Report of the Defense Secretary's Commission on Base Realignment and Closure United States. Congress. House. Committee on Armed Services. Subcommittee on Military Installations and Facilities,1989 [Handbook on Life Cycle Assessment](#) Jeroen B. Guinée,2006-04-11 Environmental policy aims at the transition to sustainable production and consumption This is taking place in different ways and at different levels In cases where businesses are continuously active to improve the environmental performance of their products and activities the availability of knowledge on environmental impacts is indispensable The integrated assessment of all environmental impacts from cradle to grave is the basis for many decisions relating to achieving improved products and services The assessment tool most widely used for this is the environmental Life Cycle Assessment or LCA Before you is the new Handbook of LCA replacing the previous edition of 1992 New developments in LCA methodology from all over the world have been discussed and where possible included in this new Handbook Integration of all developments into a new consistent method has been the main aim for the new Handbook The thinking on environment and sustainability is however quickly evolving so that it is already clear now that this new LCA Handbook does not embrace the very latest developments Therefore further revisions will have to take place in the future A major advantage of this Handbook is that it now also advises which procedures should be followed to achieve adequate relevant and accepted results Furthermore the distinction between detailed and simplified LCA makes this Handbook more broadly applicable while guidance is provided as to which additional information can be relevant for specialised applications
