communicate with one another Anna was able to distinguish the rhino s many different grunts and what she meant by them Snort Snuff cried Samia This is fun Hoo hoo hoo she called I m coming But with time Samia got bigger and bigger and bigger to the point where she couldn t fit inside Anna s house any longer It was time for Anna to make the tough decision she always knew she would have to make at some point or another She would need to reintroduce Samia to the wild so she could lead her life with the rest of her kind Richly illustrated with pen ink and watercolors Daniel Kirk s first nonfiction picture book brings awareness to wildlife protection and fosters further understanding of animal rescue and welfare positioned in a sensitive way that s appropriate for young readers Kirk traveled to Kenya to see the reserve firsthand and his photographs grace the back matter which includes an author s note and bibliography

The Last Rhinos. Lawrence Anthony, Graham Spence Lawrence Anthony,Graham Spence,2012-04-01 The Last Rhinos is another extraordinary story of life on a South African game reserve from the authors of The Elephant Whisperer

Dowlina Grace Borgeson,2012 There are two kinds of stories in the world those that have sad endings and those that have happy endings Dowlina s story began with great sadness when she lost her mother to poachers but it has a happy ending From the time Dowlina was rescued loving people and even animals have stepped forward to care for her In Africa where Dowlina lives there were once over 100 000 of these smart magnificent animals Now there are less than 20 000 on the entire continent and one is poached every day in the

Kruger Park alone Rhino are killed illegally for their horn because people believe it has power in traditional medicine and rituals The cost for an ounce of horn can be as high as five times the price of gold Until people everywhere understand the plight of the rhino each rhino is in danger Douwlina s journey to safety takes her to the Hoedspruit Endangered Species Centre in South Africa where in addition to the dedicated staff a lamb cares for her When she is old enough to live on her own in the wild she moves to the farm of Annales and Johan But Douwlina has spent so much time with loving humans that she acts more like an enormous house pet than a wild animal This tender story shows how each animal and human who has been part of her life has helped her first to survive then to thrive and at last to live among her own kind as she was born to do It highlights the bonds between people and animals and reminds us of the importance of being good stewards of the animals who share the planet with us

I Know a Rhino Charles Fuge,2008 A little girl spends the day playing with her animals having tea with a rhino spinning with a hippo and laughing with a giraffe

Rhino Itch Sarah Froggatt,2012-10-31 There are five surviving species of rhinoceros the Black the Javan and the Sumatran rhinos are listed as Critically Endangered on the IUCN Red List meaning they could be extinct within 30 60 years The Sumatran rhino is covered in a leathery dark grey brown skin It is often called the hairy rhino because it has tufty reddish brown hair unlike other rhinos The Sumatran rhino is the only rhino in Asia that has two horns however the smaller one never grows to more than about ten centimetres which can make it look like it only has one horn This rhino used to be found from the foothills of the Himalayas through Eastern China right down to Peninsular Malaysia as well as the Indonesian islands of Sumatra and Borneo However today it is believed only about 200 rhinos survive mainly in parts of Sumatra and possibly Peninsula Malaysia The Sumatran rhino lives in dense forests swamps and forest highlands staying close to water where they spend most of their day wallowing in muddy pools that they often dig or deepen themselves to keep them cool and protect them against insects They like to eat in the evening and before dawn when it is cooler and live off up to 100 different types of fruit bamboo twigs leaves and bark Sumatran rhinos are rather shy solitary animals staying

within their own home range The young usually stay with their mother until they are about 18 months old Rhinos begin breeding when they are 7 or 8 years old with a wait of 3 to 4 years between each birth As the gestation period is about 15 to 16 months and not always successful these animals are seriously at risk The Sumatran rhino is the most endangered of all of the rhinoceros species numbers have fallen more than 50% over the past 20 years mainly because of poaching and habitat destruction Rhino Protection Units help protect them and give this vulnerable species a chance at breeding and surviving Further information about this gentle if sometimes grumpy animal can be found through ARKIVE www.arkive.com and the International Rhino Foundation www.rhinos.org

Running Rhino Mwenye Hadithi, 2011-12-27 Rhino runs everywhere And as he runs he leaves a wake of devastation in his path The other animals are fed up of this rampant running and so Lion confronts him telling him he must stop Rhino refuses and challenges anyone to try and stop him Out of all the animals it is little Tickbird who takes up his challenge with interesting results

The Crash of Rhinos Ray Dearlove, 2020-12-10 What will future generations think of us when they look back and rhinos are only in a picture book Dr Jane Goodall DBE The Crash of Rhinos is a play on words A crash is the collective noun for rhinos but it also describes the carnage wrought by poachers in Africa who have slaughtered more than 10 000 rhinos three a day in the past decade to feed the seemingly insatiable demand for rhino horn in some Asian countries The author spent his first forty years in South Africa and during this time developed a love of wildlife After emigrating to Australia Ray retained strong ties with African wildlife and conservation In 2014 a friend suggested that he investigate the feasibility of bringing rhinos to Australia to act as an insurance policy in the event of the possibility of the extinction of rhino species in the wild The Australian Rhino Project was born The Crash of Rhinos traces the origin of the Project to the present with the team still working to relocate rhinos to Australia It is an insightful frustrating humorous and humbling story that will make you laugh cry and tear your hair out in exasperation In Ray's own words There was extreme joy and there was acute heartache This fascinating story demonstrates what can be achieved by one person with the passion resilience and dogged persistence to meet challenges obstacles and the glacial pace of governments even in the face of a crisis The proceeds of this book will be directed to the South African all female anti poaching group The Black Mambas

Baby Rhino Moreno, the Fight for Justice (1) Mr. Rajesh Shah, 2021-02-17 The story is a fantasy dream that turns into a fictional reality of an amazing love for the cherished rhinoceros and also an elephant Basically I contrive a tale of three lifelong buddies a baby rhino Moreno a baby elephant Ganesh and a baby robin Robbie all lovingly known as the Three Amigos Moreno upon learning from his mother Sita of an attack was triggered into the belief of avenging the barbaric slaughter of his dear papa Kifu and also his buddy Ganesh's papa Rajah by a trio of poachers using the assistance of his close mate Robbie Robbie has a loyal mate named Steady Eddie a golden eagle The story then develops from there whereby Eddie gathers together his entourage of faithful subjects to devise an exciting attack on these dreadful pests The fairy tale story has what everyone likes where the hero is the winner annihilating the villains There is one idea that I love of disgracing these

intruders by simply targeting their dignity by cutting off their noses
