Offworld (Dangerous Times Collection Book #1) Robin Parrish, 2009-07-01 The return of NASA's first manned mission to Mars was supposed to be a momentous day. But when the crew loses touch with ground control before entry, things look bleak. Safe after a treacherous landing, the crew emerges to discover the unthinkable: every man, woman, child, and animal has vanished without a trace. Alone now on their home planet, the crew sets out to discover where everyone has gone and how to get them back, only to discover they may not be as alone as they thought.

Nightmare (Dangerous Times Collection Book #2) Robin Parrish, 2010-07-01 Ghost Town is the hottest amusement park in the country, offering state-of-the-art chills and thrills involving the paranormal. The park's main ride is a haunted mansion that promises an encounter with a real ghost. When Maia Peters visits during her senior year of college, she's not expecting to be impressed. Maia grew up as the only child of a pair of world-renowned ghost hunters, so the paranormal is nothing new. In fact, the ride feels pretty boring until the very end. There, a face appears from the mist: the face of Jordin Cole, a girl who disappeared from campus a year ago. Convinced what she saw wasn't a hoax and desperate to find answers to Jordin's disappearance, Maia launches into a quest for answers. Joined by Jordin's boyfriend, a pastor's kid with very different ideas about the spirit realm, Maia finds herself in a struggle against forces she never expected to confront.

Words on Cassette, 2002 R. R. Bowker Publishing, 2002 **How Silicon Valley Unleashed Techno-feudalism** Cédric Durand, 2024-09-03 The rise of the IT industry in the nineties promised a new era of freedom and prosperity. It didn't deliver. Certainly, algorithms are everywhere, but capitalism is no more civilised than ever. In fact, in the hands of private corporations, the digitalisation of the world drives us towards a darker future. The return of monopolies, the dominance of a few platforms, the blurred distinction between the economic and the political all epitomise a systemic mutation. Information and data networks push the digital economy in the direction of the feudal logic of rent, dispossession, and personal domination. **How Silicon Valley Unleashed Techno-feudalism** offers a fresh genealogy of the Silicon Valley consensus and its contradictions. It disentangles the principles of an emerging systemwide rationale. Large firms compete in cyberspace to gain control over data, and ordinary people are increasingly at the mercy of tech giants. In this new economic order, capital is moving away from production to focus on predation.

Survivors: The second book of The Off World Trilogy Patrick Locke, 2014-12-24 In the second book of *The Off World Trilogy*, Jacob Young awakens to find himself alone and forsaken amidst the ruins of the destroyed planet TUE. Forced by the Khonians to fight in their ancient war against the Rha-ket-gar, Jacob and his fellow Saje endured the terrible battles and torture of their conscription, only to be betrayed and left to die as the massive planet-killer bombs rained down on them, sucking the oxygen from the planet's surface. Now further from home than ever, Jacob must face his fears, search for his missing comrades, and lead the Saje survivors on their quest to find their own way back to Earth. Along the way, they battle new enemies on land and in space while striving to retain the core of their humanity and, above all, hope.

Property Rights in Outer Space Matthew Johnson, 2024-05-28 This book explores the role of private mining rights in the utopian imaginary of space colonisation. It presents a transdisciplinary account of the new and evolving legislative frameworks that have been established in anticipation of commercial exploitation of the mineral resources of the off world frontier. Written in an engaging style, the book investigates a novel case study in the history of capitalism and the commons: the emergence of a nascent space mining industry undergirded by a contentious legislative framework. In 2015 the US passed laws that would recognise the claims of US corporations to own and sell space resources. This unilateral act of pre-emptive law making would appear to contravene the terms of the UN Outer Space Treaty 1967 which declared that the exploration and use of outer space should be for the benefit of all mankind and not subject to national appropriation. Using this central dynamic between privately held mining rights and outer space as a global commons, Matthew Johnson constructs an historical sociology of space mining from the deep historical roots of common and private property to the contemporary networks of neoliberalism that have engaged with the commercialisation of space activity. The anticipatory expansion of private property claims beyond the Earth both resonates with and problematises the terrain of political history such as the tensions between states and markets, public law and private power, the commons and exclusive property. The emerging cosmopolitics of off world private property mirrors and is often explicitly embedded within neoliberal geopolitics, prompting urgent questions about how we can reaffirm principles of democracy and common heritage in the international laws of Earth and space. This book is compelling reading for anyone interested in the social study of space law, economics, technology, politics and property rights.

The New Gold Rush Joseph N. Pelton, 2016-11-04 This book captures the most exciting advances in the harnessing of space as a global resource. The authors track the growing number of space businesses and opportunities for investors and the many possible benefits of spaceplanes, space stations and even space colonies. The authors also discuss the need for more regulatory reform. Companies like Planetary Resources are now forming to find mineral rich asteroids and bring back new riches to Earth. Solar power satellites in the next few years will start to beam clean energy back to Earth to meet the growing demands of a still developing world. Innovative space industries are vital to the survival of modern human life and the authors demonstrate what can be done to encourage the growing of the New Space frontier. From lassoing and then mining asteroids to developing new methods of defending the planet from space hazards and setting up new hotels and adventures for tourists in space, this new industry will have profound effects on Earth, especially on its economy. This book is based on a study of international experts commissioned ahead of the UNISPACE 50 meeting, having distilled the results of this comprehensive fact-finding process into a compact and very readable form. It can serve as an excellent starting point for understanding all the activities underway or planned to make space truly our next frontier.
