Oil, Politics and Violence Max Siollun, 2009 An insider traces the details of hope and ambition gone wrong in the Giant of Africa Nigeria Africa's most populous country When it gained independence from Britain in 1960 hopes were high that with mineral wealth and over 140 million people the most educated workforce in Africa Nigeria would become Africa's first superpower and a stabilizing democratic influence in the region *Critical Engagements on African Literature* Abba A. Abba, Benedictus C. Nwachukwu, 2019-09-24 Beyond the critical examination of Isidore Diala's award winning poetry and drama the essays in this collection offer fresh insights on the complex methodological and theoretical patterns underlying the readings of African literary landscapes This is the first book to devote considerable attention to the study of Diala's creative works The Pyre drama and The Lure of Ash poetry The majority of the contributors here are selected from among the finest of Diala's former teachers colleagues and students who know him very closely The collection addresses fertile areas of African literary expression such as the relationship between literature and national history African ritual aesthetics affirmation denial and ambivalence as products of social constructions and exile migration and home coming Contributions also explore poetry and poetic truths semiotics anticolonial revolutions and postcolonial implosions oil politics discontent and militancy and feminism and gender politics The book stands out among its peers and offers great insights to scholars researchers and teachers working in the fields of African literature cultures and aesthetics *Colonial and Postcolonial Oil Politics in the Persian Gulf* Battal Doğan, 2024-07-17 This book examines the British colonial and American post colonial oil policies toward the Persian Gulf from a postcolonial critical perspective taking into account the coloniality and postcoloniality of power structures It examines colonization decolonization and postcolonization of oil in the Persian Gulf through the parameters of political order formulated policies market structure concession system imperial national interests and great powers rivalry In this work the author uses qualitative theory testing and comparative case study method There are several reasons that are encouraging for the selection of these two cases first British colonial and American post colonial oil policies toward the Gulf region show similar patterns of domination and exploitation second both colonial and post colonial great powers consider the control of the Gulf oil among their national security priorities third both use military interventions install military bases and involve in coup d'etat in the region to maintain their established oil order and fourth both justify their colonial imperial oil order in the region with humanitarian objectives such as civilizing mission or democratization In this research the state level of analysis is used to explore the oil policies of Anglo American governments The governance history of oil in the Persian Gulf can be broadly divided into three phases 1 the colonial period 1901 1950 2 the decolonization period 1950 1972 and 3 the post colonial period since the mid 1970s to the present Chronologically the oil policies of Anglo American governments are examined in loose temporal and spatial contexts and each period is introduced in independent chapters but they are complementary to each other Handbook of Oil Politics Robert E. Looney, 2012-01-25 These days one

would have a difficult time picking up a newspaper or watching a newscast that did not have a lead story dealing with some aspect of oil From instability in the Middle East to stock market crashes and concerns over the health of the world economy to wars that seem to break out unexpectedly around the world to discussions of global warming and even speculation over the fate of mankind oil is usually lurking somewhere in the background To many oil markets and their linkages to a whole spectrum of events remain something of a mystery Unfortunately most of the easily obtained information on oil is deeply flawed Whole web conspiracy sites depict ruthless insiders and reckless dictators manipulating energy markets at will The 30 essays in this volume written by the leading experts in the field attempt to set the record straight While their assessments may lack the sensationalism of many popular pundits serious readers will find their insights invaluable in the years to come in providing a framework for understanding many of the events of the day The volume is divided into sections Part I provides a broad overview of the political dimensions underlying the supply of oil Some of the key questions addressed include is the world running out of oil And if so is the cause physical scarcity or political policy failure Why are many of the oil producing countries in the developing world so unstable Can oil markets be made to provide more stability to the world system Part II examines some of the political responses to oil related developments Here the key questions concern the role of the political process in the development of alternative sources of energy The various means through which countries approach their energy security is assessed as is the problem of climate change The section ends with the provocative question do governments really need to go to war for oil Oil production energy markets and the political environment produce distinct regional patterns Part III examines oil and political power in Africa Latin America the Middle East and South East Asia Part IV expands some of the main regional themes through a series of case studies on specific countries Iraq Iran Saudi Arabia Egypt Russia and Brazil A final section looks to the future will the oil curse continue for many countries How will the growth and expansion of China affect oil prices and availabilities Will oil based sovereign wealth funds contribute to global stability or will they create increased political tensions between consuming and producing countries Will volatile oil markets undermine the US dollar as well as the global financial system Perhaps appropriately the volume ends with an assessment of the future of oil in a carbon constrained world All in all the essays in this volume cover the whole spectrum of the politics of oil Hopefully they will help shed light on this vital yet still often misunderstood topic The book does not represent any particular political or ideological position Instead each author has sought to objectively seek a deeper understanding as to the complexity and subtlety of forces that have all too often eluded policymakers around the world

maps a statistics section **The Politics of Palm Oil Harm** Hanneke Mol, 2017-08-16 This book examines the politics of harm in the context of palm oil production in Colombia with a primary focus on the Pacific coast region Globally the palm oil industry is associated with practices that fit the most conventional definitions and perceptions of crime but also crucially forms of social and environmental harm that do not fit strictly legalistic definitions and understandings of crime Drawing on rich field based data from the region Mol contributes empirically to an awareness of the constructions practices and the lived and perceived realities of harm related to palm oil production She advances criminological debate around harm by putting forward a theoretical and analytical approach that redirects the debate from a central concern with the academic contestedness of harm within criminology towards a focus on the on the ground contestedness of palm oil related harm in Colombia Detailed analysis and arresting conclusions ensure this book will be of great interest to students and scholars in the fields of Green and Critical Criminology Environmental Sociology and International and Critical Development Studies Oil and Politics in the Gulf Jill Crystal, 1995-01-27 This book asks why in recent years the social and economic upheavals in Kuwait and Qatar have been accompanied by a remarkable political continuity **The Politics of Oil and Revolution in Iran** Shaul Bakhash, 2010-12-01 This book discusses the influence of oil on the internal politics of Iran Grassroots Politics and Oil Culture in Venezuela Iselin Åsedotter Strønen, 2017-09-01 This book is published open access under a CC BY 4.0 license This book presents an ethnographic study of how grassroots activism in Venezuela during the Chávez presidency can be understood in relation to the country's history as a petro state Taking the contested relationship between the popular sectors and the Venezuelan state as a point of departure Iselin Åsedotter Strønen explores how notions such as class race state bureaucracy popular politics capitalism neoliberalism consumption oil wealth and corruption gained salience in the Bolivarian process A central argument is that the Bolivarian process was an attempt to challenge the practices ideas and values inherited from Venezuela's historical development as an oil producing state Drawing on rich ethnographic material from Caracas shantytowns state institutions as well as everyday life and public culture Strønen explores the complexities and challenges in fostering deep social and political change Power and the Politics of Oil in the Soviet South Caucasus Sara G. Brinegar, 2023-12-14 Sara G. Brinegar's book is the first to show how the politics of oil intersected with the establishment of Soviet power in the Caucasus it reveals how the Soviets cooperated and negotiated with the local elite rather than merely subsuming them More broadly Power and the Politics of Oil in the Soviet South Caucasus demonstrates not only how the Bolsheviks understood and exploited oil but how the needs of the industry shaped Bolshevik policy Brinegar reflects on the huge geopolitical importance of oil at the end of World War I and the Russian Civil War She discusses how the reserves sitting idle in the oil fields of Baku the capital of the newly independent Azerbaijan Democratic Republic and the center of the fallen empire's oil reserves were no exception to this With the Soviet leadership in Moscow intent on capturing the fields in the first few months of 1920 this book examines the Soviet project to rebuild Baku's oil industry in the aftermath of these

wars and the political significance of oil in the formation of the Soviet Union Oil Wealth and the Poverty of Politics Miriam R. Lowi, 2009-11-12 This book explains why Algeria's post colonial domestic political economy unravelled and how the regime eventually managed to regain power and hegemony *The Complete Idiot's Guide to the Politics of Oil* Lita Epstein, Charles Jaco, Julianne C. Iwersen-Niemann, 2003 Describes how the discovery of oil has affected world history and current events Governing Extractive Industries Anthony Bebbington, Abdul-Gafaru Abdulai, Denise Humphreys Bebbington, 2018 This book synthesizes findings regarding the political drivers of institutional change in extractive industry governance It analyses resource governance from the late nineteenth century to the present in Bolivia Ghana Peru and Zambia focusing on the ways in which resource governance and national political settlements interact Implementation of Oil Related Environmental Policies in Nigeria Fidelis Allen, 2011-10-18 Fidelis Allen situates violent conflict in the Niger Delta in the context of failure by government to effectively implement relevant oil related environmental policies intended to achieve sustainable development arguing that oil and environment related conflicts in the region are reflections of this failure This failure is premised on the notion that the goal of sustainable development as clearly outlined in Nigeria's National Environmental Policy and implied in various other policies can be pursued through the activities of government individuals and business organisations that are capable of engendering economic and social progress for communities that depend on the environment for their survival In fact available evidence shows that government and oil company activities or failures to act actually contribute to the despoliation of the environment in the Niger Delta Despite existing environmental legislations and guidelines unsafe waste disposal flaring of gas and oil spillage remain key features of oil industry operations in the Niger Delta Not surprisingly the book highlights a lack of synergy between government and oil company activities and the attainment of sustainable development as a key goal of the environmental policy of the government In other words the activities of the government and oil companies do not sufficiently promote sustainable development The net consequence is reflected in the frustrations of local justice and environmental movement groups about the political processes which deter rather than enable their agitation for improvements in local living conditions and development in the Niger Delta Over time those frustrations begin to manifest at different levels including aggressive and violent behaviours against oil companies and government security agencies for their contributory roles Resource Politics in Sub-Saharan Africa Matthias Basedau, 2005 **Oil, Banks, and Politics** Linda B. Hall, 2010-07-22 A study in conflict between a powerful industry and a struggling nation This fine monograph addresses an important issue in Mexican history The Americas Mexico was second only to the United States as the world's largest oil producer in the years following the Mexican Revolution As the revolutionary government became institutionalized it sought to assure its control of Mexico's oil resources through the Constitution of 1917 which returned subsoil rights to the nation This comprehensive study explores the resulting struggle between oil producers many of which were U S companies and the Mexican government Linda Hall goes beyond the

diplomacy to look at the direct impact of a powerful highly profitable foreign controlled industry on a government and a nation trying to recover from a major civil war She draws on extensive research in Mexican archives including both government sources and the private papers of Presidents Alvaro Obregón and Plutarco Elías Calles as well as U S government and private sources In the wake of the North American Free Trade Agreement s expansion of United States business ties to Mexico this study of a crucial moment in U S Mexican business relations will be of interest to a wide audience in business diplomatic and political history

The Politics of Oil Dag Harald Claes,2018-11-30 The Politics of Oil brings together legal studies economics and political science to illustrate how governments gain and exercise control over oil resources and how political actors influence the global oil market both individually and in cooperation with each other The author also investigates the role of oil in preserving regime stability in civil wars and in inter state conflicts as well as discussing the possible implications for the oil industry from policies to combat climate change

Oil and World Politics John Foster,2018-09-25 Petroleum is the most valuable commodity in the world and an enormous source of wealth for those who sell it transport it and transform it for its many uses As the engine of modern economies and industries governments everywhere want to assure steady supplies Without it their economies would grind to a standstill Since petroleum is not evenly distributed around the world powerful countries want to be sure they have access to supplies and markets whatever the cost to the environment or to human life Coveting the petroleum of another country is against the rules of international law yet if accomplished surreptitiously under the cover of some laudable action it s a bonanza This is the basis of the petroleum game where countries jockey for control of the world s oil and natural gas It s an ongoing game of rivalry among global and regional countries each pursuing its own interests and using whatever tools allies and organizations offer possible advantage John Foster has spent his working life as an oil economist He understands the underlying role played by oil and gas in international affairs He identifies the hidden issues behind many of the conflicts in the world today He explores military interventions Afghanistan Iraq Libya Syria tensions around international waterways Persian Gulf South China Sea and use of sanctions or political interference related to petroleum trade Iran Russia Venezuela He illuminates the petroleum related reasons for government actions usually camouflaged and rarely discussed publicly by Western politicians or media Petroleum geopolitics are complex When clashes and conflicts occur they are multi dimensional This book ferrets out pieces of the multi faceted puzzle in the dark world of petroleum and fits them together

Oil Culture Ross Barrett,Daniel Worden,2014-10-15 In the 150 years since the birth of the petroleum industry oil has saturated our culture fueling our cars and wars our economy and policies But just as thoroughly culture saturates oil So what exactly is oil culture This book pursues an answer through petrocapiatalism s history in literature film fine art wartime propaganda and museum displays Investigating cultural discourses that have taken shape around oil these essays compose the first sustained attempt to understand how petroleum has suffused the Western imagination The contributors to this volume examine the oil culture

nexus beginning with the whale oil culture it replaced and analyzing literature and films such as Giant Sundown Bernardo Bertolucci's *La Via del Petrolio* and Ben Okri's *What the Tapster Saw* corporate art museum installations and contemporary photography and in apocalyptic visions of environmental disaster and science fiction By considering oil as both a natural resource and a trope the authors show how oil's dominance is part of culture rather than an economic or physical necessity Oil Culture sees beyond oil capitalism to alternative modes of energy production and consumption Contributors Georgiana Banita U of Bamberg Frederick Buell Queens College Gerry Canavan Marquette U Melanie Doherty Wesleyan College Sarah Frohardt Lane Ripon College Matthew T Huber Syracuse U Dolly J rgensen Ume U Stephanie LeMenager U of Oregon Hanna Musiol Northeastern U Chad H Parker U of Louisiana at Lafayette Ruth Salvaggio U of North Carolina Chapel Hill Heidi Scott Florida International U Imre Szeman U of Alberta Michael Watts U of California Berkeley Jennifer Wenzel Columbia University Sheena Wilson U of Alberta Rochelle Raineri Zuck U of Minnesota Duluth Catherine Zuromskis U of New Mexico
