One Side Of Suicide One Side Of Suicide:

Phenomenology of Suicide Maurizio Pompili, 2017-10-10 This book will help the reader to understand the suicidal mind from a phenomenological point of view shedding light on the feelings of suicidal individuals and also those of clinicians In accordance with the importance that the phenomenological approach attaches to subjectivity and sense of self as the starting points for knowledge emphasis is placed on the need for the clinician to focus on the subjective experiences of the at risk individual to set aside prior assumptions judgments or interpretations and to identify ways of bridging gaps in communication associated with negative emotions The vital importance of empathy is stressed drawing attention to the insights offered by neuroimaging studies and the role of mirror neurons in social cognition It is widely acknowledged that when a clinician meets a person who wants to die by suicide the clinician does not fully understand what is going on inside the mind of that individual This book recognizes that any approach to suicide prevention must promote understanding of suicidal thoughts and feelings The awareness that it fosters and the innovative perspectives that it presents will appeal to a wide readership

The Value of Suicide Eric v.d. Luft, 2012-12-05 Philosophical examination of the ontology and ethics of suicide i e what suicide is from the perspective of being and what the effects of suicide are in the world when it is morally permitted

Biological Aspects of Suicidal Behavior W. P. Kaschka, D. Rujescu, 2016 Suicide is one of the most important causes of death in modern societies To develop more effective preventive measures we have to be aware of and learn more about its neurobiological foundations In recent years the tools of modern neurosciences have increasingly been utilized to characterize the pathophysiology of complex human behaviors such as suicide To improve suicide risk assessment and suicide prevention a better understanding of its pathophysiology is crucial This includes research from a variety of disciplines such as neuropsychological psychosocial and cultural studies but also findings from biochemistry neuropathology electrophysiology immunology neuroimaging genetics and epigenetics Important results have for example been obtained in the field of gene environment interaction and suicidal behavior We have just begun to understand how early life adversity may increase suicide risk by epigenetic mechanisms Based on such insights novel therapeutic interventions and preventive measures can be developed Furthermore a better understanding of the pathophysiological mechanisms involved in suicidal behavior could reveal the mechanism of compounds like lithium salts In this book suicidal behavior and its prevention is discussed by international experts in the light of the most recent results from a broad spectrum of neurosciences

A Diary of Four Years of Terrorism and Anti-Semitism Robert R Friedmann, 2005-02 A compilation of Friedmann's weekly e Letters written between 2000 to 2004 concerning U S and international events in relation to Israel

How to Help the Suicidal Person to Choose Life: The Ethic of Care and Empathy as an Indispensable Tool for Intervention Kathleen Stephany, 2017-07-25 Suicide is a complex problem which is linked to socioeconomic problems as well as mental stress and illness Healthcare professionals now know that the essential component of the suicidal person's state of crisis is of a

psychological and emotional nature How to Help the Suicidal Person to Choose Life is a detailed guide to suicide prevention The book recommends ethic of care and empathy as a tool for suicide intervention Readers will learn about approaches that focus on suicide prevention that address the despairing emotional mind set of the suicidal person Key features Features easy to understand learning guides for students Emphasizes on suicide intervention strategies rather than identification of risk factors highlights information from narrative case studies and psychological autopsies includes practice and simulation exercises designed to enhance therapeutic modalities such as empathy compassion unconditional positive regard connection therapeutic alliance the narrative action theoretical approach and mindful listening Contains guidelines prescribed by the Aeschi working group for clinicians Provides a list of bibliographic references and an appendix for other resources of information useful for suicide prevention This book is recommended for students and practicing professionals in medicine psychiatry nursing psychiatric nursing psychology counselling teaching social work the military police paramedics etc and other first responders volunteers or outreach workers who are confronted with situations where they have to assist people who are known or suspected of being suicidal Suicide Jason Manning,2020-06-11 The conventional approach to suicide is psychiatric ask the average person why people kill themselves and they will likely cite depression But this approach fails to recognize suicide s social causes People kill themselves because of breakups and divorces because of lost jobs and ruined finances because of public humiliations and the threat of arrest While some psychological approaches address external stressors this comprehensive study is the first to systematically examine suicide as a social behavior with social catalysts Drawing on Donald Black s theories of conflict management and pure sociology Suicide presents a new theory of the social conditions that compel an aggrieved person to turn to self destruction Interpersonal conflict plays a central but underappreciated role in the incidence of suicide Examining a wide range of cross cultural cases Jason Manning argues that suicide arises from increased inequality and decreasing intimacy and that conflicts are more likely to become suicidal when they occur in a context of social inferiority As suicide rates continue to rise around the world this timely new theory can help clinicians scholars and members of the general public to explain and predict patterns of self destructive behavior

Cognitive Strategies for Suicide Prevention, Addiction And Anxiety William Pryatel,2019-08-11 The author has been a psychiatrist for thirty nine years and has worked with thousands of patients His impression is that many of their problems have to do with the way they process or deal with information Often maladaptive pathways of thinking are employed to the person s detriment When this occurs it tends to be repeated again and again and becomes habitual Eventually symptoms such as anxiety depression suicidal feelings and addiction are generated and become more and more problematic In the author s experience this can be interrupted by mentally training oneself to only travel down adaptive pathways of thinking With this approach old pathways of thinking are abandoned There are a number of techniques that can be employed to establish and reinforce newer adaptive pathways of thinking It s not for everybody and should not be used exclusively but

first and foremost among techniques is mindfulness The author has seen it work again and again Introduced to the world by Buddha for the purpose of enlightenment nowadays it is used for mental health issues The mindfulness here is different from the type taught in DBT The author is not saying that DBT mindfulness doesn't work it's just that he has seen better outcomes with the type he teaches He learned the basics of it at IMS at Barre Massachusetts during various meditation retreats Modern psychology does not address the invisible spiritual worlds that interface with the physical world According to religious teachings these worlds really exist and forces from them can influence our thinking Reportedly an archangel rebelled against God and was booted out of heaven A third of the angels went down with him to earth They seek to have us act in such a way so that when we die they can claim our souls and torture us in hell The present work at least addresses this issue Likewise energy medicine is discussed briefly

Understanding the Complex Phenomenon of Suicide: From Research to Clinical Practice, Volume II Domenico De Berardis, Massimo Di Giannantonio, Giovanni Martinotti, 2022-08-29 Suicide

Sujit Sarkhel, Lakshmi Vijayakumar, Vinay Kumar, Shubhangi R Parkar, 2023-03-10 **Psychogeriatrics** Nicola

Veronese, Anna Marseglia, 2024-08-31 The book offers a must have tool primarily for psychiatrists geriatricians neurologists and psychologists but will also be of interest to general practitioners for first line assessment The aim of this book is to establish a gold standard a reference work to be used as a clinical guide to the assessment of mental illness in older persons in the field Psychogeriatrics is generally a very specific field in the midst of different disciplines where there is hardly a clinical consensus on how to best assess and treat elderly subjects with mental or behavioral symptoms possibly resulting from psychiatric disorders This book provides clear and practical indications prepared by a panel of international experts in the field with extensive scientific and clinical experience Boxes with first and second line actions for assessing and treating mental illness in the elderly are included and all chapters are uniformly divided into sections on epidemiology etiopathogenesis differential diagnosis assessment and treatment **Social Meanings of Suicide** Jack D.

Douglas, 2015-03-08 This book presents a review and criticism of all sociological literature on suicide from Emile Durkheim's influential *Suicide* 1897 to contemporary writings by sociologists who have patterned their own work on Durkheim's Douglas points out fundamental weaknesses in the structural functional study of suicide and offers an alternative theoretical approach He demonstrates the unreliability of official statistics on suicide and contends that Durkheim's explanations of suicide rates in terms of abstract social meanings are founded on an inadequate and misleading statistical base The study of suicidal actions Douglas argues requires an examination of the individual's own construction of his actions He analyzes revenge escape and sympathy motives using diaries notes and observers reports he shows how the social meanings of actual cases should be studied Originally published in 1967 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover

editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Suicide and Agency Ludek Broz, Daniel Münster, 2016-04-01 Suicide and Agency offers an original and timely challenge to existing ways of understanding suicide Through the use of rich and detailed case studies the authors assembled in this volume explore how interplay of self harm suicide personhood and agency varies markedly across site Greenland Siberia India Palestine and Mexico and setting self run leprosy colony suicide bomb attack cash crop farming middle class mothering Rather than starting from a set definition of suicide they empirically engage suicide fields the wider domains of practices and of sense making out of which realized imaginary or disputed suicides emerge By drawing on ethnographic methods and approaches a new comparative angle to understanding suicide beyond mainstream Western bio medical and classical sociological conceptions of the act as an individual or social pathology is opened up The book explores a number of ontological assumptions about the role of free will power good and evil personhood and intentionality in both popular and expert explanations of suicide Suicide and Agency offers a substantial and ground breaking contribution to the emerging field of the anthropology of suicide It will appeal to a range of scholars and students including those in anthropology sociology social psychology cultural studies suicidology and social studies of death and dying

Suicide Voices Sarah Waters, 2020-09-01 This book examines the phenomenon of work suicides in France and asks why at the present historical juncture conditions of work can push individuals to take their own lives During the 2000s France experienced what commentators have described as a suicide epidemic whereby increasing numbers of workers in the face of extreme pressures of work chose to kill themselves The book analyses a corpus of testimonial material linked to 66 suicide cases across three large French companies during the period from 2005 to 2015 It aims to consider what the extreme and subjective act of self killing narrated in suicide letters can tell us about the contemporary economic order and its impact on flesh and blood bodies What do rising work related suicides reveal about conditions of human labour in the twenty first century Does neoliberal economics condition a desire for suicide How do suicidal individuals describe the causes and motivations of their act Combining critical perspectives from sociology history testimony studies economics cultural studies and public health the book raises critical questions about the human costs of the shift to a finance driven neoliberal order and its everyday effects within the French workplace

Suicide in Adolescence René F.W. Diekstra, Keith E. Hawton, 2012-12-06 The official death rates from suicide vary considerably between countries in the world for which data are available They range from 3 to 45 persons a year per 100 000 of population Historically the higher rates of suicide are in the older age groups and in males However the general trend in the last twenty years has been for suicide increasing in the younger age groups 15 34 and in females It has been suggested that this development is related to the phenomenon of attempted suicide of which the rates in most industrialized countries have doubled and in some countries even tripled over the past two decades The average rate of attempted suicide

is now estimated to be around 200 per 100 000 for males and 350 for females Almost two thirds of these occur before the age of thirty Although the majority of attempted suicide are not intended to be lethal once a suicide attempt has been made there is more likelihood of subsequent death by suicide As many as ten percent of people who have made a previous unsuccessful attempt commit suicide at a later stage in their lives persons with increased likelihood to commit suicide are youngsters from disrupted families and from families with a history of suicide drug and alcohol addiction those who have failed at school the unemployed and those suffering from depression **Carl Rogers, Control Freak** Kevin Everett FitzMaurice, 2012-04-07

This book is about the work of Carl Rogers not the life of Carl Rogers The personal problems Carl Rogers had with alcohol and his marriage have nothing to do with his counseling method This brief book focuses on the method of counseling that he invented Method and technique are not to be confused with counseling theory A counseling theory is a set of guiding principles that structure the course of counseling A method or technique is a strategy for eliciting a response from a client Counseling theories therefore provide general directions for achieving specific goals while methods or techniques are specific strategies for promoting a change or curative response from a client Carl Rogers gave the counseling world its most effective efficient and advanced method Unfortunately Rogers feared to face the true nature of his method and buried it under false philosophy and theory that diametrically opposed it Rogers betrayal of his method has led to a corruption of his method causing it to be diluted at best and in many cases lost We must separate the theory of Carl Rogers from the method of Carl Rogers to resurrect and preserve his superior method This book will help you discover the true nature of the method But ultimately you must work this out for yourself You must again watch the videos of Rogers at work You must again analyze his method You must experiment and test until you are certain from your own examination what the nature of the method is If you wish to debate Rogers theories then you are missing the point The Rogerian Method works wonders and needs to be salvaged and seen for what it is separate from all theory and philosophy *The Suicidal Mind* Edwin S. Shneidman, 1998

Presenting cases recounted in the patients own words that reveal the inner workings of the suicidal mind Shneidman looks at suicide from a psychological perspective He offers a wealth of insights to help understand and to prevent suicide Suicidal Behaviour Jürgen Kind, 1999 Looking at the problem of suicide and suicidal behaviour from a psychoanalytical perspective Kind analyses the various motivations for such impulses and the therapist's countertransference reactions to a suicidal patient Therapeutic strategies for dealing with threatened or actual suicide are evaluated within the clinical context Suicidal patients for example may provoke emotions of anger guilt and helplessness in their therapists these emotions only intensify if a patient makes a successful suicide attempt The issue of guilt is used by Kind as a starting point for his exploration of what suicidal behaviour actually represents He bases his analysis on clinical observations made during therapy with psychosomatic patients neurotics and patients with borderline disorders The dynamics of transference and countertransference object relations transitional domains and types of interaction both within the patient and between the

patient and the therapist are discussed Understanding the origins of suicidal impulses makes it possible for the therapist to cope with his or her own reactions to the patient s behaviour This book provides an insightful and comprehensive study which will be of interest to all those working in mental health care and related professions *Eight historical dissertations*

in suicide, chiefly in refernce to philosophy, theology, and legislation Henry Gabriel Migault,1856 **Suicide and Culture**

2.0 Erminia Colucci,David Lester,2025-03-24 **BOLD TEXT** Integrating the role of culture is critical in preventing suicide Written by leading suicide researchers Explores suicide in different cultural contexts Highlights how to conduct culturally sensitive studies Building on the seminal work of Colucci and Lester 2013 this volume examines the unique perspective of the role culture plays in suicide research and prevention With the current domination of individual and largely biomedical approaches in the field these leading social scientists and suicide researchers carefully show how important integrating sociocultural factors is in helping to prevent people from dying by suicide and support those who live with suicidality The first section addresses the fundamental issues of why culture is of vital importance in understanding and preventing suicidal behavior what the cultural meaning of suicide is and where current research and theory are taking us It concludes with a thought provoking perspective on suicide as a staged performance The second section features a mixed methods cross cultural study on the meanings of suicide in Australian Indian and Italian cultures Additional chapters explore a culturally specific form of suicide i e sati in India suicide among Roma and Irish Travellers and a community based suicide prevention strategy for different populations including migrants and refugees and people from low and middle income Asian countries The authors conclude with insightful recommendations for conducting culturally sensitive and meaningful studies This volume is essential reading for anyone involved in suicide research and prevention and more broadly to those interested in the sociocultural and political contexts of mental health **The Preacher's Guide to Suicide** H. C. Johnson,2022-03-18

This book makes the startling claim that the pulpit is the appropriate place to address suicide In *A Preacher s Guide to Suicide* Johnson chisels through the rusty prison bars of cultural pretense and the oppressive myths of suicide Using history the social and behavioral sciences and biblical inquiry over the centuries of varied Christian voices Johnson demonstrates that suicide is part of the very fabric of Christian identity And to preach suicide awareness is to preach life into the very act of dying While grappling with the contemporary understanding of neuroscience psychopathology societal values and individualism Johnson seeks to present suicide in a hopeful light as we all approach death in those daily moments of confession forgiveness and prayer Johnson hopes to provoke further conversation within the Christian community about the richness of suicide within the Scriptures and seeks to be a source of inspiration for preachers

When somebody should go to the book stores, search launch by shop, shelf by shelf, it is in fact problematic. This is why we offer the books compilations in this website. It will totally ease you to see guide **One Side Of Suicide One Side Of Suicide** as you such as.
