Adventurous Learning Simon Beames, Mike Brown, 2016-01-22 Adventurous Learning interrogates the word adventure and explores how elements of authenticity agency uncertainty and mastery can be incorporated into educational practices It outlines key elements for a pedagogy of adventurous learning and provides guidelines grounded in accessible theory Teachers of all kinds can adapt these guidelines for indoor and outdoor teaching in their own culturally specific place responsive contexts without any requirement to learn a new program or buy an educational gimmick As forces of standardization and regulation continue to pervade educational systems across the globe both teaching and learning have been starved of creativity choice and real world relevance Many teachers are keen to improve their practice yet feel constrained by the institutional structures within which they work By carefully examining adventure and its role in education teachers can become better able to design and deliver engaging programmes that are underpinned by sound pedagogical principles and which have deep and enduring meaning for their students Outdoor Learning Research Sue Waite, 2020-06-09 The term outdoor learning covers many forms of practice outside the classroom including Forest School and outdoor play Outdoor learning has been rapidly growing as a topic of interest for educators and parents over the last ten years and research published in this field is also increasing Despite the fact that we are inextricably part of the natural world there is concern that contemporary children have become disconnected from nature and that their opportunities to access natural environments are declining Given compelling evidence that time spent in natural places has multiple benefits for human health and wellbeing and pro environmental behaviour Bourn et al 2016 there is an impetus to find ways to increase children s exposure to and attachment to nature through their education The chapters in this book were originally peer reviewed articles published in Education 3 13 International Journal of Primary Elementary and Early Years Education They are amongst the most popular in the journal reflecting the demand for more evidence of outcomes and high quality information about how best to implement outdoor learning for children in this age group The authors report qualitative and quantitative studies and consider implications of the findings for children and their development and for the integration or not of natural environment contexts within school practices Gathering this body of evidence together in a single volume enables important messages about outdoor learning s various purposes processes and outcomes to be more readily accessed by practitioners policy makers and researchers *The Changing World of Outdoor Learning in Europe* Peter Becker, Barbara Humberstone, Chris Loynes, Jochem Schirp, 2018-06-12 The Changing World of Outdoor Learning in Europe sets out to provide a comprehensive analysis of the economical and political changes that have occurred in European outdoor culture in the preceding two decades from a diverse range of perspectives including institutional theoretical national and educational views The book looks at how outdoor education has been transformed into an increasingly global field where established and influenced practices have been introduced into modernising and democratising nations With contributions

from the members of the board of the European Institute of Outdoor Adventure Education and Experiential Learning and representatives of the networks that stand behind it this unique book provides thorough factual analyses and examinations of outdoor learning that have never been presented before The book contains contributions from across Europe with authors from the UK Germany Finland Sweden Slovenia Poland Norway and the Czech Republic Chapters within the volume by non European authors provide another perspective on the European story in a wider context As a whole the book will stimulate the ongoing debate about the nature function and organisation of outdoor education around the globe The Changing World of Outdoor Learning in Europe will be of great interest to academics researchers and postgraduate students in the fields of outdoor education leadership and recreation and outdoor sport environmental and leisure studies It should also be essential reading for those involved in outdoor organisations in Europe and worldwide
