American cities to Canadian work among the Chinese diaspora to African American work in Zimbabwe the authors help us begin to grasp just how many ways evangelicals in mission are truly going from and coming to everywhere as they follow Christ's mandate to reach the nations. Diverse voices utilizing diverse strategies pursuing a common call these result in a mosaic whose larger pattern glorifies the God who came to live among us and who continues to send us out in the pattern God so clearly established. As editors Beth and Scott invite you to explore the stories embedded in that marvelous mosaic that we have been privileged to collect for this volume.

Becoming a Project Leader Alexander Laufer, Terry Little, Jeffrey Russell, Bruce Maas, 2017-12-05 This book blends academic rigor and real world experience on the agile and planning schools of project management and the process of becoming a project leader. To some project management is all about logically and rationally planning out dependencies and mapping them out into a flawless plan, a plan that must be rigorously and undeviatingly followed in all its geometric perfection. To others it is about agility, 15 minute scrum meetings and responding on the fly to the unpredictable exigencies that the randomness of the living breathing world throws up. In reality smart project leaders do both. They understand that you can't deliver a project if you make an either/or choice between these approaches; you must do both. These managers strive for stability and flexibility; they use formal and informal processes and they function as managers and leaders. In *Becoming A Project Leader* the authors have applied their blend of intellectual rigor and hard nosed practical experience to identify four concrete roles employed by successful project managers. The first three roles, planning, agility and resilience, focus on coping with changes with each role relating to a different kind of change. These three roles which complement each other can be implemented effectively only when they are supported by the fourth role, collaboration. Becoming an expert at understanding and delivering that blend requires constant reflection and interaction with peers. All
