Guattari s plane of immanence Simondon s preindividual and Raymond Ruyer s self survey or autoaffection to show that the world preexists the evolution of the human and that its material and incorporeal forces are the conditions for all forms of life human and nonhuman alike A masterwork by an eminent theoretician *The Incorporeal* offers profound new insight into the mind body problem **Unreasonable Faith** James Fodor,2022-06-29 He has written or edited more than 30 books his arguments for God and Jesus are frequently cited by Christian apologists around the world and he has severely overstated his case through a series of blatant mischaracterizations and philosophical blunders You may have heard of William Lane Craig a professor of philosophy at Talbot School of Theology who is known for debating atheists but even if you haven t you have probably heard his arguments through followers and fans He is known for painting faith as the reasonable road and falsely claiming that he can prove the validity of his religion From his work attempting to show evidence for Jesus resurrection to his development of the Kalam cosmological argument for the existence of God Craig is respected among his peers on the Christian side of the religious spectrum But is that deserved What s at the core of these arguments Are they philosophically sound More importantly is this *Unreasonable Faith* an excellent destruction of W L Craig s entire apologetics Cogently argued and factually accurate this is required reading for anyone keen to question the soundness of anything W L Craig has argued

over the decades Which makes it an invaluable resource for refuting Christian apologetics generally Richard Carrier author on the historicity of Jesus This book should be required reading for anyone who is proposing to debate William Lane Craig on the existence of God It should also be something that those who debate Craig on that topic advertise this book gives an accurate idea of the amount of material that needs to be provided to begin to address the usual panoply of arguments that Craig puts forward in a debate Professor Graham Oppy Monash James Fodor has a graduate degree in physics at the University of Melbourne and is a research assistant in structural biology at Monash University With a keen interest in philosophy he writes for the Rationalist magazine on various subjects in religion and epistemology As president of the University of Melbourne Secular Society he has engaged in numerous discussions and public debates concerning religion with a focus on secular morality and the evidence for the resurrection of Jesus He also has a keen interest in effective altruism and computational neuroscience

Jean Baudrillard Brian Gogan,2017-10-18 Jean Baudrillard has been studied as sociologist philosopher cultural theorist political commentator and photographer Brian Gogan establishes him as a rhetorician demonstrating how the histories traditions and practices of rhetoric prove central to his use of language In addition to Baudrillard s standard works Gogan examines many of the scholar s lesser known writings that have never been analyzed by rhetoricians and this more comprehensive approach presents fresh perspectives on Baudrillard s work as a whole Gogan examines both the theorist and his rhetoric combining these two lines of inquiry in ways that allow for provocative insights Part one of the book explains Baudrillard s theory as compatible with the histories and traditions of rhetoric outlining his novel understanding of rhetorical invention as involving thought discourse and perception Part two evaluates Baudrillard s work in terms of a perception of him as an aphorist an illusionist an ignoramus and an ironist A biographical sketch and a critical review of the literature on Baudrillard and rhetoric round out the study This book makes the French theorist s complex concepts understandable and relates them to the work of important thinkers providing a thorough and accessible introduction to Baudrillard s ideas

AI for Everyone? Pieter Verdegem,2021-09-20 We are entering a new era of technological determinism and solutionism in which governments and business actors are seeking data driven change assuming that Artificial Intelligence is now inevitable and ubiquitous But we have not even started asking the right questions let alone developed an understanding of the consequences Urgently needed is debate that asks and answers fundamental questions about power This book brings together critical interrogations of what constitutes AI its impact and its inequalities in order to offer an analysis of what it means for AI to deliver benefits for everyone The book is structured in three parts Part 1 AI Humans vs Machines presents critical perspectives on human machine dualism Part 2 Discourses and Myths About AI excavates metaphors and policies to ask normative questions about what is desirable AI and what conditions make this possible Part 3 AI Power and Inequalities discusses how the implementation of AI creates important challenges that urgently need to be addressed Bringing together scholars from diverse disciplinary backgrounds and regional contexts

this book offers a vital intervention on one of the most hyped concepts of our times *Pedagogical Explorations in a Posthuman Age* Jan Jagodzinski, 2020-07-03 This book problematizes the role of education in an increasingly mediatized world through the lenses of creativity new media and consumerism At the core of the issue the author argues creativity in art education is being co-opted to serve the purposes of current economic trends towards designer capitalism Using an East meets West approach Jagodzinski draws on Deleuze and Guattarian philosophy to explore visual and popular culture in Korean society addressing the tensions that exist between designer education and art that explores the human condition In doing so he challenges art educators to envision a new paradigm for education which questions established media ontologies and incorporates new ways to confront the crisis of the Anthropocene

Cheap Talk Joshua St. Pierre, 2025-10-01 In *Cheap Talk* Disability and the Politics of Communication Joshua St Pierre flips the script on communication disability positioning the unruly disabled speaker at the center of analysis to challenge the belief that more communication is unquestionably good Working with Gilles Deleuze's suggestion that we don't suffer these days from any lack of communication but rather from all the forces making us say things when we've nothing much to say St Pierre brings together the unlikely trio of the dysfluent speaker the talking head and the troll to show how speech is made cheap and produced and repaired within human bodies to meet the inhuman needs of capital The book explores how technologies like social media and the field of speech language pathology create smooth sites of contact that are exclusionary for disabled speakers and looks to the political possibilities of disabled voices to deface the power of speech now entwined with capital

Metastatic Cancer: Clinical and Biological Perspectives Rahul Jandial, 2013-08-08 Most cancer deaths are a result of metastasis The spread of a primary tumor to colonize neighboring and distant organs is the relentless endgame that defines the neoplastic process Patients who have been diagnosed with cancer are treated to prevent both the recurrence of the tumor at the site of origin and metastasis that would re-stage them as advanced stage IV cancer Historically and still with some types of cancer stage IV is perceived by patients as terminal Fortunately recent molecular therapies have extended the lives of patients with advanced cancer and reassuringly people living with metastatic disease increasingly visit our clinics What is the path forward Given that the consilience of science and medicine is a dynamic art from which therapies arise it would be misguided to consider any single work adequate at capturing the horizon for research So with humility we constructed this text as primer for scientists It begins with a broad introduction to the clinical management of common cancers This is intended to serve as a foundation for investigators to consider when developing basic science hypotheses Unquestionably medical and surgical care of cancer patients reveals biology and dictates how novel therapeutics will ultimately be evaluated in clinical trials The second section of this text offers provocative and evolving insights that underscore the breadth of science involved in the elucidation of cancer metastasis biology The text concludes with

information that integrates scientific and clinical foundations to highlight translational research This book serves as a framework for scientists to conceptualize clinical and translational knowledge on the complexity of disease that is metastatic cancer Cancer Metastasis ,2017 *Fundamental Aspects of Metastasis* Leonard Weiss,1976 **Cancer Metastasis** Dario Rusciano,2000 **Cancer Metastasis** David Lyden,Danny R. Welch,Bethan Psaila,2011 Comprehensively covers the processes underlying cancer metastasis and the clinical treatment of metastatic disease
