Online Intelligent Decision Making Quality Management:

Intelligent Decision Making in Quality Management Cengiz Kahraman, Seda Yanik, 2015-10-31 This book presents recently developed intelligent techniques with applications and theory in the area of quality management. The involved applications of intelligence include techniques such as fuzzy sets, neural networks, genetic algorithms, etc. The book consists of classical quality management topics dealing with intelligent techniques for solving the complex quality management problems. The book will serve as an excellent reference for quality managers, researchers, lecturers, and postgraduate students in this area. The authors of the chapters are well-known researchers in the area of quality management.

Intelligent Decision-making Support Systems Jatinder N.D. Gupta, Guisseppi A. Forgionne, Manuel Mora T., 2007-03-30 This book will be bought by researchers and graduates, students in Artificial Intelligence and management, as well as practising managers and consultants interested in the application of IT and information systems in a real business environment.

Biometric and Intelligent Decision Making Support Arturas Kaklauskas, 2014-12-26 This book presents different methods for analyzing the body language, movement, position, use of personal space, silences, pauses, and tone, the eyes, pupil dilation or constriction, smiles, body temperature, and the like, for better understanding people's needs and actions, including biometric data gathering and reading. Different studies described in this book indicate that sufficiently much data, information, and knowledge can be gained by utilizing biometric technologies. This is the first wide-ranging book that is devoted completely to the area of intelligent decision support systems, biometrics technologies, and their integrations. This book is designated for scholars, practitioners, and doctoral and master's degree students in various areas, and those who are interested in the latest biometric and intelligent decision making support problems and means for their resolutions, biometric and intelligent decision making support systems, and the theory and practice of their integration, and the opportunities for the practical use of biometric and intelligent decision making support.

IoT (Internet of things) and its Application Dr. Ashish Avasthi, Dr. Anand K. Pathrikar, Asst. Prof. Devkar Rajesh Subhashrao, Dr. Vivek Ravishankar Dubey, 2025-01-28 IoT Internet of Things and Its Applications: the transformative impact of interconnected smart devices across industries. Fundamental concepts, architecture, and communication protocols, this into real world applications in healthcare, smart cities, agriculture, manufacturing, and more. It examines challenges like security, scalability, and interoperability while highlighting emerging trends such as AI-driven IoT and edge computing. Designed for students, researchers, and professionals, it provides insights into the evolving IoT landscape and its role in shaping a connected intelligent future.

AI-Driven Cybersecurity and Threat Intelligence Iqbal H. Sarker, 2024-04-28 This book explores the dynamics of how AI (Artificial Intelligence) technology intersects with cybersecurity challenges and threat intelligence as they evolve. Integrating AI into cybersecurity not only offers enhanced defense mechanisms but this book introduces a paradigm shift illustrating how one can conceptualize, detect, and mitigate cyber threats. An in-depth exploration of AI-driven solutions is presented, including machine learning algorithms, data science, modeling,

generative AI modeling threat intelligence frameworks and Explainable AI XAI models As a roadmap or comprehensive guide to leveraging AI XAI to defend digital ecosystems against evolving cyber threats this book provides insights modeling real world applications and research issues Throughout this journey the authors discover innovation challenges and opportunities It provides a holistic perspective on the transformative role of AI in securing the digital world Overall the use of AI can transform the way one detects responds and defends against threats by enabling proactive threat detection rapid response and adaptive defense mechanisms AI driven cybersecurity systems excel at analyzing vast datasets rapidly identifying patterns that indicate malicious activities detecting threats in real time as well as conducting predictive analytics for proactive solution Moreover AI enhances the ability to detect anomalies predict potential threats and respond swiftly preventing risks from escalated As cyber threats become increasingly diverse and relentless incorporating AI XAI into cybersecurity is not just a choice but a necessity for improving resilience and staying ahead of ever changing threats This book targets advanced level students in computer science as a secondary textbook Researchers and industry professionals working in various areas such as Cyber AI Explainable and Responsible AI Human AI Collaboration Automation and Intelligent Systems Adaptive and Robust Security Systems Cybersecurity Data Science and Data Driven Decision Making will also find this book useful as reference book

Mechatronics and Automation Technology J.-Y. Xu, 2024-02-15 Mechatronics and automation technology has led to technological change and innovation in all engineering fields affecting various disciplines including machine technology electronics and computing It plays a vital role in improving production efficiency reducing energy consumption and improving product quality and safety and will be central to the further advancement of technology and industry bringing convenience and innovation to even more areas This book presents the proceedings of ICMAT 2023 the 2nd International Conference on Mechatronics and Automation Technology held as a virtual event on 27 October 2023 The aim of the conference was to provide a platform for scientists scholars engineers and researchers from universities and scientific institutes around the world to share the latest research achievements in mechatronics and automation technology explore key challenges and research directions and promote the development and application of theory and technology in this field A total of 121 submissions were received for the conference of which 77 were ultimately accepted after a rigorous peer review process The papers cover a wide range of topics falling within the scope of mechatronics and automation technology including smart manufacturing digital manufacturing additive manufacturing robotics sensors control electronic and electrical engineering intelligent systems and automation technology as well as other related fields Providing an overview of recent developments in mechatronics and automation technology the book will be of interest to all those working in the field

Advances in Natural Computation, Fuzzy Systems and Knowledge Discovery Quan Xie, Liang Zhao, Kenli Li, Anupam Yadav, Lipo Wang, 2022-01-04 This book consists of papers on the recent progresses in the state of the art in natural computation fuzzy systems and knowledge discovery The book can be useful for researchers

including professors graduate students as well as R D staff in the industry with a general interest in natural computation fuzzy systems and knowledge discovery The work printed in this book was presented at the 2021 17th International Conference on Natural Computation Fuzzy Systems and Knowledge Discovery ICNC FSKD 2021 24 26 July 2021 Guiyang China All papers were rigorously peer reviewed by experts in the areas **Applications of Artificial Intelligence in 5G and Internet of Things** Vinod M. Kapse,Lalit Garg,Pavan Kumar Shukla,Varadraj Gurupur,Amit Krishna Dwivedi,2025-04-30 This is the proceedings of the 1st International Conference on Applications of AI in 5G and IoT ICAAI5GI2024 It brings together ground breaking research and practical insights into integrating Artificial Intelligence within 5G and the Internet of Things IoT This compilation highlights the latest advancements and innovative solutions emerging at the intersection of AI 5G and IoT technologies It also delves into a wide array of topics including the role of AI in enhancing 5G network efficiency the development of intelligent IoT devices and the creation of smart environments powered by these cutting edge technologies It further showcases key findings on AI driven applications in 5G for seamless communication improved connectivity and advanced data processing techniques along with IoT solutions for smart cities industrial automation healthcare and beyond It would be a valuable read for researchers engineers and professionals in AI 5G IoT and related fields It serves as an essential resource for those seeking to stay at the forefront of technological advancements in these rapidly evolving domains **Internet of Things in Smart Technologies for Sustainable Urban Development** G. R. Kanagachidambaresan,R. Maheswar,V. Manikandan,K. Ramakrishnan,2020-04-29 This book provides solution for challenges facing engineers in urban environments looking towards smart development and IoT The authors address the challenges faced in developing smart applications along with the solutions Topics addressed include reliability security and financial issues in relation to all the smart and sustainable development solutions discussed The solutions they provide are affordable resistive to threats and provide high reliability The book pertains to researchers academics professionals and students Provides solutions to urban sustainable development problems facing engineers in developing and developed countries Discusses results with industrial problems and current issues in smart city development Includes solutions that are reliable secure and financially sound **Deep Learning Applications and Intelligent Decision Making in Engineering** Senthilnathan, Karthikrajan,Shanmugam, Balamurugan,Goyal, Dinesh,Annappoorani, Iyswarya,Samikannu, Ravi,2020-10-23 Deep learning includes a subset of machine learning for processing the unsupervised data with artificial neural network functions The major advantage of deep learning is to process big data analytics for better analysis and self adaptive algorithms to handle more data When applied to engineering deep learning can have a great impact on the decision making process Deep Learning Applications and Intelligent Decision Making in Engineering is a pivotal reference source that provides practical applications of deep learning to improve decision making methods and construct smart environments Highlighting topics such as smart transportation e commerce and cyber physical systems this

book is ideally designed for engineers computer scientists programmers software engineers research scholars IT professionals academicians and postgraduate students seeking current research on the implementation of automation and deep learning in various engineering disciplines *Internet of Things - ICIOT 2023* Kejiang Ye,Liang-Jie Zhang,2024-01-18 This book constitutes the refereed proceedings of the 8th International Conference on Internet on Things ICIOT 2023 held as part of SCF 2023 in Shenzhen China during December 17 18 2023 The 8 full papers presented in this volume were carefully reviewed and selected from 28 submissions The papers cover topics in the field of sensors and other types of sensing devices wired and wireless networks platforms and tools data processing visualization analysis and integration engines

Employee-centered Industry 5.0 - Case analysis of Haier Chaoan Lai,Shiban Luo,2024-05-08 How green digital intelligence and ecology promote enterprises to transform into industry 5 0 has attracted the attention of the industry and academia Still its internal driving mechanism at the micro level has not been clarified Based on the perspective of enterprise dynamic capability and resource allocation this paper studies the path process capability logical scheme of Industry 5 0 restructuring value chain Firstly the multi case configuration analysis is carried out through focused stepwise quantitative case analysis to explore the resource collaboration path of Industry 5 0 transformation Then the process of digital intelligence and ecological reconstruction of the value chain is studied longitudinally for a single case and the stage characteristics of green digital intelligence and ecology driving the Industrial 5 0 transformation of manufacturing enterprises are studied by combining the time series interval method and the critical event method The process mechanism of digital intelligence and Industry 5 0 key capabilities are found Aimed at the path problem of green digital intelligence and ecological reconstruction of the manufacturing value chain based on multi case statistical analysis and single case in depth analysis the reconstruction mechanism and scheme of manufacturing ecological value chain were obtained The research findings are as follows firstly four configuration forms of digital intelligence and ecological resource allocation are identified and the rational allocation of resources is realized through the collaborative effect of resources Secondly the ecological process of green digital intelligence of manufacturing enterprises is based on the process of standardization online integration intelligence ecological Industry 5 0 and the key technologies of each stage are identified Third in the transformation process of Industry 5 0 three key capabilities of enterprise digital production digital drive and ecological economy are constructed and data led to promote the transformation and development of enterprise intelligent services and leverage the new business form of digital ecology **The Road Map of China's Steel Industry** Xinchuang Li,2020-07-03

This book explores the principles of supply side structural reform and current practices in the Chinese steel industry Focusing on the general requirements for high quality development it reviews the evolution of the global and Chinese steel industries with regard to reduction innovation and transformation It also summarizes industrial development law from a transfer route perspective analyzes major challenges and opportunities for the steel industry in the new era and proposes

strategic orientation and implementation measures for the future development of the steel industry The book contends that high quality development of the steel industry must be driven by innovation and it is essential to promote integrated development based on several aspects greenness coordination quality standardization differentiation service intelligence diversification and internationalization in order to reshape the industrial value chain and continuously improve industrial competitiveness This concept is essential to help Chinese steel companies prepare development plans for transformation and upgrading Combining thorough analysis unique insights and many practical cases the book offers a guide to and inspiration for future implementation approaches

Proceedings of the 2022 International Conference on Artificial Intelligence, Internet and Digital Economy (ICAID 2022) Nebojša Radojević,Gang Xu,Datuk Dr Hj Kasim Hj Md Mansur,2022-12-28 This is an open access book With the continuous upgrading of network information technology especially the combination of information technology such as Internet cloud computing blockchain Internet of Things and in social and economic activities through artificial intelligence Internet and big data with high quality and fast processing efficiency improvement economic form from industrial economy to information economy This will greatly reduce social transaction costs improve the efficiency of resource optimization increase the added value of products enterprises and industries and promote the rapid development of social productivity The 2022 International Conference on Artificial Intelligence Internet and Digital Economy ICAID 2022 will focus on the latest research on Artificial Intelligence Internet and Digital Economy which brings together experts scholars researchers and related practitioners from around the world to share research results discuss hot issues and provide attendees with cutting edge technology information to keep them abreast of industry developments the latest technologies and broaden their research horizons

Proceedings of the 2023 2nd International Conference on Artificial Intelligence, Internet and Digital Economy (ICAID 2023) K. Hemachandran,Raja Sarath Kumar Boddu,Waseem Alhasan,2023-09-26 This is an open access book With the continuous upgrading of network information technology especially the combination of Internet cloud computing blockchain Internet of things and other information technologies with social and economic activities through the improvement of artificial intelligence Internet and big data with high quality and fast processing efficiency the economic form is transformed from industrial economy to information economy This will greatly reduce social transaction costs improve the efficiency of resource optimization increase the added value of products enterprises and industries and promote the rapid development of social productivity 2023 2nd International Conference on Artificial Intelligence the Internet and the Digital Economy ICAID 2023 will continue to focus on the latest research on Artificial intelligence the Internet and the Digital Economy and expand the research on technology and application of the integrated development of Digital Economy and Artificial Intelligence as the theme The aim is to gather experts scholars researchers and related practitioners from around the world to share research results discuss hot issues and provide participants with cutting edge technology information so that they can keep abreast of industry developments the

latest technologies and broaden their research horizons The conference was held in Beijing China on April 21 23 2023 All experts and scholars are welcome to attend

Proceedings of the 2024 3rd International Conference on Artificial Intelligence, Internet and Digital Economy (ICAID 2024) Anandakumar Haldorai,ANANDAKUMAR HALDORAI; DILBAG SINGH; ANIL KUMAR; MI.,2024 This book comprises the proceedings of the 2024 3rd International Conference on Artificial Intelligence Internet and Digital Economy held in Bangkok Thailand It brings together experts scholars and business leaders to discuss the latest advancements and trends in artificial intelligence and its integration with the digital economy The volume includes peer reviewed papers covering a wide range of topics such as AI applications big data analytics intelligent systems and network economy It serves as a valuable resource for researchers academicians and professionals interested in the intersection of technology and economic development providing insights into current research and future directions in these rapidly evolving fields

Emerging Challenges in Intelligent Management Information Systems Marcin Hernes,Jaroslav Wątróbski,Artur Rot,2024-12-20 This book contains the first volume of proceedings of the ECAI 2024 Workshop on Intelligent Management Information Systems IMIS 2024 IMIS 2024 was part of the 27th European Conference on Artificial Intelligence ECAI 2024 held in Santiago de Compostela from October 19 2024 to October 24 2024 The book discusses emerging challenges related to implementing artificial intelligence in management information systems The main focus is put on machine learning including deep learning to support business processes artificial intelligence for financial systems and cryptocurrencies hybrid artificial intelligence and multiple criteria decision analysis methods The book is divided into three major parts covering the main issues related to the topic The first part presents issues related to application of artificial intelligence in information systems The second part is devoted to advanced machine learning and data processing methods to support business processes The third part is devoted to intelligent multiple criteria decision analysis methods The book has an interdisciplinary character therefore it is intended for a broad scope of readers including researchers students managers and employees of business organizations software developers IT and management specialists

Convergence of Artificial Intelligence, Machine Learning, and the Internet of Things in Industry 4.0 Applications Amrita Rai,Dinesh Kumar Singh,Rupali Singh,Korhan CENGİZ,2025-07-29 The book offers valuable insights into research related to Industry 4 0 applications that utilize artificial intelligence AI machine learning ML and the Industrial Internet of Things IIoT Industry 4 0 also known as the Fourth Industrial Revolution includes disruptive technologies such as the Internet of Things IoT robotics virtual reality VR VLSI architecture and AI all of which are transforming modern society and manufacturing practices This book addresses various aspects of smart industrial application design strategies and their effects on next generation systems including quantum computing edge computing IoT cybersecurity nano communications and robotic automation The application of AI machine learning techniques and IoT is anticipated to improve the performance of automated and controlled systems Intended as a resource for academics researchers and professionals in the fields of AI and ML the content also

explores their applications within the industrial revolution and the influence of VLSI on the global market Additionally the book serves as a reference for developing sustainable engineering solutions to address various global industrial challenges

Internet of Production Christian Brecher,Günther Schuh,Wil van der Aalst,Matthias Jarke,Frank T. Piller,Melanie Padberg,2023-12-29 This seminal compendium available through open access illuminates the forefront of digital collaboration in production It introduces the visionary concept of the Internet of Production IoP an ambitious initiative by Germany's esteemed Cluster of Excellence at RWTH Aachen University This handbook pioneers the integration of data models and knowledge across development production and user cycles offering interdisciplinary insights into production technology's horizons with the overall objective to create a worldwide lab The work is organized into seven key parts each contributing to a comprehensive understanding of the IoP Part I lays the foundation with interdisciplinary visions and concepts Part II delves into IoP's infrastructure encompassing digital shadows and actionable artificial intelligence Part III examines materials within the digitalized production landscape Part IV confronts the challenges and potentials of production processes under novel digitalization methods Part V focuses on production management with data driven decision support while Part VI explores agile development processes Finally Part VII delves into the interplay between internal and external perspectives in the IoP human centered work design and platform based ecosystems Supported by the German Research Foundation DFG this compendium redefines manufacturing through the transformative IoP lens Embrace this scholarly endeavor to embrace technological advancement This is an open access book

The Role of Smart Technologies in Decision Making Eleonora Pantano,Francesca Serravalle,2022-10-20 This comprehensive book examines the impact of smart technologies in consumer's behaviour from a contemporary perspective blending marketing and retailing along with other disciplines such as psychology media studies and sociology Market forces and technological advancements are making the management of and strategies for innovation more prominent and essential in all functions of business not least marketing and retailing Frontiers of marketing are constantly pushed requiring the development and adjustments of new theories Prior literature on innovation in marketing has mainly focused on digital marketing strategies and consumer behaviour while only recently introducing the notion of smart retailing in terms of smart experience and interaction While these studies provide a basis for defining smart retailing and consumer behaviour in smart retail settings the concept of smart consumers is still under investigated Thus the smart consumer consumers making extensive use of smart technologies in all steps of their shopping behaviour and experience of the store both offline and online is emerging as a promising area for future marketing and retailing studies The chapters in this edited volume seek to understand the effect of innovation in consumer behaviour by proposing original empirical and theoretical contributions methods models tools and case studies that contribute to explain this emergent phenomenon The chapters in this book were originally published as a special issue of the Journal of Marketing Management
